

How to Install (Solution Composer)

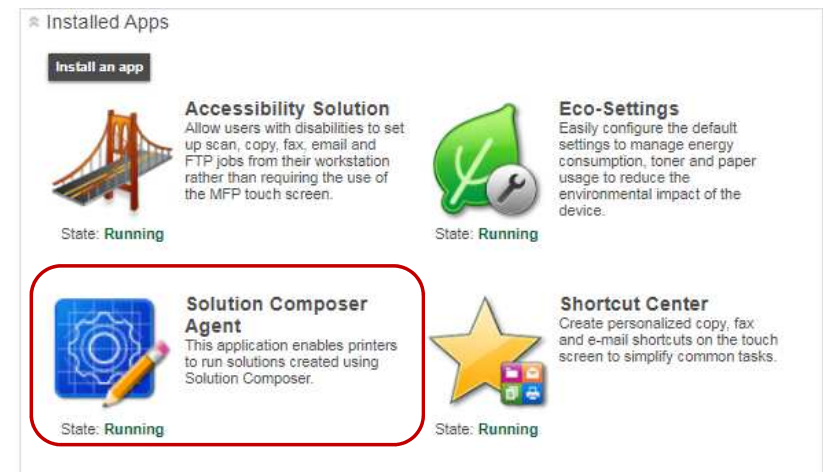

1. Download the Apps and store your PC.
2. Open a web browser, type machine IP address in the address field.
3. Click “Apps”, and “Install an app”.

4. Click “Browse” and select “solnComp_XXXXX.flx”.

5. When installation succeeds, the “Solution Composer Agent” icon automatically appears on the machine web page.
No icon appears on the Advanced Mode.

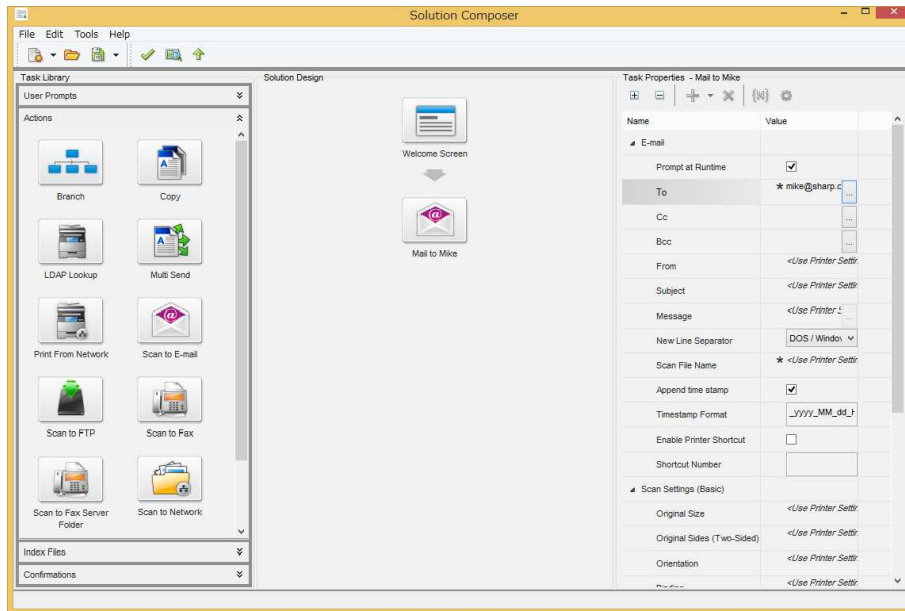

6. Users have to install Solution Composer Designer (SolutionComposer_XXXXX.exe) to create workflow on your PC.

The system requirements:

- a. Windows 10, Windows 8.1, Windows 8, or Windows 7
- b. Java version 1.6 or later
- c. 1GB or more of RAM
- d. 1.8GHz or faster processor

Solution Composer Overview

Simplifies the creation of custom business workflow solutions.
Allows you to build and tailor workflows to meet the unique business needs of your customers. An intuitive 'drag and drop' method makes creating a solution as simple as a shortcut or as complex as a custom workflow easy.

Workflow Setting Screen

Users can create workflow by selecting task from Task Library.

Advanced Mode

Click the red circled icon to start the workflow.
