If Down Syndrome*, are signs and symptoms of Atlantoaxial Dislocation (ADC) present as determined by an x-ray?

_____ Yes; signs of ADC are present _____ No; signs of ADC are not present

Date of last X-ray _____

*If the patient has Down Syndrome, please x-ray for ADC or signs and symptoms thereof. ADC is a dislocation of the joints between two cervical vertebrae, which could result in paralysis. If signs or symptoms of ADC are present, DO NOT refer the patient to Too Far Out Farm LLC for therapeutic riding.

In my opinion, this patient can receive supervised riding instruction.
