

Quality you can count on.

PLUNGER

Engineered to deliver consistent performance even in the most demanding environments, Vulcan's Plunger sets the industry standard for quality and performance. Our plunger is manufactured through a highly controlled and automated process. This enables us to produce a consistent and repeatable coating with proper thickness, adhesion, and minimal porosity.

PATENT PENDING

No other manufacturer can boast this level of production quality control. We go to this extreme to ensure our customers experience the highest-performing plunger **every time.**
