

# SPRING IS FOR SKUNKS!

Warmer weather means more active skunks!  
Protect your pets and your home from these  
furry creatures!

## Patch!

### FOUNDATION FIX!

Skunks are great diggers!  
Use fencing or mesh to close  
off areas and make sure to  
bury them 2 feet down!  
Don't seal up the skunk or  
they could get trapped  
under the house!

## Garbage!

### SEAL IT!

Skunks like garbage but  
aren't good climbers, so  
keeping garbage can  
openings sealed and off the  
ground are great deterrents.

## Pets!

### FEED INSIDE!

Skunks love dog and cat food.  
If you have outdoor pets, feed  
them during the day, and then  
remove any uneaten food  
before evening, when skunks  
are most active. Keep bird  
food sealed in a garage or  
building.
