

Questions to ask to Increase Math Discourse

- How do you choose tasks that engage and challenge all students' thinking in your classroom?
- How do you ensure your students actively listen to one another's ideas?
- How do you decide whether or not to pursue a student's mathematical idea?
- How do you decide when to give more information or let students productively struggle with their ideas?
- How do you help students clarify and justify their ideas?
- How do teacher-to-student conversations in your classroom become student-to-student conversations?
- How do you give more ownership of the learning to students?
