

## SHEET PILING Coffer Dams

**Right:**  
Installation of a Coffer dam to facilitate construction of a roadway over a creek at Coomera.

**Right:**  
Sheet piling was required to hold back up to 3 metres of water during king tides.

SHEET PILING

## SHEET PILING Marine Applications

Sheet piling for retaining structures can be undertaken by either crane mounted equipment from barges on the water, or by excavator-mounted sheet pile drivers on dry land.

**Above:**  
Revetment wall construction at New Farm on the Brisbane River.

**Right:**  
Construction of a Barge Berthing Dock at Toondah Harbour, Cleveland.

SHEET PILING
