ThatchZyme spray contains concentrated water soluble enzymes to aid in the decomposition of organic matter in turfgrass thatch.

APPLICATION RECOMMENDATIONS

ThatchZyme spray can be applied to golf course turf, sports turf, sod, residential lawns, and garden landscaping. Apply only as directed. Mix well before use. After spraying, water into the target thatch zone. Product can be watered in after application or allowed to dry and be watered in later before mowing to avoid product removal. For best results, select application rates and intervals to match a sites desired thatch-management program needs and maintenance goals.
