PURPOSE STATEMENT

TillZyme is a product designed to amplify the decomposition of crop residues (field stubble) after harvest. This product uses a fermentation extract to digest the residue.

APPLICATION RECOMMENDATIONS

Can be used on all cropping systems and crop residuals, applied at a rate of 16–32 oz/acre. This product can be used in tilled and non-tilled applications and in all spray applications. For best results, apply this product to residual material prior to tillage. It is recommended that TillZyme be applied with a minimum of 10 gallons of carrier water per acre.

PRECAUTIONARY STATEMENTS

KEEP OUT OF REACH OF CHILDREN

Based on currently available data, this product is not classified as a GHS hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. Wash contaminated clothing after use. Avoid direct exposure to workers or other persons during product application. Not for human or animal consumption.
