

# EARTH SANCTUARY

## CARBON NEUTRAL CERTIFICATION

### CARBON NEUTRAL SUMMARY REPORT 2025

#### ■ Summary of 2024 Achievements

Earth Sanctuary has proudly maintained its status as a **Climate Active Carbon Neutral certified organisation** for the 2024 calendar year. Independent verification by **Cool Planet** confirms genuine carbon reduction and climate responsibility. Reinforces Earth Sanctuary's role as a **national leader** in sustainable tourism and environmental education. Carbon account demonstrates **measurable progress** against long-term reduction targets.

#### ■ Performance Highlights

Metric	Result
Total Emissions Reduction (since 2022)	30%
Food-related Emissions	62% decrease
Electricity Emissions	11% decrease
Offsets (2024)	133 tonnes CO <sub>2</sub> -e

## ■ Carbon Offsets & Co-Benefits

All offsets were sourced from **Australian Carbon Credit Units (ACCUs)**, ensuring integrity and local benefits. **Carbon Conscious Carbon Capture Project** – Establishing permanent mallee eucalypt plantings on former farmland, delivering carbon sequestration, erosion control, and landscape restoration. **Biodiverse Carbon Conservation Project** – Planting diverse native species to restore degraded land, enhance habitat corridors, and strengthen biodiversity. Together, these projects align with Earth Sanctuary's mission of **regeneration, stewardship, and education**.

## ■ Global & National Leadership

Earth Sanctuary is ranked among Australia's **top 0.5% of organisations** demonstrating excellence in carbon stewardship. Aligned with **Paris Agreement commitments** – 43% emissions reduction by 2030 and net zero by 2050. Beyond operations, Earth Sanctuary invests in **education and training** to equip staff, students, and visitors with tools to measure and reduce carbon footprints. Positioned as a **benchmark in global eco-tourism and climate action**.
