About Orange Grove Center and the John F. Germ Recycling Center

Orange Grove Center was established in 1953 by parents of children with intellectual disabilities to provide educational opportunities and needed supports across the lifespan. The center offers a full array of services, including education, vocational opportunities, residential options, therapy and health care services, recreation, counseling and a robust research portfolio with university affiliations.

The John F. Germ Recycling Center is a materials recovery facility at Orange Grove that was founded in 1988. It provides employment for numerous individuals served by Orange Grove. Through a partnership with the City of Chattanooga, it offers the convenience of recycling drop-off locations and curbside pick-up for local residents and businesses.
