Did You Know

The FJ Stallo Library has
Stories at the Gazebo
every Tuesday at
10:15 am in
July.

Mosquito Control

Most people know that female mosquitoes lay their eggs in standing water; but did you know that each female can lay up to 400 eggs? Everyone can help control mosquitos! Residents are reminded to take the following precautions regarding mosquitos:

- Empty standing water from flowerpots, buckets, barrels, tarps/covers and wheel barrows on a regular basis.
- Discard trash such as tin cans, plastic containers and other water-holding containers that have accumulated on your property.
- Dispose of discarded tires properly. Drill holes in tire swings so water drains out.
- Change the water in pet dishes frequently.
- Replace the water in bird baths weekly.
- Check and clean clogged roof gutters at least twice annually so they will drain properly.
- Keeping grass and weeds cut short eliminates hiding places for adult mosquitos.
- Keep children's wading pools empty and, on their sides, when they aren't being used.
- Minimize time spent outdoors between dusk to dawn when mosquitos are the most active.
- When outside during dusk and dawn, wear loose-fitting, light-colored clothing that includes long pants, long sleeved shirts, socks and shoes.
- Apply insect repellents containing DEET, Picaridin or oil of lemon eucalyptus to exposed skin and clothing.
- Make sure doors and windows have tight fitting screens to keep mosquitoes out of your home.

A graphic designed to look like a postage stamp with a blue background and a red octagonal stop sign on the left. The stop sign has the word "STOP" in white. To the right of the sign, the text "Do You Know the Risk of Paying by Check?" is written in white. Below the stamp, the text "Mail theft is on the rise." is written in blue, followed by "Keep your payment secure and use our easy-to-navigate, online portal." in black.
