

The Village of Minster participates with the Animal Rescue Foundation and other funding partners to help control the feral cat population in Minster by supporting and funding the TNR (Trap, Neuter, Release) program for feral (undomesticated) felines in the community of Minster.

If you have a feral cat in your neighborhood, and you would like to help control the cat population, please consider participating in the TNR Program. Residents can either use their own trap or borrow one from Mile Creek Animal Hospital to trap the cat. Before attempting to trap the cat, please contact Mile Creek Animal Hospital in Minster to schedule surgery.

Residents can then bring the cat to Mile Creek Animal Hospital where they will perform surgery on the cat. After surgery, the resident should pick the cat up from Mile Creek Animal Hospital and the cat should be returned to the neighborhood they were trapped in. This will keep other feral cats out of the area.

If you have questions, please contact the Animal Rescue Foundation (ARF) at arfwestcentralohio@gmail.com or contact the Village of Minster.

We can control the feral cat population by taking responsibility and working together!
