

2 Health and safety procedures

2.10 Entrances and approach to Manor Farm Pre School building

- Entrances and approaches are kept tidy and always uncluttered.
- In public or shared buildings, staff ensure that members of the public cannot access areas used by children during sessions.
- All gates and external fences are childproof and safe.
- Main doors are always kept locked and shut.
- The identity of a person not known to members of staff is checked before they enter the building, or at the point they seek access to the area where children are being cared for.
- All staff and visitors to the setting sign in and out of the building.
- A member of staff is available to open and close the door and to greet arrivals, say goodbye to parents/carers and to make sure that doors and gates are shut.
- The door that provides access to the adjoining building (Infant School) is locked at all times and is accessed solely via a code.
- Where building works or repairs mean that normal entrances/exits or approaches to the building are not in use, a risk assessment is conducted to maintain safety and security whilst the changes are in place.
- Building works or other changes to the premises which may affect the space available to children and the quality of childcare available to them, must be notified to Ofsted.
