SIGNS YOUR ROOF IS AGING...

When you notice any of these 4 signs, your shingles are drying out, losing natural oils, and becoming brittle.

- **Granule Loss** – You'll see this in your gutters; it's a sign your shingles are drying out and losing protection.
- **Cracking & Brittleness** – This leads to leaks and wind damage, and more granule loss.
- **Curling or Lifting Shingles** – Can allow water intrusion and shorten lifespan.
- **Exposed Fiberglass** – An early sign of material degradation.

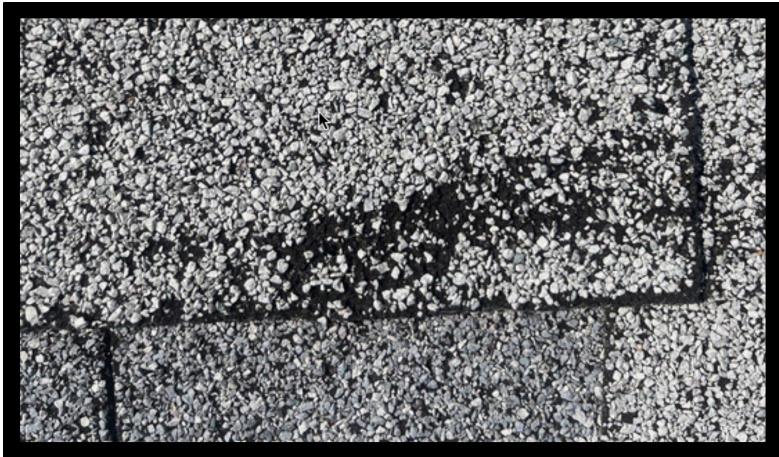

Examples...

Loss of Flexibility & Strength

Granular Surface Loss

Cracking or Splitting

Granules in the Gutters

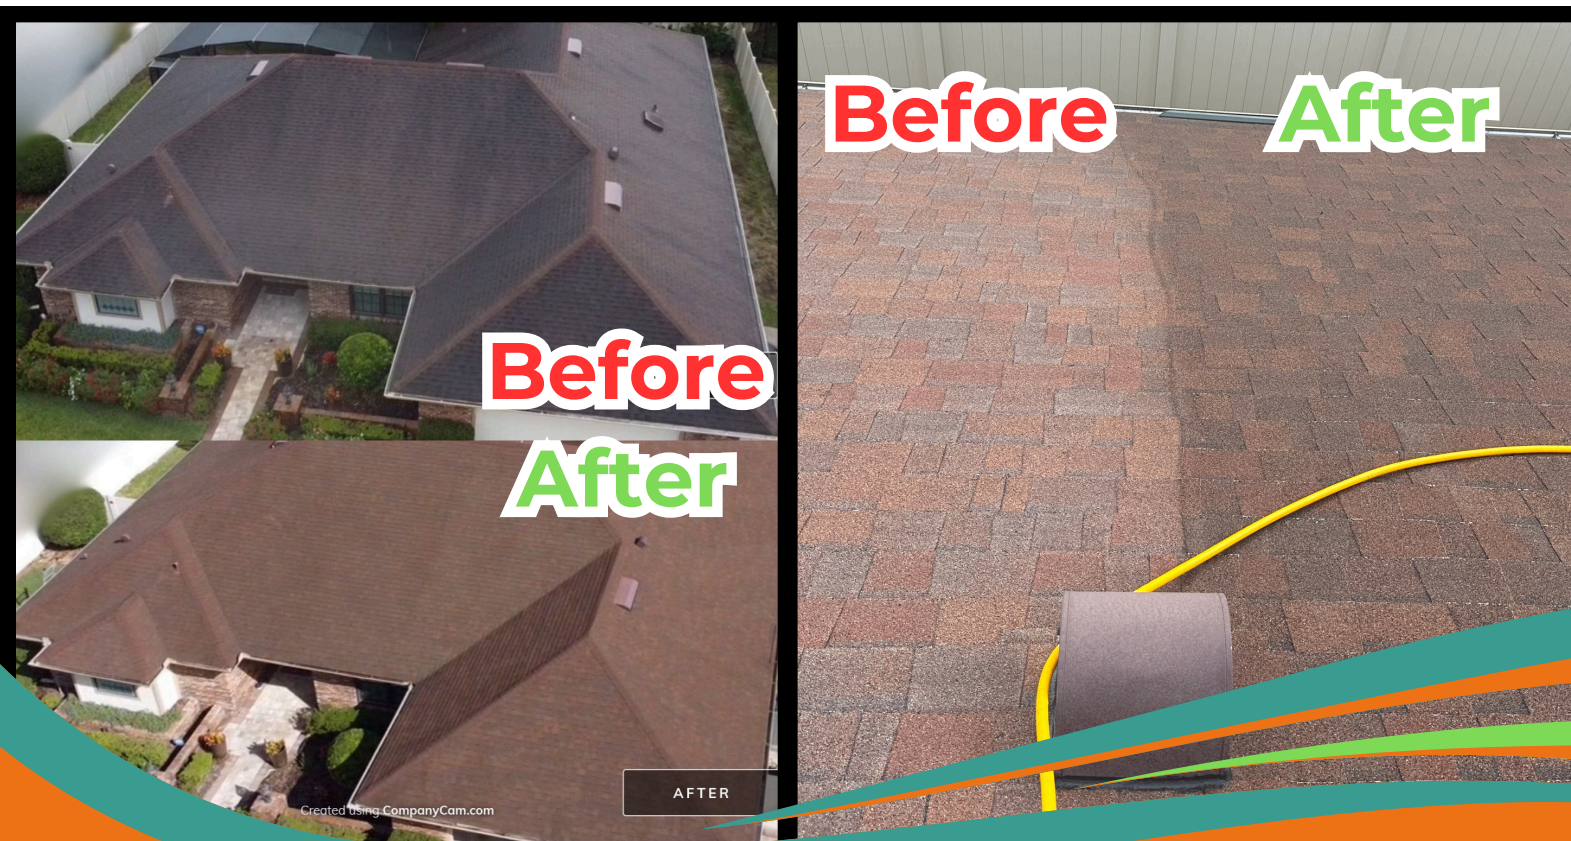

Exposed Fiberglass

THE SOLUTION...

Avoid replacing and add the oils back into your roof! The best part? Every treatment comes with a 5-year guarantee!

- ✓ **Restores Flexibility** – Replenishes lost oils to keep shingles strong.
- ✓ **Seals & Strengthens** – Prevents cracking, lifting, and water damage.
- ✓ **Reduces Granule Loss** – Protects your roof's coating for years.
- ✓ **Enhances Curb Appeal** – Restores color for a like-new look.
- ✓ **5-Year Guarantee** – Proven to extend your roof's life.

Robert is a very honest person. Did a great job on my roof and made it look brand new. Didn't need to replace it when that's what all the adjusters thought. Saved me a lot of money.

Love this company and the owner. I highly recommend them for anyone wanting to save the life expectancy on their roof!

LAB TESTED & FIELD PROVEN

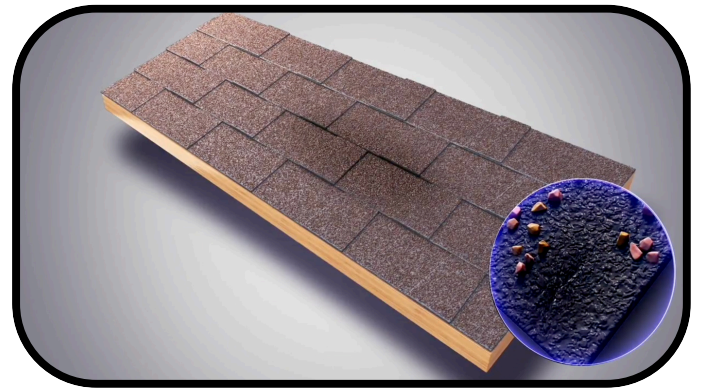

Increased Granular Adhesion

Bright Green Roof Preserves the life of shingles by replenishing oils that are lost over time. This increases shingle flexibility and helps keep the granules in place!

Replacing Lost Oils

Natural agricultural oils have been used for the past 30 years to replenish the oils in asphalt roads to replenish the oils that have been lost over years of aging. It works the same for asphalt shingles

Like NEW Look!

After just ONE application, your roof will look like new. Bright Green Roof Preservation Oil gets absorbed into the shingles, instantly restoring the color to its natural appearance

Success Story

Margaret and John were preparing to sell Margaret's late mother's home in New Smyrna Beach when an unexpected obstacle came up: the roof failed inspection. Naturally, they assumed a full roof replacement was the only option.

After meeting with several contractors, they received quotes ranging from \$25,000 to \$32,000. Trying to minimize their expenses before listing the home, they accepted the lowest bid and signed a \$25,000 contract for a full replacement.

Shortly after signing, John came across information about shingle rejuvenation and decided to explore the alternative. He scheduled a free inspection and sample treatment through Bright Green Roof Central Florida.

After seeing the rejuvenation in action and reviewing the technician's recommendations, they made a bold decision: they paid the roofing company \$1,500 to cancel the replacement contract, and instead spent \$3,500 for a full rejuvenation treatment—a total investment of \$5,000.

The result?

- ✓ The roof passed inspection.
- ✓ The home sold.
- ✓ They saved \$20,000.

The rejuvenation restored flexibility to the aging shingles, improved the roof's appearance, and extended its life without the cost or disruption of a full replacement.

Margaret and John were relieved—not only did they avoid an expensive and unnecessary project, but they also walked away from the sale with more in their pocket.

About Rejuvenation

Maintain it, don't replace it!

Your asphalt shingle roof naturally loses essential oils as it ages, becoming brittle and vulnerable to damage.

Our innovative roof rejuvenation treatment restores these vital oils using a non-toxic, plant-based formula that penetrates deep into your shingles, effectively adding up to 15 years to your roof's lifespan without replacement. Rejuvenation saves you thousands of dollars while eliminating the mess, noise, and disruption that comes with traditional roofing projects. The entire process is completed in just one day for most homes, allowing you to protect your investment without inconvenience.

By choosing rejuvenation over replacement, you're not only saving money but also making an environmentally responsible choice. This sustainable approach keeps your existing shingles out of landfills while reducing the demand for new materials, helping you maintain your home's protection and contribute to a greener future.

FAQ

How long does it last?

Each treatment extends your roof's life by at least 5 years, and it can be reapplied every 5 years for continued protection.

Is it safe for my plants and pets?

Yes. Bright Green Roof Preservation Oil is ECO-Friendly and 100% safe for people.

What are the weather requirements?

Temperature: It must be above 40 degrees for application.

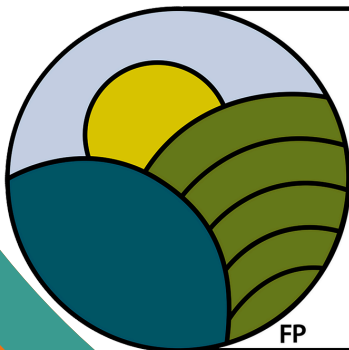

Rain: Quickly penetrates the shingle's top layer and begins soaking in typically 1 hour. There is no need for concern about it being washed away by the rain once it has been absorbed by the shingles.

How do I know my roof qualifies?

If your roof is 5-20 years old and shows signs of aging (granule loss, minor cracking, or drying out), it's likely a great candidate. We provide a free inspection to confirm.

Has this product been tested?

Yes! It's scientifically tested and proven to restore flexibility, reduce granule loss, and improve durability. Thousands of homeowners have used it to avoid early roof replacement.

5- Year Roof Health Guarantee

Transferrable Product Warranty

Having your roof preserved with Bright Green Roof instantly restores lost oils in your shingles, making them pliable, increasing flexibility, and enhancing their color to a like-new condition. This process helps reduce cracking, edge curling, and premature aging.

All rejuvenation treatments come with a 5-Year Transferable Warranty. This means the asphalt shingles will remain soft and flexible for at least five years following the treatment, helping them expand and contract with seasonal changes and weather elements.

If the treated shingles begin to curl or show signs of lost flexibility during the warranty period, simply contact your local Bright Green Roof dealer. The roof will be re-treated free of charge to restore performance and protection.

Important Notes:

- The warranty applies only to asphalt shingle roofs that meet Bright Green Roof's inspection criteria prior to treatment.
- This warranty covers the performance of the rejuvenation product, not the original roofing materials or general workmanship.
- The warranty does not cover leaks, damage caused by hail, improper attic ventilation, or roofs already exhibiting advanced deterioration or curling at the time of treatment.
- This warranty is transferable to a new homeowner for the remainder of the 5-year term.

Bright Green Roof is committed to helping homeowners extend the life of their roof, reduce waste, and avoid premature replacements—backed by a warranty that puts peace of mind first.
