## Dr. Bojan Vučinić - Biography

Bojan Vučinić (he/him) began his professional life in Croatia by graduating from the University of Rijeka in 1986, and then moved to Turboinstitut, Ljubljana, Slovenia to work on CFD modeling of water pumps and turbines.

In 1988 he joined Nedlloyd Lines, a container ship operator to manage the maintenance of its fleet in the Netherlands. For this work, also sponsored by the Royal Dutch Navy, he was awarded a PhD in Risk and Ship Management at Delft University of Technology in 1994.

In 1995, he moved to France and Bureau Veritas as Head of VeriSTAR Machinery, where he successfully developed the product portfolio. After making a great impact on the French company, he joined the SpecTec Group Holdings as Director of Applied Technology, in 2006. During his two years there, he made significant contributions to identifying problems and developing reliable solutions, formulated innovative new techniques, and helped improve staff skills to meet and exceed company goals.

Bojan Vučinić, in 2008, was appointed the Managing Director of Ma-CAD, Paris. For three years, he worked with the maritime community supervising activities such as development and administration of all aspects of Risk-based maintenance optimization.

Afterwards, he moved for 10 years to Monaco where he was the Reliability Manager of SBM Offshore. Among other victories, he managed to use scientific tools to optimize production efficiency by managing and streamlining Risk governance.

His professional experience is still growing today as he became President of MA-CAD in March 2021, based in Menton, France.

A regular speaker at international conferences, he has published several articles.

Bojan's mother tongue is Croatian; he is fluent in English and French and can communicate in Italian and Dutch.
