Welcome to Hafren

Specialists in security and tamper-resistant screws, nuts and bolts.

As a leading global supplier of security fasteners and fixings, Hafren Fasteners are committed to servicing the requirements of the tamper-resistant fastener market. This represents customers who rightly expect the very best in terms of quality, design, technology, service and individuality.

Founded in 1995
with one mission which
still remains today...

*stamping out
the impact of
theft globally*

Why security fasteners?

Security - The need to safeguard against theft and vandalism is increasingly an essential part of many design specifications.

Safety - Deal with stringent Health & Safety laws, keep the public and workplaces safe.

Aesthetics - Security fasteners are not only secure and vandal-resistant, but aesthetically pleasing to the eye complementing their surrounding environment.

Team Orange Service

Whatever you need to know about security fasteners, there's nobody better to turn to than Hafren. Unrivalled **experience** built up over many years has given us the **knowledge, understanding** and **expertise** to help. Quality **patented** products with technical sales and marketing back-up are high on our list of priorities. Our extensive stock holding and competitive pricing combine to give you outstanding customer service.

Security Ratings Explained

All Hafren security fasteners are rated on the security fastener rating system. From 1 to 5, where 1 offers the lowest level of protection and security and 5 gives the maximum protection available.

- SECURITY +

1

ENTRY LEVEL SECURITY

Fasteners offer protection from vandalism and opportunistic crime. Drivers tools can be purchased by the general public.

2

ENHANCED SECURITY

Fasteners are less common and less recognisable. Driver tooling is non-standard and harder for the general public to buy, enhancing the security of the assembly.

3

MEDIUM SECURITY

Rarer (less well-known) products. Supply of driver tooling is controlled, less readily available to buy, enhancing the security of the assembly.

4

HIGH SECURITY

Either 1-way permanent fixings, or rare Hafren patented high security products requiring specialist tooling to remove (only available from Hafren approved distributors).

5

MAXIMUM SECURITY

Highest security available. Products are either 1-way permanent fixings, or require bespoke exclusive, custom made driver tools to remove.

Specifying & ordering

Here is some useful information to assist you in specifying and ordering the correct 'Hafren' security fasteners.

Does it need to be removable?

(With a special matching removal tool)

If yes, look for the 2 logo

If no, look for the 1 logo

What length?

Depending on the head shape of a screw, the length measurement is taken from a different point.

Button/Pan

(From underside of the head)

Countersunk

(From top of the head)

Raised Countersunk

(From top of Countersunk part)

Metric & Imperial

Self Tapping Screws, Woodscrews and Self Drilling Screws are stocked as Imperial sizes but are often referred to in metric equivalents.

Length		
Imperial	Metric	HAFREN code
3/8"	9.5mm	C
1/2"	13mm	D
5/8"	16mm	E
3/4"	19mm	F
1"	25mm	G
1 1/4"	32mm	H
1 1/2"	38mm	I
1 3/4"	44mm	IA
2"	50mm	J
2 1/2"	63mm	K
3"	75mm	L
4"	100mm	N
4 1/2"	113mm	ND

Gauge	
Imperial	Metric
4	2.9
6	3.5
8	4.2
10	4.8
12	5.5
14	6.3

Head style?

It is important to know the head style you need as well as the security drive.

2-Hole

Popular aesthetically pleasing drive for any two-way application.

2-Hole security screws (sometimes known as Snake Eye® or Pig Nose) are designed for low to medium torque applications. They have two holes drilled into the head which require a unique 2-pin driver to install and remove. With an aesthetically pleasing head design, they are often specified by architects and designers. Available from stock in AB type self tapping screws and metric machine screws as shown below.

Manufactured in A2 stainless steel.

6-Lobe Pin

6-Lobe recess manufactured with an internal pin.

6-Lobe Pin security screws are sometimes known as Resistorx, Pin Torx or Stardrive Pin. Popular security drive for high torque applications. Quickly and easily installed and removed using matching tooling.

Manufactured in A2 stainless steel.

Part Code: SMH

Self Drilling Screws manufactured with a 6-Lobe Pin drive.

Drilling tips provide fast and easy application eliminating the need to pre-drill. Installed and removed using 6-Lobe Pin tooling.

Manufactured in case hardened Delta Protekt® plated steel.

MATERIAL AND COATING SPECIFICATION

Material Specification		
Raw Material	Core Hardness	Case Hardness
Steel C1022	320-420 HV	560-670 HV

Our Delta Protekt® coating consists of base layers of Delta Protekt® KL100 with a top coat of Delta Protekt® VH302.

KL100 is an inorganic microlayer using zinc and aluminium flakes as well as special organic compounds providing a metallicly bright silver coating with a high corrosion protection.

The VH302 topcoat is a water based seal of inorganic, silicate and titanium. It provides a barrier protection against chemicals like acids, cleaners, petrol etc and delays the onset of rust. It also includes an integral lubricant to help with reducing application friction when installing.

Neither layers contain heavy metals such as cadmium, chromium or lead etc. and complies with the requirements of the ELV and RoHS directives.

Salt Spray (hrs)		
Composition	White Rust	Red Rust
KL100 8-12µ / VH302 1-3µ	240	840

Barrel Nut

Ensures maximum security when clamping two materials together.

These Barrel Nuts (also known as Interscrews) are internally threaded parts that are ideal for clamping two pieces of material together when used with machine screws. Ideal for: playground equipment, ironmongery and signage to name but a few.

Manufactured in A2 stainless steel.

A4 - 70 STAINLESS STEEL OVERVIEW

The designation A4-70 derives from “A” meaning the material is a cold worked austenitic stainless, The “70” denotes the minimum tensile strength to be met by the finished part.

Therefore, A4-70 is an austenitic, acid proof stainless grade (usually 316 material – 316 or 316L) which has been cold worked to provide a minimum tensile strength of 700N/mm² (MPa).

Grade 316 is the standard molybdenum-bearing grade. The molybdenum gives 316 better overall corrosion resistant properties and has resistance to pitting and crevice corrosion in a range of atmospheric environments and chloride and other corrosive media.

With it's excellent corrosion resistance, A4 Stainless is perfect for both internal and external applications, especially marine environments, the food industry and medical/health equipment.

NEW

System Zero®

System Zero® is a tamper resistant range of screws with an external drive, available in steel zinc plated and stainless steel.

The unique head design requires a dedicated driver tool for installation and authorised removal. In combination with the driver tool the head design gives high torque transmission, which in turn generates high clamp loads. Specified by designers and engineers due to its unique blend of features and benefits.

MATERIAL AND COATING SPECIFICATION

Zinc is an electrodeposited lightweight plating that gives a sacrificial protection to underlying substrates (carbon steel). This method lays a thin layer of zinc over the surface meaning the zinc plating would corrode in preference to the substrate and therefore protecting the covered steel product.

- Mr B of Liverpool secured his second thatched roof bird box to his tree using Sentinel® Woodscrews as he had his first one stolen

Installed using
standard pozi
drivers and bits

Installation video

Thread forming screws manufactured with a 'unique' 6-Lobe Pin drive. Thread forming screws are sometimes known as 'Self threading'. They feature a tri-lobular threaded body that has a triangular cross-section rather than a circular one. The tri-lobular thread eliminates the need for nuts and pre-tapped holes, reducing labour costs and installation time.

Manufactured in case hardened Geomet® 500B coated steel.

Very popular in the fencing industry.

WHAT IS A THREAD FORMING SCREW?

Thread forming screws have the same basic thread pitch as a standard machine screws, with harder threads and different point geometry to create their own threads into an untapped hole. This eliminates the need tapped holes, nuts or locking features. One of the big benefits is the self-locking effect... because they form their own threads, there are no gaps between male and female threads.

Thread forming tri-lobe design

Widely used vandal deterrent fixing.
This quick and easy to install security fastener is a favourite for applications in recess or channel due to its tall head design.
Manufactured in A2 stainless steel.
Commonly used in street lighting.

This security drive ensures that each and every customer has their own unique 'one-of-a-kind' drive socket.

As there are millions of variations to the Solok™ drive socket, your driver key will be specific to you, therefore enhancing the level of security. Every new user gets a Solok™ code to which their screws and tools are made, meaning even somebody else's Solok™ tools will not fit screws made to your code.

Geomet® 500 is formulated with an aqueous base and is composed of Zinc and Aluminium flakes in an inorganic binder. It is chromium free.
It gives protection to metallic surfaces with: barrier protection, galvanic action and passivation. Geomet® 500 was developed specifically with integral lubricant for coating fasteners, to assist in giving consistent tightening performance.

DID YOU KNOW ...

- The Hafren logo is derived from the unique shaped segments of the Kinmar® Removable Nut

Armour Ring™

A simple conical collar which renders a standard hexagon nut or bolt tamper resistant.

The Armour Ring™ can be applied to any British or DIN standard hexagon nuts or bolts using a standard hammer or Armour Ring™ installation tool. It leaves a smooth clean finish which is often favoured by Health & Safety executives and isn't governed by a torque level like some one-way fasteners.

Manufactured in stainless steel and hardended steel zinc

DID YOU KNOW . . .

- Armour Ring™ is the most cost effective way of securing an existing fastener
- Armour Ring™ is specified by Health and Safety Executives because it leaves a smooth finish and covers any sharp edges on a bolt head
- Has been Home Office approved

INSTALLATION GUIDE

1. Place Armour Ring™ over existing hexagon nut/bolt

2. Hammer down to secure.

perfect for securing existing applications (no need to remove and replace fasteners)

Installation video

Shear Nuts

The Shear System is a high security permanent fastener.

The Shear Nut has a hexagon part which shears off at a predetermined torque. Installed using standard hex socket or spanner. Once installed, the Shear Nut leaves a tamper resistant cone.

Manufactured in a range of stainless steels and galvanised / zinc coated steels.

Hot dip galvanizing is the process of coating iron or steel with a layer of zinc by immersing the metal in a bath of molten zinc. During the process, a metallurgically bonded coating is formed which protects the steel from harsh environments, whether they be external or internal.

DID YOU KNOW . . .

“A leading supermarket chain was having problems with skateboarders stealing the shopping trolley wheel bearings. Being top quality bearings that fit most skateboard wheels these proved rather popular with the youths in town. 4 Shear Bolts later - no further thefts.”

1. Insert Shear Bolt into application

2. Tighten using standard socket or spanner

3. Hex part shears off at set torque level to leave a smooth permanent finish

Installation video

High security removable nut with a unique 'Scroll' drive.

The rounded design of this nut gives reduced sharp angles to provide grip for normal hand tools. It can only be installed and removed using the matching Scroll™ driver socket. Patented Scroll™ design is interesting and pleasing to the eye.

Manufactured in 303 Stainless Steel

Anchors

Expanding fixings giving fast and easy application for heavy duty security.

Security Anchors save time and money when fixing applications that require a firm hold. They are suitable for fixing to a wide range of base materials such as: brick, concrete, stone and masonry. Available in both permanent and removable options... for a hold that stays.

Manufactured in A2 stainless steel and zinc coated steel.

HOW TO INSTALL SLEEVE ANCHORS (BOTH TYPES)

A. Pre-drill base material

B. Take fixture and place over hole

C. Position fixture, tighten bolt into shield

D. Secure removable fixing

Tighten the Anchor to expand the sleeve within the hole, locking the anchor into the base material of concrete, brick, or block materials.

IDEAL FOR . . .

Saving valuable time and money when fixing to concrete, brickwork and masonry such as:

- Smoking Shelters
- Bike Racks
- Signage
- Street Furniture
- Barrier System

Bespoke Specials

We are able to offer a bespoke made to measure range of security fasteners. With all types of specials, minimum order quantities and varying lead times apply depending on your size and material requirements. We have listed some available thread types, materials and finishes, but you may be looking for something totally different and unique. If so, send us your drawings and samples and we'll get you a quote.

Bespoke Specials

Whether you want an additional process to existing stock items or fasteners to your drawing... we've got the solution for you.

1. Common Thread Types

- Self Tapping Screws
 - AB Type, B Type etc...
- Machine Screws
 - Metric, Imperial, British Standard etc...
- Woodscrews
 - Twinthread, Hi-Lo Thread etc...
- Self Drilling Screws
- Thread Forming Screws
 - Tri-lobular, Plastic Forming etc...
- Concrete Screws
- Dog-Point Screws
- Grub/Socket Screws

2. Common Materials

- A2/A4 Stainless Steels
- Carbon Steel
- Aluminium
- Brass
- Titanium

3. Common Platings/Coatings/Finishes

- Polished / Brushed etc...
- Chrome / Copper / Brass / Nickel etc...
- Geomet® / Delta Protekt® etc...
- Painted Heads (we'll match any RAL code)
- Thread Patching / Thread Locking
 - Nylon, micro-encapsulation etc...
- Thread Lubrication

4. You Design it... we make it

Send Team Orange your specifications and drawings.

Lead times / Minimum order quantities will vary

*get inspired by previous bespoke
Hafren made products*

bespoke head shapes...

Is there a lead time for bespoke security fasteners?

Bespoke fasteners are manufactured to your specifications and have varying lead times from days to months depending on your requirements.

wide choices of material...

What is the MOQ for bespoke fasteners?

The MOQ varies between different ranges and depends on your requirements. All specifications and product MOQ's vary.

what thread style will you choose?

interscrews, barrel nuts, female screws... yes, we can offer this

how large is large?

Can't find what you're looking for or require?

Virtually anything can be produced, send in your specifications and drawings for a custom quotation.

14				4.80	5.20	5.40		5.70	5.90	6.00	6.00

CONSIDER THE FOLLOWING POINTS WHEN SPECIFYING AND USING SECURITY FASTENERS

■ Placing fasteners in tight corners makes access for impulse tampering more difficult.

■ Mixing of driver types makes it harder for intrusion

■ Placing fasteners in a recess further increases the level of security.

CAN'T FIND THE SIZE OF SECURITY FASTENERS YOU NEED?

1. Use a length of studding with security nuts. (As shown with Kinmar® Removable Nuts)

2. Use a standard Hex head fastener with (a) Armour Ring™ or (b) Nogo™
