Turn-key-solutions: Automation technology for industrial manufacturing by Atlas Copco

Choose from our three distinct levels to reach the best fit for your production and strategy. As a one-stop-shop provider, we supply automated solutions, own all integrated technologies and also implement customized requirements.

Standard Products

Screw feeding
(manual or integrated
tightening modules)

Separating systems
(step feeders)

Multiple spindles

PowerHeads
(end-of-arm-tools)

Automatic socket
changer

Tool holder for cobots

Configurable Products

Automation control
platform

Integrated
camera technology

Pitch adjustment

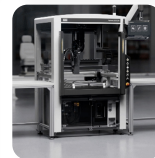

Application-specific
feeding technology

Turnkey Solutions*

Automated assembly
cells (robot cells) for
continuous production

Assembly cells
(with robot, cobot
or cartesian system,
inline or standalone)

Automated
wheel assembly

PowerHeads
(end-of-arm-tools)

Cobot implementation

(* with full process responsibility by Atlas Copco
