

Smart Integrated Assembly

The road to the Smart Factory

Find a partner for your journey toward the Smart Factory and more sustainable production. Our comprehensive offering and expertise are tailored to your needs to help you achieve:

Increased uptime

Reduced defects

New product introduction

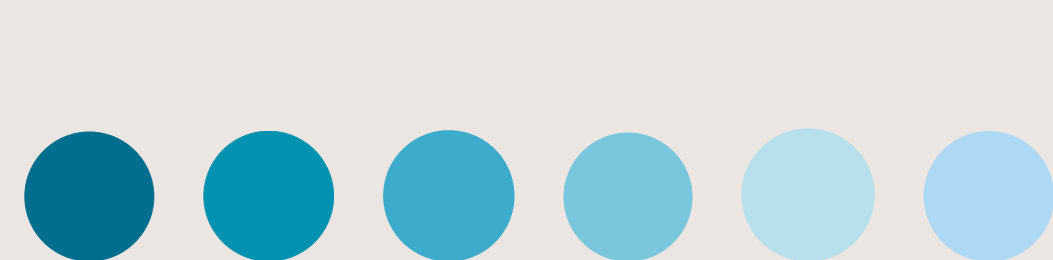

Improved productivity

Human interaction

Reduced energy use

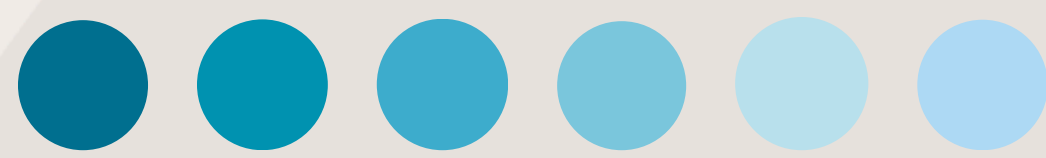

Factory Integrated

Drive hyper-flexible manufacturing through automated processes and integrated data across the production cycle, on a global level.

Line Connected

Make data-driven decisions in your production by increasing visibility and traceability through connected stations.

Station Controlled

Ensure an operator-friendly station that is controlled, monitored, and error-proofed.

Station Automated

Automation allows for the greatest level of assembly line control, increasing efficiency and cutting costs.

Joint Fastened

Get the tightening right the first time. Ensure increased quality and flexibility by implementing smart electric tools and controllers.
