OLDE TOWNE FAMILY CHIROPRACTIC

Patient Authorization regarding chiropractic care provided in an "education driven" environment

It is the practice of this office to provide chiropractic care in an "education driven" environment. Education driven adjusting involves a learning environment for a community of patients being cared for in a common adjusting room. Patients are within sight and hearing range of one another thus profoundly deepening the competency of how your ability to learn can enhance your recovery. A private or confidential setting is always available and accessible should such a less recovery centered and more exam or history driven exchange be necessary.

We provide the ability to protect you from "incidental disclosures" of health information by reminding you that if you wish to speak on private matters we may request a separate though less educationally productive and beneficial setting. Research has proven that the leading cause of death in the world is poorly made decisions. For this reason, even though it is more demanding upon the doctors and staff, we uphold the disciplines to function in this educationally driven setting so you can hear and learn from more exchanges and examples of ideal health care. In many instances, it is evident that doctors need to educate people may quite possibly be more important than caring for them if we are truly dedicated to making sustainable advances in healthcare.

Please grow your deliberateness at keeping your ears and eyes open and engaged with what every doctor and patient is asking and responding to. These actions will help you get well faster, stay well longer, stop perpetuating previous habits which may have been counterproductive to true health care and more.

Your signature indicates your understanding of this more deliberate and advanced approach to your appointments.
