

Facilities Volunteer Needs

Structural Improvements Team

Positions Needed: 5+ (as needed)

You are likely aware of all the major construction going on for our church right now. However, we have smaller projects come up regularly, and this is often more than our staff is able to support. This team would provide mild construction work for smaller-scale church projects and events, and assist with repairs to church property, mission projects, and congregational needs.

Structural Improvements Team Lead

Positions Needed: 1+ (as needed)

Tasked with leading structural improvements projects and managing the team to see the job is done in a God glorifying way, with excellence.

Vehicle Maintenance Facilitators

Positions Needed: 2

Facilitate the maintenance of our fleet and trailers. You do not need to have ability to perform maintenance – just a willingness to take them to get done.

Event Setup/Teardown

Positions Needed: 5+

We have a lot of events and meetings here at the church and not a lot of space. This requires that spaces often have to be “flipped” quickly, or late at night in order to be prepared for the next round of ministry. As the saying goes, “Many hands make light work.” If you’d like to help save several hours of work for one person, while also taking part in facilitating ministry, this would be a great opportunity for you!
