Environment

Kyoto Protocols (1997) and Paris Agreement (2015):

International accords specifying global CO2 emissions goals.

Voluntary markets:

Where companies and individuals go to trade carbon offset credits to support corporate or individual ESG commitments.

The increased attention on Greenhouse Gas (GHG) emissions has spurred companies to voluntarily reduce their GHG footprints:

→ Organizations have set Environmental, Social, and Governance (ESG) objectives to mitigate their impact on social and environmental sustainability.

→ These entities turn to voluntary markets, seeking carbon offset credits.

→ In many cases, carbon offset credits can also be used to satisfy regulatory requirements:

◆ The California Carbon Market allows the application of credits towards yearly compliance obligations.

→ As an added bonus, carbon offset credits enhance corporate goodwill by addressing the public's concern over GHG's.

CHALLENGES

Carbon Offset Credits Market

No centralized platform for the creation of carbon offset credits

No efficient, secure digital market for trading carbon offset credits

Companies using voluntary offsets to meet internal compliance goals need a marketplace to find carbon offsets

Entities issuing carbon offset credits via tree planting, carbon removal projects, etc. need a marketplace to trade their offsets

Individuals looking to reduce their carbon footprint need a secure way to purchase offsets

SOLUTION

The CarterBrothers Sustainability™ Carbon Offset Credits Marketplace

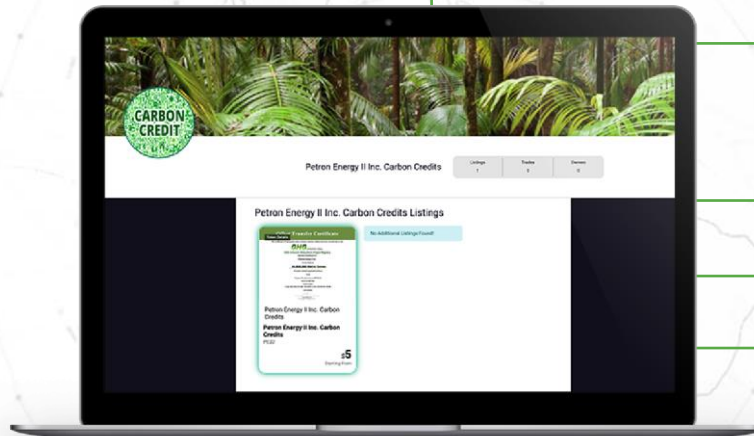

Our Mission
To provide a secure and
transparent way to trade
carbon credits.

Carbon Neutrality

Social Benefits

Element of trust found nowhere else: direct
connection to Carbon Credit Registries insures
credits are immutable

Streamlined connection provides automated
purchasing process for efficiency &
transparency

Authentic sources of carbon offset credits

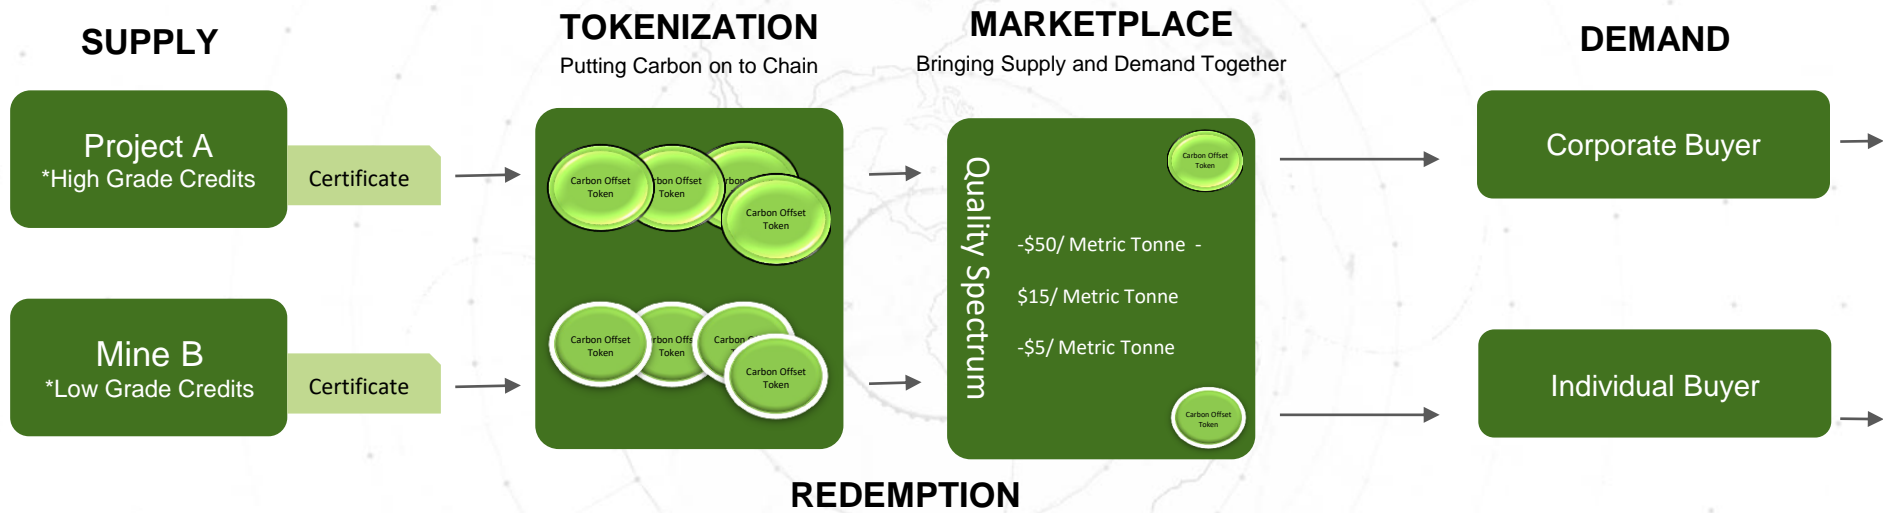

Ethical suppliers of credits

Buyers retain ownership and can
exercise retirement rights or trade at
any time

Straightforward method for meeting
corporate or individual GHG emission goals

Secure Credits: complete
confidence of ownership

Project Overview

REDEMPTION

- A.** Permanently identifying those credits that have been "Retired" that will clearly identify the related carbon signature (property or item) they are Offsetting.
 - B.** Should someone want to buy the credits out of the token base and hold them for future sale or retirement they will have the ability to do so and that will be noted on the NFT.
- Example** Token equals 1 Metric Tonne of Carbon Dioxide Equivalent (tCO₂e). By owning these tokens, you can retire them to reduce your carbon footprint while supporting ecological sustainability in "project location". These tokens can be held held until retirement.

Marketing Opportunity

The Global Carbon Credit market was valued at USD **760.28 Billion** in 2021 and is expected to grow at a CAGR of **21.14%** during the forecast period of 2023-2028 (Yahoo Finance)

<https://www.yahoo.com/now/global-carbon-credit-market-analysis-154000110.html#:~:text=The%20Global%20Carbon%20Credit%20market,forecast%20period%20of%202023%2D2028.>

With current prices below **\$10**, Carbon offset prices could reach as high as **\$224** per ton of carbon dioxide by 2030 <https://www.statista.com/statistics/1284060/forecast-carbon-offset-prices-by-scenario/#:~:text=Carbon%20offset%20prices%20could%20reach,credits%2C%20from%20removed%20emissions%20only.>

Why I Redeem

When credits are bought a digital asset will be generated to either:

A. Permanently identifying those credits that have been "Retired" that will clearly identify the related carbon signature (property or item) they are Offsetting.

B. Should someone want to buy the credits out of the token base and hold them for future sale or retirement they will have the ability to do so and that will be noted on the NFT.

Example Token equals 1 Metric Tonne of Carbon Dioxide Equivalent (tCO₂e). By owning these tokens, you can retire them to reduce your carbon footprint while supporting ecological sustainability in "project location". These tokens can be held held until retirement.

Supported Blockchains

By leveraging data, optimizing performance and constantly improving our data-delivery solutions, We help our clients align their digital transformations with their core business and trading strategies.

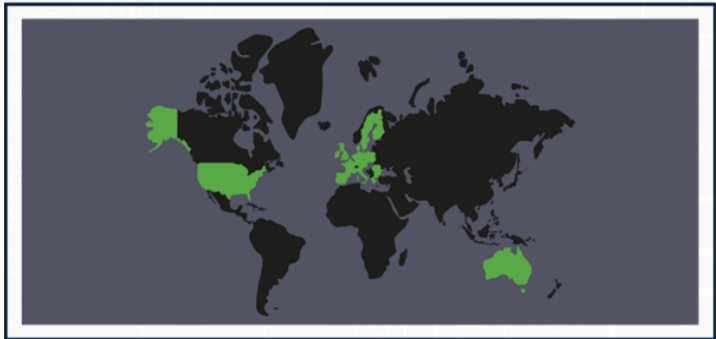

Supported Database

By leveraging data, optimizing performance and constantly improving our data-delivery solutions, we help our clients align their digital transformations with their core business and trading strategies.
