*Maintenance Free
Poly Lumber*

18 Colors to choose from

Quality poly lumber starts with quality raw material.

Sortation

The process begins with 15,000 tons per year of post consumer baled HDPE milk bottles. That is approximately 210 million plastic milk bottles recovered annually from the landfill. The baled milk bottles are broken apart to screen off caps & small contaminates.

Grind/Wash/Dry

Size reduction of milk bottles to large flake size increases the efficiency of the wash process. Paper & plastic labels as well as residual contamination is liberated from the plastic flakes. Drying is critical to be sure no remaining moisture is present.

Repelletizing

The clean & dry flake is melted in an extruder which pushes all the product through a fine mesh screen to remove the very fine particles of contaminates. All plastic lumber used in our furniture have UV stabilizers compounded into them to help protect the color and integrity of the base resin for years to come.

Poly Lumber

Poly **OUTDOOR** FURNITURE

"The Modern Outdoor Furniture Choice"

- Poly Lumber is made from recycled milk jugs and has the appearance of wood.
- Poly Lumber will not splinter, rot or peel and it will never need to be painted or sealed.
- Lawn Furniture made from Poly Lumber is assembled with **316"** stainless steel hardware and aluminum angle bracing is used underneath for added support.
- Stains can be removed with warm soapy water and a soft bristle brush. A pressure washer is helpful if your furniture is very dirty.
- Since Poly furniture is not affected by the elements, it can be left outdoors year round in any climate.
- So, sit back, relax and enjoy your quality lawn furniture!
