Lots 171 & 172 will sell after Lot 115

*** Lots 161 & 163 are Homozygous Polled** (results received after catalogue printed)

Bulls Weighed **17/9/2025**. Daily Liveweight Gains (DLG) calculated after subtracting 32kg birthweight.

Bulls scanned by David Reid **17/9/2025**.

Bulls evaluated for breeding soundness with Semen Morphology assessed by Dr Kim Kelly.

* Lot 159 exceeded the morphology threshold with 23 PD's. At only 15 months of age when tested, this result is expected to improve with maturity and we consider him suitable for breeding now.

Scrotal circumferences (SS) measured **11/9/2025**.

Vaccinations:

Bulls blooded with 3-germ blood as weaners

Bulls given 7-in-1 and Vibrio boosters **11/7/2025**

Bulls given 3-day sickness boosters **11/9/2025**

Females blooded with 3-germ blood **2/7/2025**

Females given 7-in-1 **June 2025**

ROSEVALE EMILIA Q167 (P)

ROSEVALE EMILIA F15

Emilia Q167(P) had four calves in four years. She was not mated for a fifth time. Two of her calves classified S.

This deep bodied Newton son has ranked up with the heaviest bulls in the drop throughout his life.

Emilia F15 calved first as a two-year-old and had eight calves in eight years before being PTE and sold. Five of her daughters classified S while a son sold as a herd bull.

He will sell after Lot 27 in the sale.

GLEN RUFUS PARK S87 (P)

GLEN RUFUS PARK P58 (P)

GRP S87(P) calved first as a two-year-old. She has had four calves in four years, including a calf at foot.

GRP P58(P) calved first as a two-year-old and had six calves in six years before being PTE and sold. Three of her daughters have classified S while a herd bull son sold to the Carson Family last year. Her last is a yearling heifer, yet to be classified.

Jackaroo V119(P) has been pulled into the sale late because he has impressed us with how he has come on. He was a baby in the GRP drop and didn't get the best start in life. He is an eye catching, particularly quiet bull who could easily fit into a bull breeding herd.

Note that V119 has not been Horn/Poll tested. He looks as though he could be homozygous polled (PP).

This bull will sell following Lot 58.

ROSEVALE TIARA H49 (P)

ROSEVALE MANGO M204 (P)

ROSEVALE JALARA Q649

ROSEVALE JALARA M267 (P)

Jalara Q649 had three calves in three years before being PTE and sold. She was pushed back to the end of the season in her second mating by a bull failure and kept breeding for another year before falling out of our system. Two of her calves classified S while a herd bull son sold to Paraway.

Jalara M267(P) calved first as a two-year-old. She had three calves in three years and was not mated for a fourth time. Two of her calves classified S.

Note that this bull is very young. His weight rankings sit him up with the high growth bulls of the sale and his EBVs confirm this. In addition, he is solid right across the range of traits, resulting in high \$Indexes. The P126 sons are super sound, long bodied cattle. This bloke will mature into an impressive sire.

V926 will sell after Lot 171, who will slot into the sale after Lot 115.
