Neighbor Spotlight Sammie Covelli

Spotlight on a Neighbor

Sammie Covelli was born in Fort Morgan and was raised in San Bernardino, California. She came back to Colorado and attended college in Greeley. At the age of 20, she met and married her husband Raymond and they were married for 60 years until he passed. Sammie and Raymond ran Morgan Realty until they passed the business to their son Reed. Sammie and Raymond raised three sons, have 8 grandkids, 6 great grandkids, 2 great great grandkids, and one more on the way.

Sammie and Raymond settled on the family farm in Goodrich where Sammie's parents were raised. The

Covelli family was very active in 4H for many years. Sammie was also very active with the Wiggins Senior Center.

Sammie's days are filled with friends that pick her up and bring her back to the Harmony Home in Ft. Morgan. There is also a card-playing group of friends who come to the Harmony Home Sunroom every Monday for a day of fun and fellowship, depending on the weather.

Sammie's son Reed states, "I love how well she is taken care of, she gets good regular meals, and she has lots of companionship with others."

KAMICARE - AI FALL DETECTION

DETECT AND RESPOND TO FALLS FASTER

We utilize the KamiCare system to pinpoint what caused a neighbor to fall. When we are able to see what caused the fall, we can implement a meaningful intervention to prevent future falls. – Krystal Ginther, Nursing Home Administrator

I've enjoyed using the KamiCare system, especially on the memory care neighborhood and for other neighbors who have significant memory conditions. Those neighbors often can't recall any details surrounding a fall. KamiCare has helped us dive deep into any predisposing environmental or health status causative factors of the fall, along with any patterns (day or time of day) when the neighbor tends to fall. I never knew this type of technology existed before coming to Eben Ezer! It truly has helped make interventions more person-centered!

- Megan Zimmerman, Restorative Nurse Manager

When a neighbor, Elizabeth, moved from Assisted Living to skilled nursing, KamiCare was implemented. The team investigated the video footage to determine the root cause of her falls. The team was able to see what she was doing prior to falling. This allowed adjustments to be made in her room. These adjustments included reorganizing her bathroom cabinet and removing extra items and rugs from her room.

These interventions helped prevent future falls by understanding, through KamiCare, what her normal patterns of movements are before a fall. KamiCare has been a valuable tool to prevent Elizabeth and others from falling.
