Plank 1 HAWAI'I REPUBLICAN PRINCIPLES

PREAMBLE

We are grateful for divine guidance, mindful of our Hawaiian heritage and uniqueness as an island state, and dedicate our efforts to fulfill the philosophy decreed by the Hawai'i State motto, "Ua Mau ke Ea o ka 'Āina i ka Pono" (The life of the land is perpetuated in righteousness).

We still hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the pursuit of Happiness, and Private Property ownership.

PRINCIPLES

We, the Hawai'i Republican Party, expect our elected leaders to uphold these principles in words, actions, and legislation.

We believe in:

- Strict adherence to the original language and intent of the Declaration of Independence and the Constitutions of the United States and Hawai'i.
- The sanctity of innocent human life, created in the image of God, protected from conception to natural death.
- Limiting government power to those items enumerated in the United States and Hawai'i Constitutions, with remaining powers reserved for the states and the people.
- Having an educated population, with parents making educational choices for their children.
- The unalienable right of the people to defend themselves, their family, and their property.
- A free enterprise society with limited government interference or subsidies.
- Protecting the Electoral College that was established to ensure all states have the ability to affect the outcome of a presidential election and repealing Act 62 of May 1, 2008.
- Requiring elected officials and heads of government agencies to renounce any dual citizenship relationships before taking office to eliminate dual loyalties.
- Limiting the terms of office for elected officials.
- Repealing the Patriot Act.
- Repealing the Foreign Intelligence Surveillance Act (FISA) to prevent warrantless spying on innocent American citizens.
- Amending Hawai'i's Constitution Article IV, Reapportionment, and Section 4.6 to specify that Hawai'i will use the decennial census to determine the number of

permanent residents in Hawai'i, to be in alignment with every other state in determining reapportionment.

- Amending Hawai'i's Constitution for the direct election of county school boards accountable to the electorate.
- Opposing gun control laws and supporting the right of all Hawai'i citizens to own and bear guns and ammunition for any lawful purpose.
- Repealing The Jones Act.

We support:

- Prayer and the pledge of allegiance in public schools and places.
- Hawai'i gun laws that comply with the guidelines stated in the Second Amendment of the U.S. Constitution.
- Withdrawing from the United Nations (UN), World Health Organization (WHO), and other globalist organizations.
- Calling for a Convention of States (COS) for the proposal of amendments, pursuant to Article V of the United States Constitution, that will:
 - a. impose fiscal restraints on the federal government,
 - b. limit the power and jurisdiction of the federal government, and
 - c. limit the terms of office for its officials and for members of Congress.

We oppose:

- Any bill or resolution that imposes restrictions on our first amendment free speech rights, especially those creating "hate speech," or "misinformation" prohibitions or penalties.
- Mandates, lockdowns, and restrictions on our mobility, ability to gather, and peacefully protest. For example, church services must be allowed to continue regardless of health risks or any other government-imposed restrictions.
- Censorship of our speech or postings except for engagement in illegal activities. All other speech, even that which may be an affront to another person's feelings, is allowable.
- Government pressure on social media entities to censure, ban, block, or hide content (shadow banning).
- Gun free zones.
- Socialism, Communism, and all Marxist ideologies.

Plank 2 EDUCATION AND OPPORTUNITY, JOBS AND WAGES

Also includes: TAXATION, TOURISM AND AGRICULTURE

Hawai'i is composed of several islands situated over two thousand miles from the mainland United States of America. It is essential that Hawai'i sustain the population of approximately 1,455,660 people with the opportunity to raise a family in a safe environment. To achieve that objective, Hawaii must provide exceptional educational facilities and a thriving economy of diverse employment opportunities with well-paying jobs.

EDUCATION AND OPPORTUNITY

The Hawai'i Republican Party firmly believes that families are the best stewards of a child's education and the basic purpose of schooling is to teach children how to read, write, do math, solve problems, and learn social skills necessary to be a contributing member of society. We support legislation and policies to:

- Abolish the U.S. Department of Education. There is no provision in the U.S. Constitution to federalize the education system.
- Return the state-wide Hawai'i Department of Education to local control of the counties with elected school boards, with term limits. Currently, the school board members are appointed by the Governor.
- Give parents control of educational decisions, including the choice of public, private, charter, or homeschooling.
- Ensure that public funding follows the student, with money going to go to the school option that parents choose (e.g., vouchers, direct payments to the parents, or educational savings accounts).
- Give the right of homeschoolers to access all of Hawai'i DOE schools', classes and activities, such as laboratories, sports, and performing arts.
- Provide parental access to the curriculum in all subjects in which their children are enrolled and that encourages parents to be involved in the development of curricula.

We support:

- Curricula that accurately depicts America's history through multiple, balanced perspectives, such as Hillsdale College's 1776 curriculum.
- The immediate removal of Planned Parenthood from the Hawai'i Department of Education System, including all sexually explicit/pornographic books and materials from classrooms, school websites, and school libraries.
- Teaching methods that encourage the accelerated education for students based on their ability, tenacity, and desire, and object to one size fits all teaching.
- Adding and developing high school curricula in vocational, technical, and trade skills (to include cadet training with the Hawai'i Fire Department and the Hawai'i

Police Department) and developing internships and apprenticeships for students in vocational, technical, and trade skills.

- Instruction of basic life skills in the areas of home finance, health (nutrition, exercise, hygiene), and interviewing skills.
- Parental rights to opt their children out of any curricula they deem inappropriate for their children.
- The requisite study of the U.S. and Hawai'i Constitutions in high school curricula, as required by federal law H.R. 4818 of 2004.

We oppose:

- Any curricula such as Critical Race Theory (CRT), Social Emotional Learning (SEL), Gender Ideology, Comprehensive Sexuality Education, and woke ideologies.
- Exemptions granted to teachers and school libraries to legally expose minor students to pornography.
- Discrimination based on race at any educational institution.
- Biological males competing against female athletes and using female locker rooms, bathrooms, and other single sex facilities.

JOBS AND WAGES

Based on 135 metrics in 10 broad categories, the Consumer News and Business Channel's (CNBC) ranking of America's top states for business in 2025, ranked Hawai'i 49th in the nation. Hawai'i was 50th regarding the cost of doing business in Hawaii (based on high taxes and high cost of regulation), and 42nd in education.

We support:

- Implementing policies that streamline government operations and spending. Ensure oversight by having controls that identify fraud and corruption.
- Eliminating excessive and punitive over-regulation of all businesses in Hawai'i.
- Providing incentive programs for entrepreneurs and farmers as a way to attract and support quality careers.
- Upgrading the Information Technology (IT) infrastructure to improve productivity via the use of Artificial Intelligence (AI) and other emerging technologies.

We oppose:

- A 100 percent cashless digital monetary system and any implementation of a social credit score or digital ID.

TOURISM

According to the Economic Research Organization at the University of Hawai'i (UHERO), "...tourism continues to anchor Hawaii's economy, generating more than \$20 billion in visitor spending in 2024 (DBEDT 2025)." The state of Hawai'i reports that in 2024 there were 9,701,499 visitors and the number of jobs supporting those visitors numbered approximately 211,000.

- Hawai'i's tourism objectives should be to:
 1. increase revenue, while managing the number of tourists in areas where our ecosystems and residents are currently being overrun,
 2. improve infrastructure (state and county),
 3. limit access to certain ecosystems/attractions (e.g., Hanauma Bay), and
 4. remarket Hawai'i with an emphasis on the critical role tourists play in protecting our fragile ecosystems.
- Transient vacation rentals also support tourism which is known to be a vital source of income for Hawai'i residents.
- In advocating for a family friendly tourist experience, we oppose any business/industry, such as gambling and cannabis shops, that normally attract criminal elements.
- We advocate repeal of the Visitor Green Fee tax approved by SB1396 and signed as Act 96 of 2025, that imposes an increase of .75% to the state's Transient Accommodations Tax raising it from 10.25% to 11%.

AGRICULTURE

Agriculture is a fundamental necessity for sustaining life in our island state, especially due to its geographical isolation from out-of-state food sources and our dependence on limited shipping services.

We support:

- Land, designated as agricultural, to be used solely for agricultural purposes.
- Providing agricultural and aquacultural classes across the kindergarten to high school curricula.
- Long term leases, regardless of acreage, for state land that is designated for agriculture.
- Sustainable water resources, upgraded irrigation systems, reliable electricity sources, and ample road access.
- Increasing the number of food processing plants so that Hawaii food production is sustainable and accessible, i.e. food hubs, farmers markets, co-ops.

- Reducing government regulations and procedures that increase costs and reduce agricultural production, strict pest reporting laws, and complex land use rules that disproportionately impact small scale farmers.
- Requiring well-publicized public hearings prior to the awarding of permits for the conversion of agricultural land to residential land.
- Increasing roadside sales of farm products, neighborhood gardens, home gardens, and programs such as 4-H.
- Instituting measures to enable farmers to build and provide farm worker housing for their employees to make farming affordable, attractive, and rewarding.
- Allowing farms to diversify and include eco-tourism with activities such as farm tours.

We oppose:

- Electrical power generation initiatives or 5G on “agricultural land” that support agricultural production if they impede agricultural activities.

TAXATION:

According to WalletHub, for 2025, Hawaii residents have the highest tax burden of all the 50 states which directly impacts their ability to continue to live in “paradise”.

We support:

- Eliminating the state individual income tax.
- Balancing the increase of a tax in one area with a reduction of a tax in another area.
- Reducing the General Excise Tax (GET) to no more than 5% on goods and services and the elimination of tax on food, medicine, gasoline, long-term rent, and gold and silver bullion.
- Taxing electric vehicles (EVs) since EV owners do not pay gas tax or support road maintenance.
- Hawaii’s participation in the Federal Scholarship Tax Credit (FSTC) update to the Internal Revenue Code Section 25 F, that provides individual taxpayers a claim to a FSTC tax credit for contributions up to \$1700 to Scholarship Granting Organizations (SGOs). Students from families making less than 300% of the median gross income are eligible for these scholarships.

We oppose:

- Repealing legislation that provided five years of tax cuts from 2027 through 2031.
- Increasing conveyance taxes on any home sales.
- Any new taxes on residents such as a new tax on sales of gasoline-powered vehicles.

Plank 3 HOUSING AFFORDABILITY AND HOMELESSNESS

HOUSING AFFORDABILITY

Hawai'i is facing a severe housing crisis. High costs, limited supply, and complex regulations have made homeownership and renting increasingly unaffordable for local residents.

We believe the solution is to increase housing supply, reduce unnecessary barriers, and lower costs for residents.

We support:

- Reducing bureaucratic delays and streamlining the permitting process to accelerate housing development.
- Expanding opportunities for homeowners to build additional units (such as smaller homes or rentals) on their property.
- Increasing the amount of land available for residential development.
- The construction of smaller, more affordable homes rather than high-density luxury developments
- Allowing innovative housing options, including modular and prefabricated homes.
- Disaster-impacted communities by expediting rebuilding permits and waiving fees where appropriate.
- Limiting property tax increases to 2% per year unless the property is sold.
- Reducing construction costs by eliminating the Jones Act to lower the cost of all building materials used to construct homes;

We oppose:

- New taxes that penalize property ownership.
- Policies that discourage private property rights.
- Large-scale corporate acquisition of residential homes that limit opportunities for local buyers.

HOMELESSNESS

Homelessness in Hawai'i is driven largely by the high cost of living, financial hardship, mental health, and substance abuse.

- Provide mental health evaluations for repeat offenders, followed by residential or out-patient treatment programs that are enforceable by ordinance and funded by the Department of Health;
- Address issues such as cost of living, employment instability, and lack of affordable housing.
- Conduct audits and government oversight of nonprofits using taxpayer funds to provide homeless services.

Plank 4 CRIME, PUBLIC SAFETY AND NATIONAL SECURITY

Also includes: IMMIGRATION, MILITARY AND ELECTION INTEGRITY

Our commitment to a safe, peaceful, and law-abiding Hawai'i is unwavering. We believe in ensuring public safety under the rule of law. The primary function of Hawai'i's criminal justice system is to protect the residents of Hawai'i and their property from crime.

- Police safety involves measures to protect officers while carrying out their duties, including training, equipment, and policies aimed at minimizing risks.
- The United States Constitution and Hawai'i Constitution protects the rights of both law enforcement officers and individuals accused of crimes, including protections against unreasonable searches and seizures, the right to a fair trial, and freedom from cruel and unusual punishment.
- The residents of Hawai'i have a right to be safe in their homes, neighborhoods, or while in public spaces. We have high expectations based on the United States and Hawai'i Constitutions, our judicial system, federal law enforcement organizations, and our local police.
- The system should accomplish this by providing a deterrent to crime via the enforcement of punishment and by keeping those who have committed crime, and are a threat to society, incarcerated so they cannot harm law abiding citizens.

We support:

- Full funding and staffing of our law enforcement agencies.
- The protection of whistleblowers from retaliation.
- The Election of Hawai'i State judges rather than appointment by the Governor.
- The establishment of an adequate local prison system to house Hawai'i's criminals without overcrowding.
- "Stand your ground" laws to protect life and property.
- Surety bail and releasing suspects charged with felony crimes only after posting appropriate bail and wearing a GPS monitor.
- Rehabilitating inmates to become functioning and contributing members of society.
- Legal protection of human life from conception to natural death
- Prosecution of all retail theft (smash and grab).
- Restitution to victims from a person found guilty of a crime for any injury, physical or financial, that they incurred as a result of the crime.
- Laws criminalizing the posting of real or AI generated pornographic images of a person without their permission and that the images be removed completely from the internet or their storage site, such as the "take it down" laws.
- Local law enforcement agencies to obey federal law and actively enforce and comply with ICE agents to remove individuals who are not legally in the USA.

- The elimination of obstacles to existing concealed/carry laws; Hawaii is one of the most restrictive states to carry any concealed weapon.

We oppose:

- Any instance of our state or a local city becoming a “sanctuary” for those in the country illegally.
- The legalization of recreational cannabis and gambling in Hawai’i.
- Laws that restrict citizens' right to peacefully assemble and protest.
- Laws that violate a parent’s right to decide the best interests of minor children’s healthcare, education, and religious upbringing.
- Physical mutilation of minors under the guise of “gender affirming care”.
- Lawfare waged against an American citizen.
- Healthcare mandates, violation of one’s health status privacy, and restrictions on mobility.
- Warrantless inspections/surveillance of American Citizens such as what FISA allows.
- Assignment of biological males to female prisons and biological females to male prisons.

NATIONAL SECURITY

The Hawai’i Republican Party supports strong borders where immigration law is enforced.

IMMIGRATION

We support:

- Enforcement of immigration laws and the maintenance of secure national borders.
- Required background checks for all immigrants to protect public safety.
- Deporting individuals who enter the country illegally, especially those involved in criminal activity.
- Requiring asylum seekers to apply in the first safe country they enter.
- Strengthening efforts to combat human trafficking, particularly in Hawai’i.
- Ensuring that taxpayer-funded benefits are reserved for legal residents.
- Prohibiting Non-Government Organizations (NGO) from receiving government subsidies to settle illegal immigrants within our borders.
- Termination of the Unaccompanied Minor Immigration Program.
- Fully funded border patrol and homeland security organizations.

MILITARY

We recognize Hawai'i's strategic importance in national defense and Indo-Pacific security.

We support:

- Maintaining a strong military presence to deter threats and support allies.
- Allowing military training activities while protecting Hawai'i's natural resources and requiring environmental restoration.
- Federal government funding of the development and installation of the "Golden Dome" to ensure the security of our residents and warfighters from potential North Korean, Chinese, or Russian missile attacks.

ELECTION INTEGRITY:

Our constitutional republican form of government and the sovereignty of our nation are only secure as long as we maintain the election integrity of the vote.

We support:

- The US House of Representatives and the Senate passing the Save America Act.
- Definitive voter photo identification for voting.
- Elimination of same day voter registration.
- Repealing the Hawai'i Act 136 SLH 2019 that mandates all mail-in voting.
- In person same day voting at local precincts.
- Criminalization of "Ballot Harvesting."
- Quarterly updates of the voting rolls to eliminate all duplicate, deceased, former residents, and non-citizen registrants.

Plank 5 TRANSPORTATION, ENERGY, AND ENVIRONMENT

TRANSPORTATION

We support:

- Immediate construction of new roads prioritizing those that provide two entry/exits for each residential community.
- An independent forensic audit of Honolulu Authority for Rapid Transit (HART) to provide the public with a full accounting of the rail project.
- Significantly increasing our nation's commercial and military shipbuilding capacity.
- A ferry system for transportation within neighboring islands.

We oppose:

- Expanding the Honolulu Rail system.
- Government subsidies and mandates financially incentivizing electric cars.

ENERGY

Energy resources are the engine that drives our productivity and mobility. It must be available in quantities that enable a productive work and day-to-day living environment. Hawai'i will need increased energy resources as Artificial Intelligence (AI) systems become more prevalent in Hawai'i. There is agreement on temperature changes, but not the causes nor their relative importance, nor whether it is an existential threat. Carbon dioxide (CO₂) reduction should not be the sole driver in our energy policies.

The Hawai'i Republican Party encourages the use of diversified energy sources that are clean, plentiful, and economic.

We support:

- American energy independence.
- Repealing Hawai'i's 2018 Act 15 that requires a net zero greenhouse gas (GHG) emission and transition to 100% renewable energy by 2045.
- Reactivating the coal plant, implementing alternative energy resources, maximizing the output of the H-power plant, and starting dialog about the safe implementation of a floating nuclear power plant.

- Obtaining the approval of area residents who will be impacted when large structures such as wind turbines or solar farms are placed in a neighborhood or on agricultural land.

We oppose:

- Terminating energy systems that provide reliable energy services without providing an equally efficient, affordable, and dependable energy resource.

ENVIRONMENT

Water quality is Hawai'i's number one environmental issue. Cesspools are the biggest contributor to poor water quality.

"Hawai'i has 88,000 cesspools across its eight major islands, more than any other state. Collectively, they deposit 53 million gallons of raw sewage into the ground every day, according to the State Department of Health. More than 90% of the state's drinking water comes from groundwater wells."

We support:

- Passing the 2025 provisions of SB 542 which:
 - a. Accelerates the dates for the required upgrades, conversions, or connections of priority level 1 and priority level 2 cesspools to 2035 and 2040, respectively,
 - b. Appropriates funds to implement the cesspool compliance pilot grant program, and
 - c. Re-establishes a cesspool upgrade, conversion, or connection tax credit.
- Research alternatives beyond septic tanks and city sewage such as [Aerobic Treatment Units \(ATUs\)](#), [Composting Toilets](#) and [Cluster/Community Systems](#);
- Revegetating the coastal setback zone with native plants to protect ocean water and our coral reefs.

Plank 6 Healthcare, Family Life, and Sustaining Native Hawaiian Culture

HEALTHCARE

Hawai'i's health care systems' problems include a severe doctor shortage, a lack of specialty care in rural areas, the 6th fewest hospital beds per capita in the US, and the 5th longest emergency room wait times. Hawai'i's doctor shortage is 644, but when geographic availability is taken into account, the full time need is about 833 physicians statewide. For example, an emergency room physician on O'ahu doesn't fill the need for emergency room physicians on neighbor islands.

We support:

- Passing the Protecting Access To Care in Hawai'i (PATCH) (H.R. 3263/S.1624) which will increase Medicare reimbursement for providers.
- State provided tax-advantage Health Savings Accounts (HSAs) in-lieu of comprehensive health insurance.
- Increasing the number of reciprocity compacts with other states, to authorize providers licensed in those states to provide care to patients in Hawai'i. This will expand our supply of providers to include those willing to come here under short-term contract agreements and via telemedicine.
- Eliminating the [Certificate-of-Need](#) (CON) laws that require investors wishing to build a new medical facility to prove there is a "need".
- Incentivizing the creation of private medical practices, migration of physicians to Hawai'i, and retention of physicians who are already here by eliminating the General Excise Tax (GET) on medical services and products.
- Allowing a wide variety of insurance options including out of state plans that are better able to meet consumer needs.
- Passing legislation that requires all health care practices and hospitals to make their prices available upon request like, President Trump's 2019 Executive Order 13877 on [Improving Price and Quality Transparency in American Healthcare](#).
- A healthcare system that is open to alternative healing modalities.
- Repealing Act 13 of 2018 and providing minors with all counseling options related to sexual orientation, including Reparative Therapy based on findings in the 2026 [CHILES v. SALAZAR](#) Supreme Court case.
- Restricting the state, county or any public entity from mandating a person to take, be administered or otherwise receive a medical product (medical device, drug, or biologic).
- Healthcare providers' or organizations' refusal to provide, or refer for services and prescriptions, procedures that violate their conscience.
- Providers informing their patients of promising experimental treatments available under the Right to Try Act.
- Providers being allowed to prescribe, and pharmacies to issue, FDA approved off-label pharmaceuticals in accordance with law.

We oppose:

- Discrimination in healthcare based on age, vaccination status, or refusal to release medical history.
- Transgender care of minors with surgery or puberty blockers.

FAMILY LIFE

Because members of the Hawaii Republican party recognize the inherent equality, dignity, and deserved respect of all humanity regardless of age, race, sex, or religious affiliation, we expect our fellow residents to protect human life at all times.

The traditional family structure consisting of a biological mother and a biological father, who are bound together in marriage for life, is optimal for raising children who assimilate into society with minimal societal consequences, such as less delinquency, incarceration, vulnerability to predators, and risk of using illegal substances at a young age. However, all types of family structures, whether brought together in marriage, by guardianship, or through adoption, including the “hanai” concept, benefits individuals, families, and the strength of society at large.

We support:

- Legislation that incentivizes nuclear families to include tax credits for children, a reduction in the overall tax burden on working families, assistance for first time home buyers, and assistance for small family-owned businesses.
- Passing legislation that protects life from preborn to natural death such as defined in [1 U.S. Code 8](#):
 - a. [H.R.21](#) - Born-Alive Abortion Survivors Protection Act (2025-2026)
 - b. [H.R.682](#) - Heartbeat Protection Act of 2025
 - c. [H.R. 722](#) - Life at Conception Act (2025)
 - d. [H.R. 3411](#) - Conscience Protection Act of 2025 (Amends the Public Health Service Act to prohibit discrimination against health care entities that do not participate in abortion, and to strengthen implementation and enforcement of Federal conscience laws.)
 - e. [18 U.S. Code § 1841](#) Chapter 90A - Protection of unborn children
- President Trump’s [Executive Order 14168](#) (2025), “Defending Women from Gender Ideology Extremism and Restoring Biological Truth to Federal Government”, that acknowledges only two sexes and which Congress confirms those principles in law.

- Encouraging permanent adoption instead of foster care whenever possible and government funding for faith-based organizations to provide adoption services based on religious preferences with birth mothers allowed to select the adoption service she prefers and ensuring oversight by having controls that identify fraud and corruption.
- Making the Hyde Amendment (National) and the Mexico City Accord (International) policies permanent so that government funded abortions in the US and other countries are not supported, as well as government funded transportation of US citizens to other states/countries for abortion.
- Repealing Hawai'i's Statute Chapter 327L, assisted suicide law (the "Our Care, Our Choice Act of 2018").
- The rights of peaceful protesters to assemble and protest the operation of abortion facilities.
- President Trump's Executive Order 14202 of 2025 titled Eradicating Anti-Christian bias for the purpose of protecting religious freedom for all Americans.

We oppose:

- Hawai'i's current practice of voluntarily providing Medicaid funds for abortions.
- Ease of distribution of abortion pills via mail.

SUSTAINING NATIVE HAWAIIAN CULTURE

Prince Jonah Kuhio Kalanianaʻole, a Republican, was the first prince and native Hawaiian who served in the U.S. Congress, where he represented Hawaiʻi for 19 years. While in Congress, he advocated and supported legislation for native Hawaiian rights to a land base for housing, farming, and preservation of traditional and cultural practices. Prince Kuhio's efforts were successful with the passage of the [Hawaiian Homes Commission Act of 1921](#).

We support:

- Accelerating the awarding of homestead ownership/leases.
- Expediting the planning and budgeting of roads and utilities in Hawaiian Homeland areas.
- 'Ōlelo Hawaiʻi as an official language of our state.
 - a. Including 'Ōlelo Hawaiʻi in the school curricula to foster correct 'Ōlelo Hawaiʻi pronunciation and use.
 - b. 'Ōlelo Hawaiʻi translation services (Hawaiian to English and English to Hawaiian) in public affairs.
- Native Hawaiian rights to participate in traditional cultural practices.
