IS HERE...

Eclipse™

OASIS CAR WASH SYSTEMS™

Introducing a Whole NEW Class of Car Wash!

Welcome to a whole new class of car wash – representing a technological advancement and bringing an all new eco-friendly product to the car wash industry. The **Eclipse** by Oasis is a new generation of car wash in a class all its own. Not just an in-bay automatic, and not just an express tunnel, this revolutionary new product successfully combines the benefits of an in-bay automatic with the advantages of an express tunnel but without the hassles of a conveyor. Every piece of this new system has been specifically engineered to increase owner revenues – to make more money for *you!*

*Here are the features that make
Eclipse by Oasis great!*

SPEED

Eclipse by Oasis has been designed for maximum throughput. Washing and drying at a rate of 40 cars per hour, the **Eclipse** applies chemical and washes five sides of the vehicle at one time. While one vehicle is being washed, another is drying in a separate drying bay.

CLEANING

Oasis developed the **Eclipse** to effectively clean more cars per hour than any other equipment on the market today. Its highly efficient chemical delivery system, along with maximum water impingement, provides optimum wash results. To further enhance cleaning, computer controlled on-board rocker panel blasters and underbody wash are included as standard equipment. Better cleaning ensures customer loyalty.

VERSATILITY

The **Eclipse** smart technology carefully determines the length and width of each vehicle. This feature allows you, the operator, the versatility to wash anything from the smallest cars to the longest double cab pickups, even duallys. Its great functionality also permits the selection of wash cycles just right for each location. Different geographical locations have different needs to produce clean cars and every Oasis product offers that flexibility.

RELIABILITY

When investing in equipment, reliability year after year is of utmost importance. Hydraulically powered, the **Eclipse** gear drive system is so reliable we offer a **5 YEAR WARRANTY** on the drive – a feature unmatched in the industry. The simple design of the **Eclipse** allows for minimal moving components, which adds to its reliability and longevity. Less downtime equals more profit, year after year.

CONSTRUCTION

The **Eclipse's** customer-friendly, open design makes it easier to enter and exit the wash bay, increasing throughput and making it more visually appealing. The wall-mounted frame and elevated carriage system help protect the unit from strike damage as well as chemicals and grime.

Eclipse

ECO-FRIENDLY

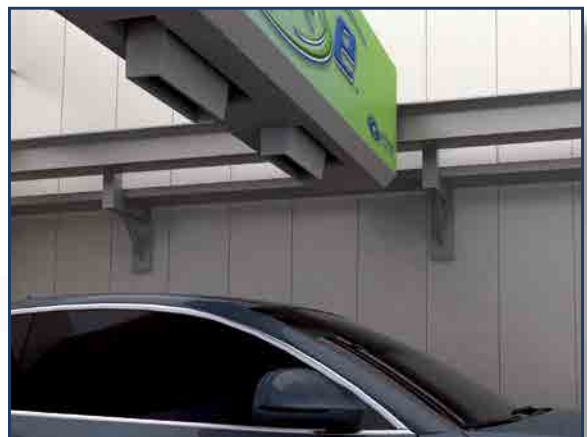

Every **Eclipse** system comes with the **E**co-Wash environmentally friendly package as standard equipment, offering operators the opportunity to further reduce water and utility requirements resulting in even lower operating costs. No conveyor system is necessary for the **Eclipse** which means it uses less energy to operate and, therefore, provides another eco-friendly feature. Oasis also offers an advanced water reclamation system to conserve water usage and reduce discharge in order to meet standards and regulations in your location.

UNATTENDED OPERATION

The **Eclipse** was specifically designed without a conveyor, allowing for unattended operation 24/7. Less work for the owner, lower labor costs, and eliminating the need for costly repairs makes the **Eclipse** by Oasis the most cost-effective car wash on the market today.

DRYER

The unique design of the **Eclipse** increases throughput by allowing two cars to be washed and dried simultaneously. After the wash cycle is complete, the vehicle measurements are transferred to the fully integrated smart dryer, providing another time and energy-saving feature. Thanks to the independent hydraulic gear drive system, the wash bridge is relieved of the dryer weight, resulting in less wear and maintenance. High volume and velocity air flow from three quiet and efficient turbines running at 3600 rpm insures quick and complete water removal. The **Eclipse** is fully programmable, allowing the operator to control the number of drying passes.

System Enhancements

Oasis offers some great options to enhance your car wash and provide additional revenue streams for you – once again increasing your profit.

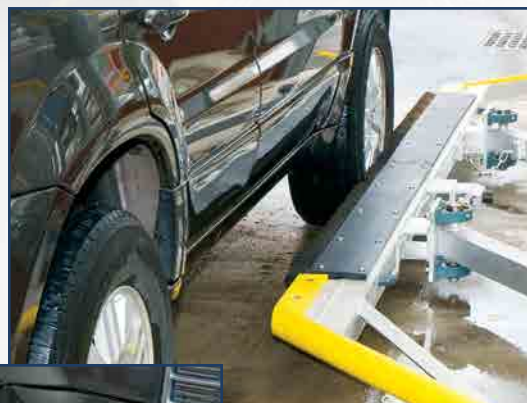

WHEEL SCRUBBER

Allow your customers to choose which type of wheel cleaning they prefer. Increase your wheel cleaning revenue in less time with this online system available in friction and touchfree options. The wheel brush cleans the tires and all wheel surfaces when the friction option is chosen. For those customers who prefer touchfree, you can also offer that choice, improving tire and wheel quality, again adding to your revenue and satisfying another customer.

TIRE SHINE APPLICATOR

Tire shine is an upgrade your customers can choose to give that freshly-washed, shiny, finished look to their tires. It's the final touch for particular customers who want their vehicle clean from top to bottom, and the **Eclipse** makes it as simple as driving out of the bay.

ESP ELECTRONIC SCANNING AND POSITIONING

This virtual stop station “reads” the car’s location within the bay while the electronic, or “smart system”, eliminates the need for a positioning device on the floor. This feature makes it easier and faster for customers to drive in and out of the wash bay. Increased throughput means increased profit. It also means satisfied returning customers who have no concerns about lining up the car to hit a floor device.

DIVIDER DOORS

Customize your car wash with one, two, or three doors. Although doors are not required, they are instrumental in eliminating the wind tunnel effect and keeping overspray from reaching the clean car being dried. In cold climates, doors are helpful in reducing utility costs by retaining heat in the bay. Our unique door design incorporates technologically advanced corrosion-proof materials, making them virtually maintenance free for years to come.

Additional System Enhancements

- Triple Foam Shine
- Two Step Presoak
- Touchfree Wheel & Tire Cleaner
- Bug & Bumper Blasters
- Bug Remover
- High Pressure Detergent
- Low Pressure Wax
- Drying Agent
- Heated Presoak
- Freeze Prevention Package
- Oasiswatch Communication Packages
- Entry Tellers & POS Systems
- LED Instructional Sign Packages
- Lighted Menu Boards
- Floor Mount
- 92" Extended Height Version
- Spot Free Rinse Systems
- Water Reclamation Systems
- Water Softeners
- Vacuums
- Carpet Shampoos
- Fragrance Dispensers
- Bill Changers
- Product Vendors

Technical Specifications

BAY DIMENSIONS

	Recommended	Minimum
Height	12'0" - 3.66m	10'6" - 3.20m
Width	15'4" - 4.67m	13'9" - 4.19m
Length	60'0" - 18.29m	50'0" - 15.24m

MAXIMUM VEHICLE HEIGHT

Standard Eclipse	7'0" - 2.1m
Extended Height Option	7'6" - 2.3m

REQUIRED UTILITIES

Electrical:	Voltage	Amps	KVA
	208	360	134
	400	192	134
	460	169	134
	575	137	134

50 hertz available. Call factory for details.

Water:	Size:	1" - 25.40mm
	Inlet Pressure:	50psi - 3.45 bar

Compressed Air:	CFM:	35
	Pressure:	100psi - 6.9 bar

Utility requirements are minimums based on standard equipment. Does not include load for optional equipment, lighting, etc. Contact factory for site-specific details.

Eclipse carries the following ratings: CE, UL, CUL
