

JetStream™

JetStreamTM

The Self-Serve System Designed with YOU in Mind!

At Oasis, we know how important your investment dollars are so we work diligently to ensure our products offer the latest technological advances while still maintaining structural integrity. It is this commitment to quality that has kept Oasis a leader in car wash manufacturing for over 60 years.

Our expertise in building automatic car wash systems is reflected in the quality of each piece of self-service equipment we produce and the **JetStreamTM** is no exception.

If you're looking for a quality car wash system with unlimited performance and income potential, then the **JetStreamTM** is the right system for you.

Small Space, Large Return

Space constraints shouldn't dictate what kind of system you purchase. Just because you don't have room for a large system doesn't mean you need to sacrifice quality or performance.

With its compact design and durable aluminum construction, the **JetStream™** is engineered to withstand the test of time thus allowing you to make the most of your investment.

It is also completely computer-controlled so there's no need for costly manual operation or adjustments which can actually shorten the life span of your equipment.

A “Worry-Free” Alternative

Another factor that sets us apart from the competition is our belief that your investment should start working for you as soon as possible. **JetStream™** is totally self-contained and comes pre-plumbed and wired for trouble-free installation and setup.

JetStream™ features computer controls from Allen Bradley, the world leader in automation controls. Each system is equipped with a Human Interface Touchscreen that provides daily reports as well as remote access so you are able to monitor your wash 24/7.

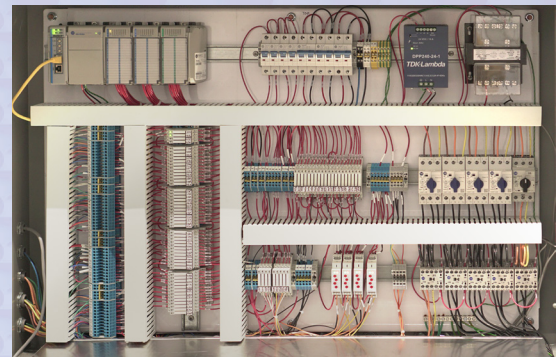

Our chemical injection system allows you to fine tune your system to deliver the best cleaning capability, saving you money by not wasting precious chemicals.

You + JetStream™ = Profitability

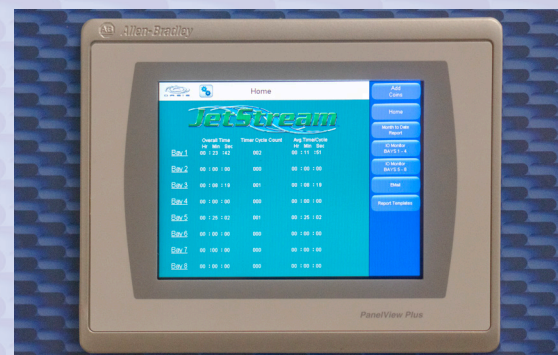

These days, customers expect more from their car wash. They want to have a choice when it comes to cleaners, conditioners and rinses. The **JetStream™** system is designed to give them those options. By offering more wash selections and features, you have the potential to increase your profitability and customer satisfaction at the same time.

Push Button Bay Meter

Computer Controlled Bays

Human Interface Touchscreen

One of the most valuable features for you, the owner, is the in-bay marketing meter. This multi-function tool accepts bills and credit cards, keeps track of wash times, and more. It also allows you to advertise your car wash for whatever promotion you desire, such as offering special pricing during off peak times to help generate income.

All Weather Operation

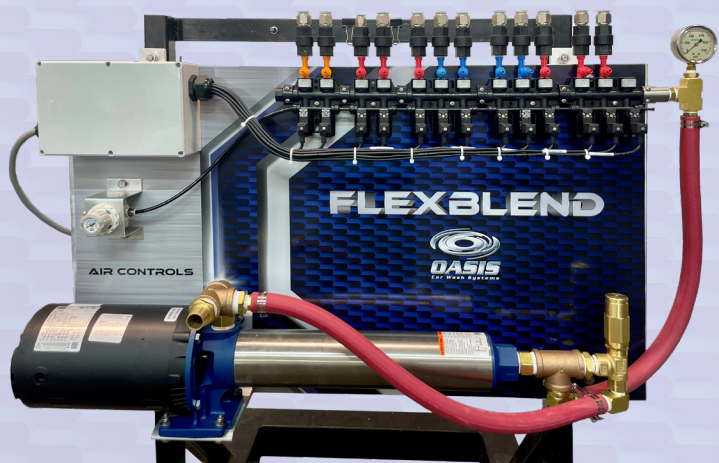

Our focus on your bottom line doesn't stop there. Our innovative freeze prevention technology allows your JetStream™ to operate in even the coldest of climates, thereby increasing your traffic and your profits.

STANDARD FEATURES
