

THE DANGER OF  
*Islam*

*What Every Muslim and  
Christian Should Know of Islam*

**CONSTANTINE I. NIGHTINGDALE**

*The End Times Apostle to the World from Hawaii*

# “REVIEW 1”

This book by **CONSTANTINE I. NIGHTINGDALE** carefully examines Islam from a Christian perspective, highlighting doctrinal, historical, and spiritual differences. The author vigorously challenges Islam’s divine authority with proof. The book discusses the history associated with Muhammad and the false promises of Islamic paradise.

I really appreciated how this book clearly explains the basics of Islam while comparing it to Christianity in a straightforward way. The author’s respectful tone, even when discussing sensitive topics, makes it easy to understand the differences. I especially liked the detailed list of Islamic terms, which helped me grasp their beliefs better. It’s a helpful resource for anyone wanting an honest, accessible overview of Islam in relation to the Christian faith.

The overarching spiritual theme centers on the power of personal accountability and divine invitation. This book is a relentless reminder that eternal destiny rests on one’s choice, not predetermined religion. This book strips away complacency, forcing an individual to search for truth, asking God for a manifestation, and ensuring that no one stands before the Lord claiming ignorance.

I’ll rate this compelling work 5 out of 5 stars because it serves as a pragmatic handbook, offering a vital reminder that faith is not passive. The author challenges readers, both Muslim and Christian, to actively seek divine confirmation through dreams and visions, stressing that a true relationship with God transcends rote prayer. It compels an immediate and personal accountability regarding one’s eternal destiny, translating spiritual urgency into daily, conscious choices about belief and commitment.

## “REVIEW 2

Nightingdale’s book compares Christianity and Islam, emphasizing the key doctrinal differences between the two religions. He also expounds Islamic beliefs and Muhammad’s violent history. The book encourages Muslims to investigate Christianity’s biblical truths and warns against the dangers of false Islamic doctrines.

This book provides end-times awareness and preparation. The author connects Islamic tenets and current geopolitical movements, notably the aggression involving Russia, Iran, and Israel, directly to biblical prophecies in Ezekiel 38 and 39. This is helpful because it elevates the urgency of faith, transforming belief into a life-or-death decision in the face of unfolding prophecy. By telling readers to seek prophetic clarity through dreams and visions, this book provides a proactive spiritual defense mechanism against the deception that will characterize the final age, including the push for a one-world religion.

What stood out to me was how the book provides a comprehensive yet approachable explanation of Islamic beliefs. The comparison chart between Christianity and Islam was particularly helpful, highlighting core doctrinal differences clearly. I also appreciated the author’s focus on biblical truths and how they contrast with Islamic teachings. The tone is friendly and inviting, making it a great read for those new to studying these religions or even for readers seeking a clearer understanding of Islam.

I’ll rate this book 5 stars because it’s a practical guide owing to its direct call for spiritual discernment in a religiously confused world. By providing the “ABCs” of the Islam faith and contrasting them with Christianity, it equips individuals on how to engage with global dynamics and modern spiritual warfare. It transforms abstract theological differences into tangible warnings, telling Christians to stand firm on the Bible while prompting Muslims to question their current path toward salvation.

# “**REVIEW 3**”

This book presents a passionate critique of Islam, juxtaposing its beliefs with biblical truth. The author highlights the alleged deception underlying the origins of the Quran and Hadith and warns about the violent implications of Islamic teachings. Emphasizing the divine authority of the Bible, he stresses the significance of Jesus’ sacrifice on the cross as the sole pathway to salvation. This book aims to inform both Muslims and Christians about spiritual realities, telling Muslims to seek God’s truth through Christ and warning against the false teachings of Islam.

A noteworthy aspect of this book is the clarification of God’s nature. The book meticulously defends the biblical concept of the Godhead: Father, Son (Jesus Christ), and Holy Spirit, challenging the Islamic belief in a unitary Allah who rejects the Trinity. This helps readers grasp the complete, loving plan of salvation: God sent His Son for all humanity, offering an inclusive path to eternal life (John 3:16). Understanding the true character of God, the Father of Abraham, is essential for correct worship and securing a place in heaven.

I found this book refreshingly honest and easy to follow. The author’s background shines through in his thorough explanations of Islamic terms and concepts, making them accessible without watering down the truth. Reading this book felt as though I was having a heart-to-heart conversation with a trusted colleague. I especially valued the biblical references that show the disparities of biblical salvation with Islamic teachings, which shed light on their fundamental differences. The detailed timelines and historical context added depth, helping me understand the roots of Islam better. Overall, it’s a balanced resource that offers clear understanding into Islam’s beliefs versus Christianity, making it educational for anyone interested in religious studies. Far from being a mere comparison between 2 religions, this book offers a crucial guide for daily evangelism and self-examination. I gained a lot from reading this book, and as such, I’ll give it a full rating of five stars.

## “REVIEW 4”

The author offers a stark difference between Islam and Christianity, faulting Islamic teachings and how the religion came into existence. A few of the topics covered are how the Quran and Hadiths are late additions and the differences between this and the account of Jesus' crucifixion and resurrection. The book emphasizes Christian doctrines of salvation by grace through faith, versus Islam's reliance on works and jihad. It also discusses Islamic concepts like Allah's oneness, challenging Muslims to search for truth in the Bible. Overall, it encourages both Muslims and Christians to examine their faiths carefully and consider the biblical path to salvation.

One of the themes present in this book that I found profound is the conflict between grace and works. The book repeatedly emphasizes that the Christian faith rests on God's grace through the sacrifice of Jesus, offering freedom from the bondage of sin.

Conversely, Islam is portrayed as a reward-based system reliant on works, such as the Five Pillars, that fail to provide true atonement. This theme is incredibly helpful, as it frees the Christian reader from religious striving and promotes humility and gratitude, while simultaneously presenting Muslims with a superior, merciful, and definitive path to God.

This book offers a well-grounded overview of Islam, which I really appreciated. The glossary of Islamic terms like "Tawheed" and "Shahada" was immensely helpful, as it demystified many concepts I'd heard but didn't fully understand. The historical perspective on Muhammad's life and the Quran's development was eye-opening and added context to what I already knew.

The relevance of this book manifests powerfully in its geopolitical and personal urgency. By linking current global conflicts, specifically mentioning the end-time prophecy involving Russia, Iran, and Israel, the book forces readers to acknowledge that faith has real-world consequences. It is a demand for action: recognizing the necessity of being "ready" for the Rapture and the Great Tribulation.

## “**REVIEW 5**”

Here, **CONSTANTINE** breaks down Islam, comparing it side by side with teachings in the Bible. He explains that the Quran was written after Muhammad’s death, not before, undermining how it originated. The book emphasizes the uniqueness of salvation through Jesus Christ, who died and rose again, an event Islam denies. It also discusses Islamic doctrines like Jihad and the misrepresentation of biblical figures. The author’s goal is to shed light on what he perceives as the dangerous and cult-like nature of Islam and to motivate readers to seek the truth through the Bible.

What I liked most about this book was its candid approach to explaining Islamic beliefs and practices. The author’s use of biblical references throughout made the differences between Islam and Christianity very clear to me. I also appreciated the friendly tone that encourages dialogue rather than confrontation.

The central helpful theme revolves around divine authority and authenticity. The author highlights the stark difference between the fully inspired, prophetic, and historically validated 66 books of the Bible and the Quran, which allegedly contains altered and fabricated portions. This provides spiritual grounding, assuring readers that the Christian faith is based on an accurate, living document, whereas Islam, with its historical gaps and delayed writing, is deemed unreliable. This clarity is paramount for making sound spiritual decisions. The book functions as a spiritual toolkit for navigating the complexities of modern religious identity. It applies the concept of “free will” by challenging individuals to proactively choose their destiny, showcasing the difference between the gentle nature of God and the coercive methods often attributed to Islam (convert or be killed).

This focus on choice translates into a daily commitment to truth, pushing readers to engage with historical facts, such as the late fabrication of Islam’s timeline, rather than simply adhering to inherited tradition.

# “**REVIEW 6**”

This book explores the contradictions between Islam and Christianity, highlighting teachings that the author considers misleading. It criticizes the historical development of the Islamic religion, asserting that its scriptures were written centuries after Muhammad’s death and are not divinely inspired. The author contrasts Islamic teachings on salvation, the oneness of God, and the rejection of Jesus’ crucifixion with Christian doctrines centered on Jesus’ sacrifice and resurrection. This book encourages Muslims to consider Christian truth claims and warns of the spiritual dangers posed by Islamic teachings.

I appreciated the historical background on Muhammad’s life and the development of the Quran, which helped me see how these beliefs evolved over time. This book breaks down Islamic faith without judgment, instead offering truthful comparisons that clarified many misconceptions I had. I enjoyed how it outlined Islamic terms like “Halal,” “Sharia,” and “Jihad,” providing context that is often missing in mainstream discussions.

Another aspect of the book I liked was how it talked about the need for discernment concerning cults and false prophets. By comparing Islam’s doctrines, such as the abrogation of doctrine and the lack of accountability for sin, with the unchangeable and God-ordained Bible, the book aids readers in identifying satanic deceit. This theme is crucial for spiritual safety, as it affirms that any religion adding to or subtracting from God’s established Word is fundamentally false.

This book translates theological differences into a sharp ethical boundary. The author uses vivid examples of hypocrisy within radical Islam, such as Osama bin Laden’s private life contradicting Sharia Law, to emphasize that mere adherence to religious rules is insufficient.

In addition, readers get to understand that uttering memorized prayers five times a day is less valuable than seeking a genuine connection with God through a single heartfelt prayer.

This one shift highlights the paramount importance of grace and mercy over works, which defines the Christian’s daily walk.

# “REVIEW 7”

This provides a detailed comparison between Islam and Christianity, emphasizing fundamental doctrinal differences. It questions the authenticity of the Quran and Hadiths, suggesting they are later fabrications disconnected from the true historical timeline. The author reiterates Christianity’s biblical accuracy, focusing on Jesus’ death, resurrection, and the path to salvation through faith in Christ. This book also warns about Islam’s teachings on jihad, infidels, and the radicalism within the religion. The core spiritual theme is the absolute exclusivity of Christian salvation. The book asserts that Jesus Christ is the sole way, the truth, and the life. It provides unshakeable assurance that eternal life is a gift achieved solely through Christ’s atonement on the cross.

I liked how this book made complex aspects of Islam easy to understand for someone like me, who is curious but not well-versed in religious studies. The section of terms like “Aqeedah” and “Surah” was very educational, and I liked the way the author highlighted biblical truths versus Islamic teachings. The comparison chart between Christianity and Islam was particularly helpful, offering a quick and clear differentiation of doctrines. I also found the historical insights into Muhammad’s life intriguing, giving me a better context about how Islam developed. I relished the section that talked about the characteristics of the Godhead because it was well detailed, and I grasped a lot from it. I was happy to see footnotes in almost all parts of the book because they provided further information and references. It was indeed a thoughtful addition to the book and made my reading experience more pleasant.

This book provides a defensive stance, exposing Islam as a potential cult based on its controlling tactics and questionable origins, giving Christians confidence in the historical validity of their faith. For the average reader, this means translating abstract concerns about spiritual wars into vigilance and knowledge. The practical message is simple: secure your salvation by believing in Jesus Christ, the Son of God, who offers eternal life, rather than relying on deeds or a fabricated religious path.
