

BUSINESS INFORMATION SYSTEMS

This 16-week IIE-endorsed online short course in Business Information Systems will introduce you to general business and information technology practices. It will give you a foundation of knowledge to build on if you wish to complete additional business or information technology specialisation courses. The purpose of this course is to introduce you to business information systems.

The course covers the following topics:

- Information systems in the organisation
- The value of information systems
- Hardware and software
- Databases
- Communication systems
- Networks
- Information systems applications
- Transaction processing systems (TPS)
- Enterprise resources planning (ERP) systems.
