SEDONA TECHNOLOGIES

PRODUCT OVERVIEW

DETECT & RESPOND - ENDPOINT

Sedona **Security enables** dealers to deliver a complete, end-to-end cyber security offering without having to build and maintain in-house operations. The solution combines powerful software with a suite of SOC services to deliver both foundational security and highly advanced protections for SMB customers—including endpoint management, SIEM, advanced threat intelligence and the capabilities and reporting required to ensure compliance in modern business environments.

Key Features

Detect & Respond – Endpoint is the most complete and sophisticated solution for threat detection and attack remediation. Powered by SentinelOne, it provides Sedona's SOC-supported endpoint monitoring, building on foundational security to rapidly identify and halt even the most troublesome attacks, minimizing harm and reducing risk to client environments.

Simple Dealer IT Operations Powered by Advanced SOC Expertise
Easily implement advanced operations without the need for in-house security expertise. The complete Sedona SOC analyzes quarantined applications and files, reducing false positive and ensuring comprehensive protection. It delivers a powerful service to help you overcome the significant labor challenges associated with providing managed security services.

Threat Detection
Rapidly identify thousands of variants of viruses, malware and the root causes of malicious behaviors by quickly diagnosing source processes and programs.

Respond and Remediation
Quickly respond to detected ransomware variants by leveraging robust rollback functions through comprehensive tracking of changes at the endpoint, restoring it to an acceptable risk state.

Next-Generation Endpoint Security
Detect & Respond – Endpoint utilizes the SentinelOne* platform, a company that has secured a patent from the U.S. Patent & Trademark Office (USPTO) for its unique malware remediation technology. This solution incorporates the industry's most innovative prevention, providing visibility into the root causes and origins of the threat, reversing the malicious operations and remediating them at an agile speed, if needed.

* SentinelOne offers a $1M ransomware warranty that dealers can leverage to deliver true peace of mind to their entire dealership

In extreme cases, the SOC will rapidly respond, remediate and restore system and data access
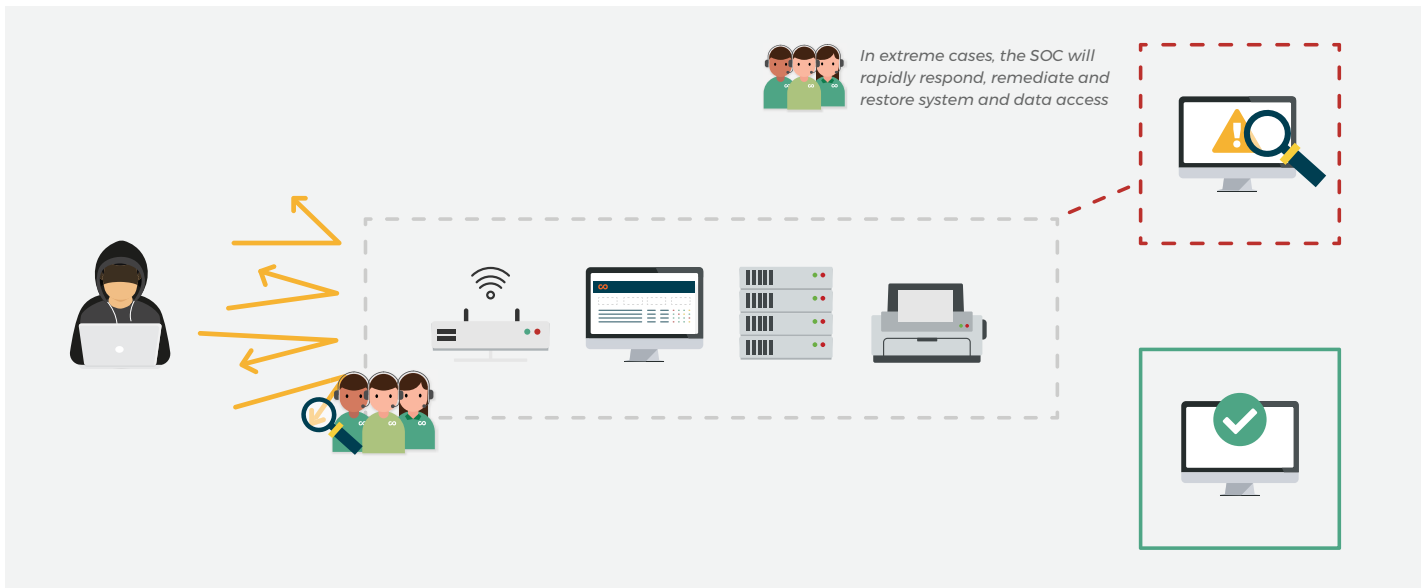

Empowering John Deere Dealers to Bridge the Security Skills Gap

Detect & Respond - Endpoint is a powerful service that can help you overcome the significant labor challenges associated with delivering managed security services. The key responsibilities of the SOC within *Detect & Respond - Endpoint* are:

1. Constantly monitoring and analyzing end-user environments to effectively protect against threats across endpoints and networks.

2. Identify advanced malware, exploits and script-based stealth attacks utilizing attack forensics and intelligent automation.

3. When confirmed malicious attacks are in progress, it rapidly activates remediation steps including scrubbing the system of any remnants of an attack, such as processes or registry keys created.

4. In extreme cases, the SOC will roll back the system to restore the system and data access.

5. Partner outreach for clarification and progress updates, as needed.
