Dear parent/Guardian,

You have arranged for your child to have a physical examination done at this office for the purpose of his/her participation in sports. This year the legislature passed legislation requiring the physician to rule out and guarantee safety from cardiac problems. No physician can completely guarantee such a situation. Please read the following, which summarizes the problem. Please sign and return along with your permission to complete the physical.

Preparticipation physical examination cannot guarantee or accurately predict that your child is risk free. It is well known and understood that certain sports produce injuries and that some cardiac anomalies may be present even with normal results from routine screening tests. Therefore, normal results from routine screening should not be interpreted as indicating that he/she is free from risk or that all potential cardiac anomalies have been ruled out.

I have read and agree with the above statement.
