

Android Freestanding Digital Posters

50" | 55"

Show-stopping digital advertising totems with giant tablet styling

Giant Freestanding Tablet

The tempered glass face, rounded corners, super slim perceived depth, aluminium surround and narrow border around the screen give a captivating tablet-like aesthetic. They also protect the internal components from potential damage in public spaces.

Integrated Android Media Player

The built-in Android media player allows you to easily run and update on-screen content via a website, our own online CMS platform or any other compatible third-party software.

24/7 Commercial Use

Internal Locker/AV Inputs

450cd/m² IPS Panel

Lightweight Design

Integrated Castors

Free Scheduling Software

Low Power Consumption

3-Year Warranty

Lifetime Tech Support

Black Version Available

Other Features

Internal Locker

Having a lockable compartment in the rear of the display with space to fit a small PC or media player means running the screen from an external source is easy – simply use the HDMI or VGA and 5mm audio inputs. This device can be powered from inside the locker with no need for additional power cables.

450cd/m² IPS Panel

Commercial grade IPS technology ensures incredible image quality and colour depth with no fall-off in colour accuracy, as well as achieving ultimate lifelike colour from an ultra-wide viewing angle in portrait orientation.

24/7 Commercial Grade

Designed for continuous use in public spaces, these displays utilise commercial grade LCD panels, LED backlights and internal components. This means they can run 24/7 for over 70,000 hours. To avoid tampering, they also have no external buttons or controls.

Easy Manoeuvrability

Thanks to the lightweight design, integrated castors and recessed rear handles, these displays offer a portable solution that can be easily moved around. For more permanent installations, the retractable feet can be used to keep the display in place.

Built-In Speakers

Take your digital signage solution to the next level by adding an audio element using the two integrated slimline speakers.

Scheduling Software

These displays come with optional scheduling software for displaying different content at different times of the day. If you prefer to keep it simple you can update the screen directly without using the software.

Power Timer

The eco-friendly power timer allows you to assign daily or weekly on and off times for your screen meaning that it is only in use when it needs to be; improving your environmental efficiency.

Black Version Available

Although the standard white model offers a clean, modern aesthetic, if you're after a more classic look there is also a piano black version available upon request.
