# OVERVIEW

- Define immersive and outline benefits
- Explore different technologies to achieve an immersive experience
  - AR
  - VR
  - Projection Mapping
  - LED (3D + XR)
- Look at the past, present, and future of immersive experiences in attractions
- Discuss the different steps for temporary and permanent implementation

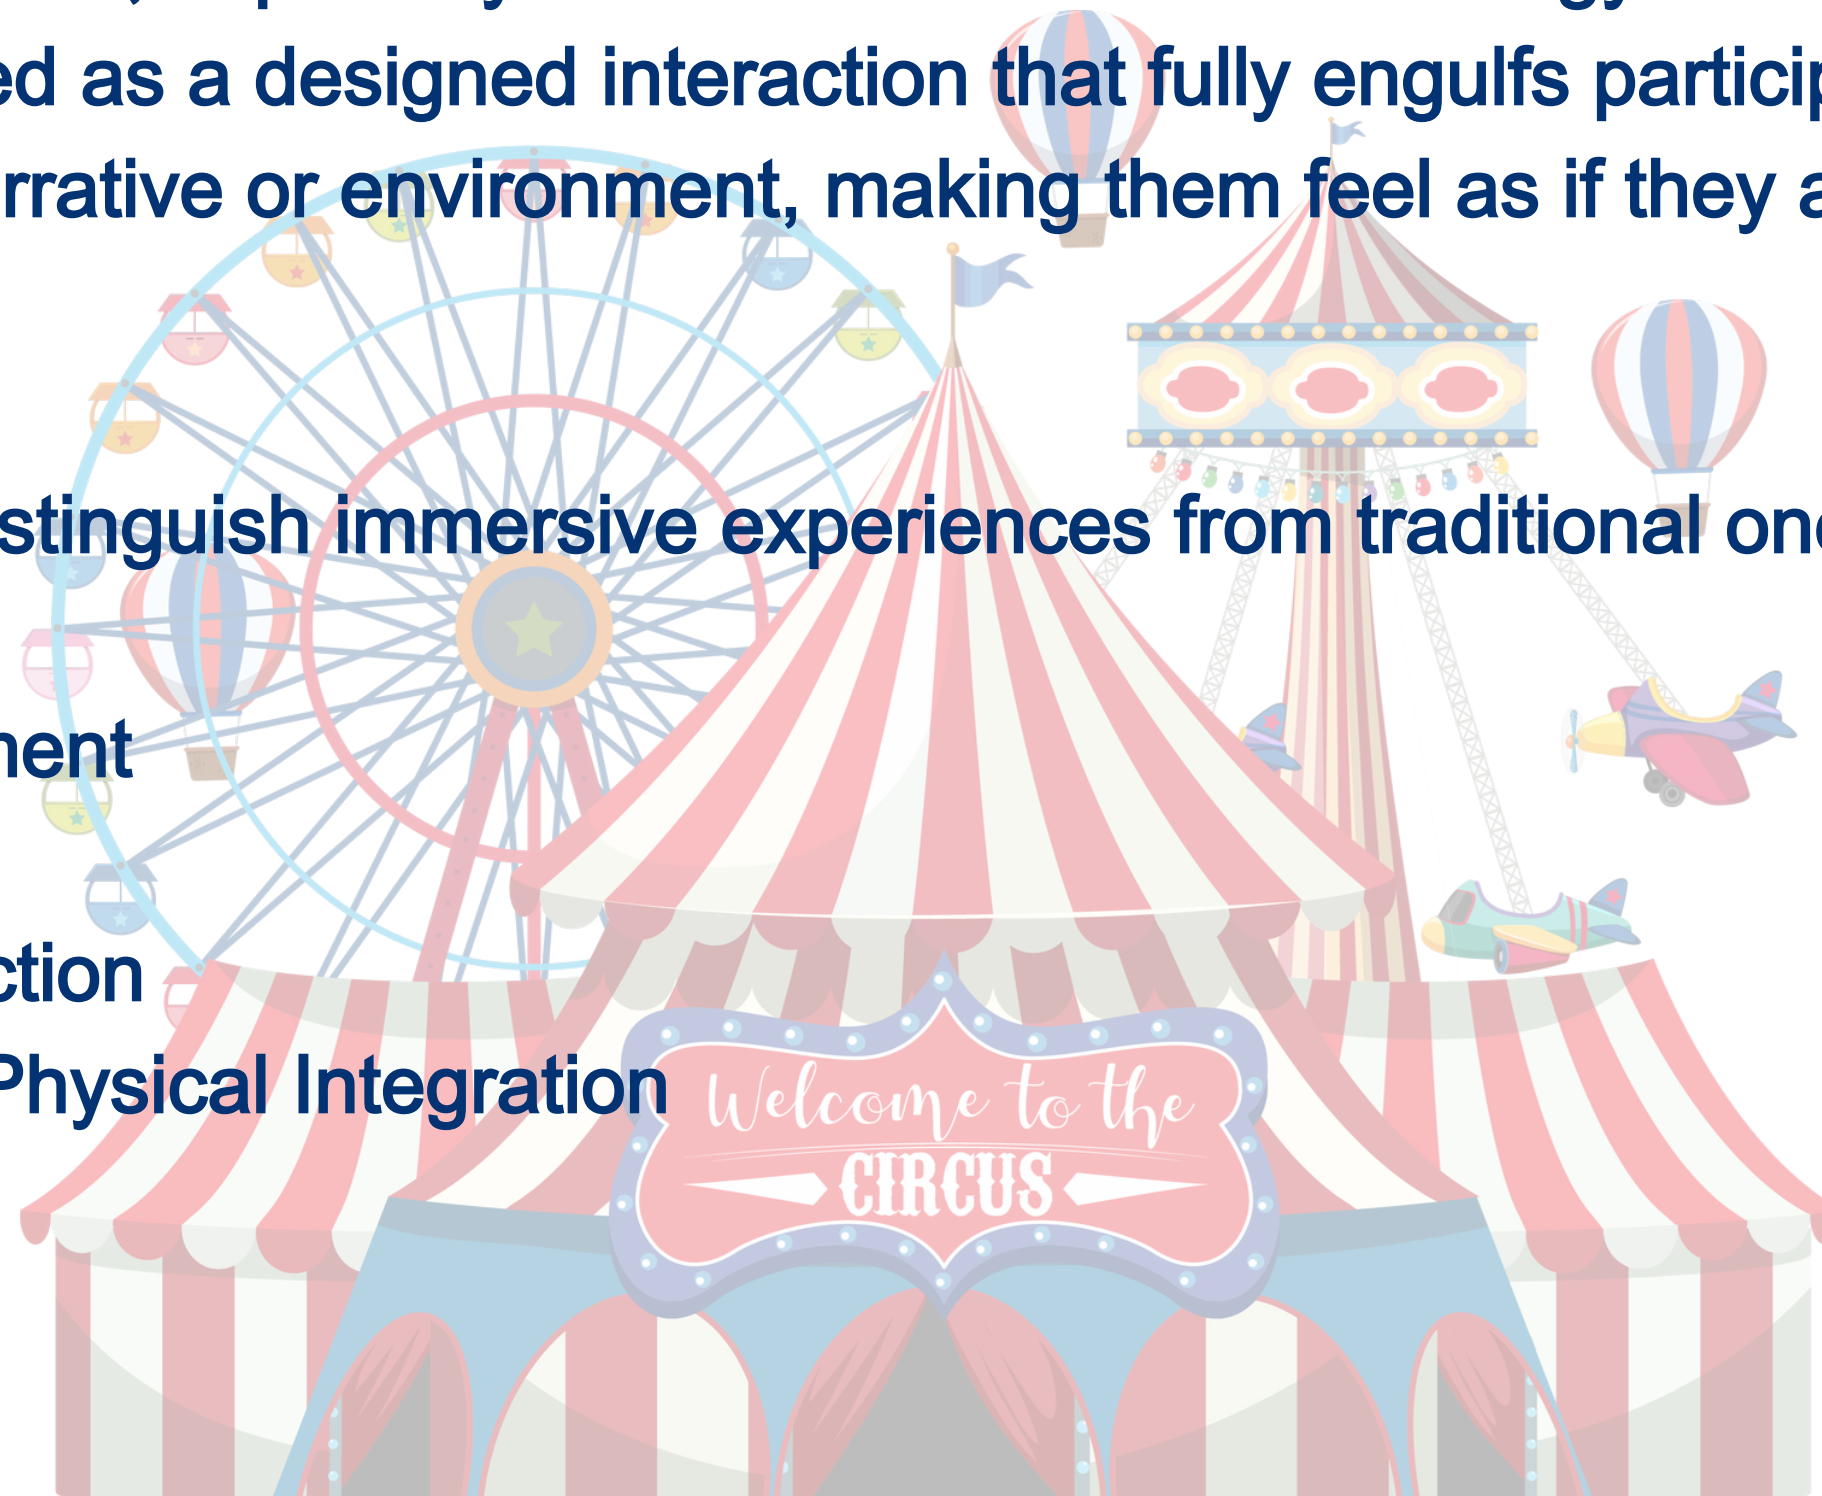

# DEFINITION

An immersive experience, especially within the realms of technology and user engagement, is defined as a designed interaction that fully engulfs participants in a multi-dimensional narrative or environment, making them feel as if they are part of another reality.

Characteristics that distinguish immersive experiences from traditional ones include:

- Interactivity
- Sensory Engagement
- Spatial Presence
- Emotional Connection
- Technological or Physical Integration

# PRESENT

# FUTURE

- 
- Personalized, interactive storytelling: Attractions will remember guests and adapt based on past behavior, choices, and profiles.
  - Extended Reality (XR) merging Real and Digital: Deeper integration of AR/VR/MR to layer digital interactivity over real-world spaces.
  - AI-Driven Live Experiences: AI-powered characters (physical or digital) that converse, adapt, and remember.
  - Gamified Attractions and Entire Lands: Entire themed lands become fully interactive, gamified playgrounds.
  - Seamless Immersive Infrastructure: Immersion won't just be in rides—it'll be everywhere.

# IMPLEMENTATION

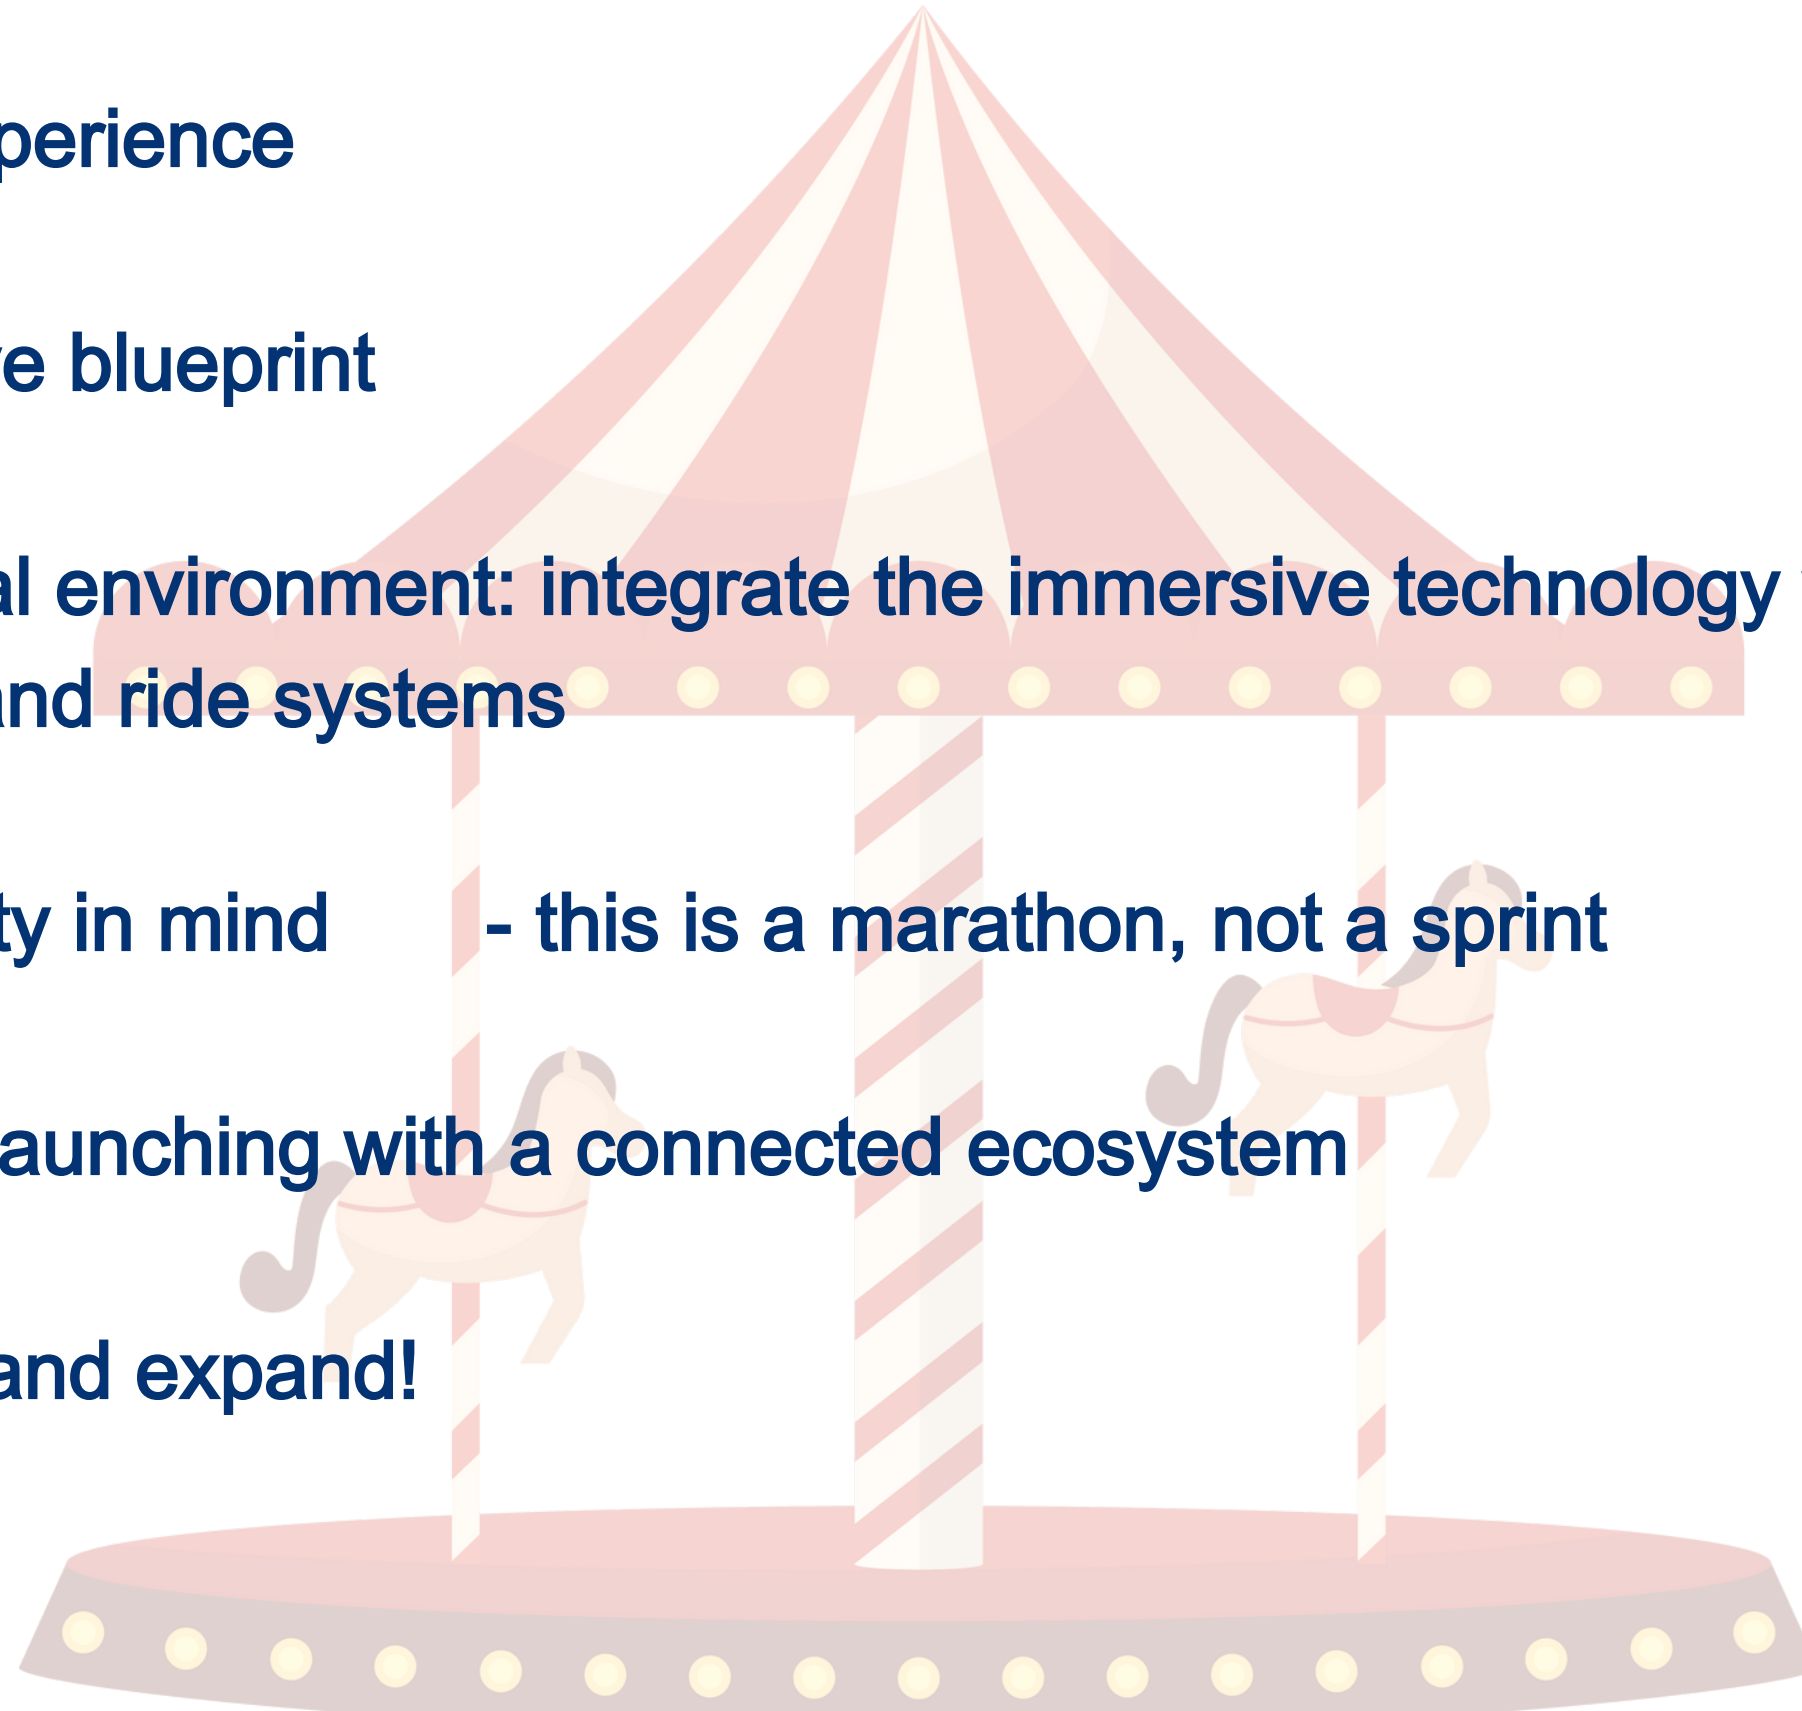

- Choose a strong, simple narrative
- Design a modular, scalable physical set
- Incorporate technology that fits your story and space
- Add interactivity
- Scavenger hunts, mystery   -solving, or live actors giving quests.
- Create a beginning, middle & end
- Build in a shareable moment

# IMPLEMENTATION

- Define the core experience
- Create the narrative blueprint
- Design the physical environment: integrate the immersive technology with the guest mechanics and ride systems
- Build with scalability in mind - this is a marathon, not a sprint
- Training staff and launching with a connected ecosystem
- Maintain, refresh, and expand!

# KEY POINTS

- Start with a story
- Keep guest experience top of mind and build to your attraction's demographic
- Begin small and scale up
- Find a good team to work with
- The world is your oyster with immersive technology

A vibrant, stylized illustration of a fairground. In the background, a large Ferris wheel with blue and orange spokes and pink and yellow gondolas. In the foreground, there's a carousel with white horses on the left, a striped tent with a yellow flag on the right, and a small booth with a striped awning in the center. The text "THANK YOU" is written in a dark blue, sans-serif font, and "QUESTIONS?" is written in a larger, bold, dark blue, sans-serif font, both centered over the illustration.

THANK YOU
