

# Field Nurse Case Manager (RN) – Training Provided

**A.B. Case Management LLC** is seeking a compassionate, motivated **Registered Nurse (RN)** to join our growing team as a **Field Nurse Case Manager** serving **Missouri and Kansas**.

If you're interested in transitioning into case management, this is an excellent opportunity. We provide comprehensive training and mentorship to help you build a successful career in this rewarding specialty.

As a Field Nurse Case Manager, you'll coordinate medical care for injured workers, helping ensure they receive appropriate treatment while supporting safe and timely return-to-work outcomes. This role combines clinical expertise, patient advocacy, care coordination, and field-based assessments.

## Position Responsibilities

### Clinical Case Management

- Assess injured workers through medical record reviews and on-site evaluations.
- Develop, implement, and monitor individualized treatment and rehabilitation plans.
- Evaluate medical progress and recommend appropriate care.
- Coordinate safe and timely return-to-work plans with treating physicians and employers.

### Care Coordination & Communication

- Serve as the primary liaison between injured workers, healthcare providers, employers, insurance adjusters, and other stakeholders.
- Attend medical appointments to facilitate communication and support treatment planning.
- Educate injured workers regarding treatment plans, rehabilitation, and recovery expectations.
- Advocate for medically appropriate care while promoting cost-effective treatment solutions.
- Ensure treatment plans comply with workers' compensation guidelines and state regulations.

### Documentation & Compliance

- Complete accurate case documentation and reports within **24 hours** of case activity.
- Prepare reports for insurance carriers, attorneys, employers, and other authorized stakeholders.
- Maintain compliance with HIPAA, state workers' compensation regulations, and company policies.

## Field Responsibilities

- Travel to healthcare facilities, workplaces, and injured workers' homes as needed.
  - Conduct workplace assessments and collaborate with employers on transitional or modified-duty programs.
  - Build strong professional relationships with providers and clients throughout the recovery process.
- 

## Qualifications

### Required

- Active Registered Nurse (RN) license in **Missouri and Kansas** (or ability to obtain both licenses).
- Minimum of **2–3 years** of clinical nursing experience.
- Valid driver's license with the ability to travel throughout Missouri and Kansas.
- Strong assessment, documentation, organizational, and time-management skills.
- Ability to work independently in both field and remote settings.
- Proficiency with electronic medical records (EMR) and Microsoft Office applications.

### Preferred

- Experience in workers' compensation, occupational health, rehabilitation, disability management, or case management.
  - Certified Case Manager (CCM)
  - Knowledge of workers' compensation laws and insurance processes.
- 

## Core Competencies

- Excellent communication and interpersonal skills
  - Critical thinking and sound clinical judgment
  - Strong problem-solving and organizational abilities
  - Ability to coordinate care among multiple stakeholders
  - Patient advocacy and relationship building
  - Attention to detail and accurate documentation
  - Ability to prioritize and manage multiple cases independently
-

# Why Join A.B. Case Management?

- **No prior case management experience required—we provide training and mentorship.**
- Opportunity to transition from bedside nursing into a professional, autonomous role.
- Meaningful work that positively impacts injured workers' recovery and return to work.
- Flexible combination of field-based and remote work.
- Supportive, collaborative team environment with opportunities for professional growth.
