Pre-Pest Management Advice

At Tropical Pest Control, we concern ourselves with yours and your children's wellbeing. Our aim is to ensure that our pest management services are safe, effective and cause minimal disturbance to the running of your day to day life.

We have provided the below information to ensure you understand what we will be doing and any precautions you should adhere to.

Some of the following products may be used to protect your business from unwanted pests. Please note that the chemical used depends on which pests you have. After our treatment, we will give you another notice detailing exactly which of the following APVMA approved pesticides we used around and in your home.

Full Product Name	Active Constituent	Concentration of Active	Potential areas to be applied too
Seclira WSG Insecticide	Dinotefuran	400g/kg	Broad spray to skirting boards and around furniture
Demand Duo	Lamda-Cyhalothrin Thiamethoxam	38g/L 125g/L	Broad spray to skirting boards and around furniture
Termidor	Fipronil	100g/L	Outside perimeter of buildings, around garden edges and in shed
Country Fipronil	Fipronil	100g/L	Outside perimeter of buildings, around garden edges and in shed
Biflex Ultra Lo Odour	Bifenthrin Liquid Hydrocarbons	100g/L 533g/L	Outside perimeter of buildings, around garden edges and in shed
Advion Ant Gel	Indoxacarb	0.5g/kg	In kitchen or where ants are
Maxforce Cockroach Gel	Hydramethylnon	16.5g/kg	In kitchen or where cockroaches are
Dragnet Dust	Permethrin 40:60	20g/kg	In drains and/or in roof void

What to expect after the treatment is completed:

The areas we will treat may be wet for up to an hour. We find if the house is open and a breeze is flowing this time can reduce to roughly as long as it takes when you mop the house. We recommend that you do not enter until the areas sprayed are dry and well ventilated.

We ask that if you have an ant/cockroach problem that you do not mop for up to 7 days. This way the treatment has the best chance to work before mopping starts to dilute the treatment. If your home does not have a significant issue, we ask that you do not mop for at least 3 days. It can take up to 28 days for the pest treatment to come into full effect.

You will likely see dead pests (particularly cockroaches) around the house for the next few months. If you see these, please clean them up as they will attract further pests as they are a food source.

Given Mackay's climate, every now and then you will see ants, cockroaches and/or spiders inside the house. They can come in from under the ground coverings (grass/pavers etc), gardens and/or fly in on the breeze and unfortunately, we cannot stop them from breeding in these areas outside. Please be assured that the treatment inside the house will continue to deal with these. If however, you are seeing more than you are comfortable with, please contact us and we can do a "top up" treatment.

General Precautions:

- At all times please follow the instructions of the Pest Control Technician;
- You must let us know if you or any of your family members have allergies or other concerns;
- Ensure that any open or un-sealed food containers and exposed foodstuffs are placed into a sealed container and stored in either the refrigerator or a cupboard;
- All food utensils and accessories should be stored away from open bench areas;
- All personal hygiene accessories, such as toothbrushes, glasses etc should be stored away in cupboards;
- All children's toys, sporting gear, water containers should be away from treatment areas;
- Remove pets food and water containers away from treatment areas;
- Cover bird cages, reptile enclosures and fish tanks until treatment is completed;
- During the course of the treatment ensure yourself and your family members do not come into contact with treated areas until dry and ventilated;
- Do not touch or disturb any bait, baiting devices or monitoring devices placed by us.

We appreciate your time and thank you very much for allowing us to look after your home. If you have any family members or friends who you believe could benefit from our help, please pass on our details.

Regards,
