Embassy Surgery Center

Infection Prevention and Patient Safety Statement

Embassy Surgery Center is committed to providing safe, high-quality healthcare services in an environment that promotes patient safety, infection prevention, and continuous quality improvement.

Our Commitment to Infection Prevention

Embassy Surgery Center follows evidence-based infection prevention practices designed to reduce the risk of healthcare-associated infections and protect patients, visitors, physicians, and staff.

- Hand hygiene practices consistent with national guidelines
- Sterilization and high-level disinfection of medical equipment
- Environmental cleaning and disinfection of patient care areas
- Infection surveillance and monitoring activities
- Employee health and vaccination programs
- Compliance with applicable CDC, CMS, OSHA, and accreditation standards
- Ongoing staff education and competency validation

Our Commitment to Patient Safety

Patient safety is a core value at Embassy Surgery Center. We promote a culture of safety that encourages communication, reporting, learning, and continuous improvement.

- Patient identification verification processes
- Procedure and surgical site verification protocols
- Medication safety practices
- Incident and near-miss reporting
- Root cause analysis and corrective action planning
- Emergency preparedness and response training
- Quality Assessment and Performance Improvement (QAPI) activities
- Ongoing monitoring of clinical outcomes and patient satisfaction

Continuous Improvement

Embassy Surgery Center regularly reviews quality, safety, and infection prevention data to identify opportunities for improvement and ensure compliance with regulatory and accreditation requirements.
