AGENT USE ONLY

NCD
SPREADING THE SMILE

Walk into every renewal call knowing what changed.

NCD built an online tool that compares the dental benefits in individual Medicare Advantage plans for 2026 and 2027, so your agents can spot changes and explain them with confidence.

Click Here to Access the Tool

5,049
CY2027 plans you can look up, SNPs included

16
dental categories compared, preventive through orthodontia

1,039
CY2026 plans that do not appear in the CY2027 filings

994
plans new for CY2027

Why it matters this AEP

Clients often tell agents their Medicare Advantage plan includes dental, but few know what that covers. A plan can keep its dental benefits and still lower the annual maximum, raise copays, or drop a category such as implants or dentures.

The tool shows which of those happened on a given plan, using CMS data, so your team knows before the renewal call.

Built on public CMS data, with its limits stated up front.

What your agents will see

What changed
Changes to the dollar maximum, deductibles, cost sharing, frequency limits and prior authorization, plus any categories added or dropped.

Each of the 16 dental categories
Coverage, frequency limit and highest cost share for both years, with a short definition one click away.

Plan status
Continuing, renamed, new for 2027, or not in the CY2027 filings, and a note when a buy-up dental rider exists.

How your team can use it

Before a renewal call
Look up a client's plan by ID or name and check what changed.

When a plan is ending
Clients choosing a new plan will compare dental. Be ready for that conversation.

For notes and sharing
Print the comparison, export it to CSV, or send a colleague a direct link.

> There's always a ton of confusion over how embedded dental plans work and how they change each year. We wanted to ***empower agents*** who may not have the dental expertise to parse all the different changes.

Look up a client's plan

Independent educational resource. Provided by NCD for informational purposes only. NCD is not affiliated with or endorsed by Medicare, CMS, or any Medicare Advantage organization, and does not offer, sell, or enroll individuals in the Medicare Advantage plans shown. Information is derived from publicly available CMS data (PBP and CPSC files) and is not a substitute for official plan documents. Not for use in making enrollment, disenrollment, or coverage decisions. Verify all benefits, service areas, and networks with the plan or Medicare.gov. The tool covers benefits included at no added premium and lists dental categories, not individual procedures. A ZIP code or state search lists plans whose service area includes that state, so agents can confirm county coverage by checking the plan's county list against the client's ZIP. Member counts are a September 2026 snapshot. Agents should follow their carrier and CMS marketing requirements when using this material with clients.
