

TOWN OF MAYODAN

FOR IMMEDIATE RELEASE

New Stop Sign Installations Completed at Mayodan Intersections

Mayodan, NC – October 12, 2026

The Town of Mayodan would like to inform motorists that the installation of additional stop signs at several intersections throughout town has been completed.

As previously announced, the following intersections have been updated:

Four-Way Stop Intersections:

- West Jackson Street and North 10th Avenue
- North 11th Avenue and Virginia Street
- North 7th Avenue and Roach Street

Three-Way Stop Intersection:

- North 7th Avenue and Wilkins Street

MOTORISTS ARE URGED TO USE EXTRA CAUTION AND PAY CLOSE ATTENTION TO THE NEW STOP SIGNS.

Many drivers travel these streets daily and have become accustomed to passing through these intersections without stopping. With the additional stop signs now in place, motorists must be especially mindful of these changes.

Drivers are reminded to approach these intersections cautiously, observe all posted stop signs, and come to a complete stop where required. **Do not rely on habit or assume an intersection remains the same simply because you have traveled it for years.**

These improvements are part of the Town of Mayodan's continued efforts to enhance traffic safety and reduce the potential for collisions.

The Town appreciates everyone's cooperation and encourages motorists to remain alert as our community adjusts to the newly installed stop signs.

Town of Mayodan

Committed to a Safer Community
