

FLAGSTONE PAVERS®

QUALITY & STRENGTH INTERLOCKED

Product Catalog Vol. XXIV

flagstonepavers.com

ABOUT US

What makes Flagstone America's Premier Paver?

MATERIAL

Flagstone Pavers meet or exceed the ASTM C-936, standard specifications for solid interlocking concrete paving units. We have the best multi-color blending system in the market today. Our innovative full-color through process, creates the strongest possible product, while maintaining a smooth concrete surface. So you get the best of both worlds. All with an unsurpassed warranty.

DENSITY

Flagstone Pavers has developed a revolutionary color-through batch design that provides optimum strength and durability — without the problems often encountered in the veneer process offered by other manufacturers.

This innovative system eliminates separation between the surface and base material and stops premature wear.

CONSISTENCY

Flagstone Pavers' renowned batch design continues to set the standard for the industry.

While other paver manufacturers may also use the color-through process, many do not add sand and properly adjust their cement and color loadings, which can result in the color looking faded compared to Flagstone's products.

SERVICE

We are committed to providing outstanding service.

With our architectural design guide, photo gallery, and sample boards, you'll find it easy to select the right paver solution for your project. And our comprehensive website puts all of our resources at your fingertips.

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Flagstone Pavers products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or free-standing walls in many conditions. Structural design and analysis should be provided by a qualified engineer.

NOTICE OF LIMITED WARRANTY: the terms of the Limited Warranty applicable to our products can be found at flagstonepavers.com or can be obtained by sending a written request to c/o FLAGSTONE PAVERS, 9070 Old Cobb Road, Brooksville, FL 34601.

PRODUCT GUIDE

RUMBLESTONE®

Flagstone's innovative RumbleStone® provides a set of rustic building blocks for your outdoor hardscape projects. Simple to complex, large or small, the possibilities for creative expression are as far and wide as your imagination. The six tumbled RumbleStone® sizes modulate in all dimensions and can be assembled in a variety of configurations and orientations. In addition to simple running bond patterns, the stones can be easily stacked with insets, moved forward and backward, horizontally and vertically, for more aesthetically pleasing visual relief and texture. Also, the 3.5-inch base module works with common dimension lumber for benches and pergola posts. Stack 'em up and bond with construction adhesive.
