Supporting parents and carers in planning their future

Who is Parent Pathways for?

Parents and carers who:

- have a child aged under 6
- are not in paid employment

How we can help

Parent Pathways is a gateway to improved resources and services for parents with young children. Our qualified Parent Mentors will work with you to help you connect with local community activities and programs, identify courses that will provide you with new skills and qualifications, and help you connect with family friendly employers.

Some examples of services on offer include:

- practical financial support
- work with a mentor to set your goals
- connect with community groups
- learn a new skill
- get a driver's licence

You're Not Preparing for One Job. You're Preparing for a Lifetime of Opportunity.

The world of work is changing faster than ever.
Here's what every student, apprentice and job seeker should
know.

The careers of tomorrow are already beginning to emerge. Artificial intelligence is becoming as commonplace as the internet, renewable energy is reshaping Australia's economy, and advances in healthcare, robotics, manufacturing and digital technology are transforming the way we live and work.

While some jobs will change or disappear, many more will evolve, and entirely new careers will be created. The people who succeed won't simply be those with the highest qualifications they will be those who are willing to learn, adapt and embrace change throughout their working lives.

Research from the World Economic Forum and Jobs and Skills Australia, all point to the same conclusion: curiosity, adaptability and lifelong learning will be among the most valuable career skills of the future.

So instead of asking yourself,
"What job do I want?"
ask a different question:
"What skills will always be
valuable?"

Don't Chase Jobs. Chase Skills.

Jobs will continue to change, but the skills you develop today can stay with you for life. Electricians now use digital diagnostics, farmers rely on drones and data, nurses work alongside advanced medical technology, and builders, teachers, designers and business owners all use digital tools that barely existed a decade ago.

Technology isn't replacing people it's changing how we work. Artificial intelligence is helping trades prepare quotes, supporting doctors with diagnosis, improving farming practices and helping businesses become more productive. The future isn't about competing with technology; it's about learning how to work alongside it.

At the same time, the qualities that make us human are becoming even more valuable. Communication, creativity, teamwork, resilience, leadership and empathy are skills that technology can't replace. As workplaces continue to evolve, these strengths will become some of your greatest career advantages.

FUTURE OF WORK BY THE NUMBERS

170 MILLION

New jobs are expected to be created globally by 2030 as industries continue to evolve.

39%

Of today's core workplace skills are expected to change by 2030.

22%

Of current jobs are forecast to undergo significant transformation over the coming decade.

AUSTRALIA'S FASTEST GROWING OPPORTUNITIES

Healthcare
Renewable Energy
Advanced Manufacturing
Digital Technologies
Construction
Care Economy

Jobs and Skills Australia, OECD,
CSIRO

Imagine Your Future

Imagine designing AI-powered farms that feed millions, building Australia's renewable energy future, transforming healthcare with new technology or creating a career that doesn't even exist today.

The career you'll be most passionate about may not have been invented yet and that's something to be excited about.

WHAT EMPLOYERS ARE SAYING

Employers were asked one simple question:

‘What’s the one skill every young person should start developing today to succeed in the future of work’

Although they represent different industries their answers shared a common theme: Keep learning, stay adaptable and be curious!

SKYLAR | Chris Hales | Sales Manager

“At Skylar, we believe adaptability is the single most important skill anyone can develop for the future of work. The renewable energy sector is evolving at an unprecedented pace, with new technologies, changing safety standards, digital tools and different ways of working continually reshaping the industry. Technical skills will always be important, but the people who build long-term careers are those who remain curious, embrace continuous learning and are willing to adapt as the industry evolves. That's why our focus isn't just on delivering qualification, it's on helping people develop the mindset and capability to keep learning throughout their careers.”

WestVic Dairy | Sheeraz Ahmad | Extension Advisor

“One of the most important skills for the future of work is the ability to learn, adapt and make informed decisions using data. In farm business, no two seasons are the same, so success depends on interpreting information, evaluating options and responding to changing conditions with confidence. Through my work with Dairy Australia/WestVic Dairy, I see that farmers who combine strong financial understanding with a willingness to embrace new technologies and continuous learning are best positioned to build resilient and profitable businesses.”

Butler | Jack Reid | Senior Client Manager

“If I had to pick one, it would be adaptability, the willingness to keep learning as the tools and expectations around you change. In accounting we're seeing more of the routine work handled by technology and automation, which means the real value now sits in judgement, problem-solving and the ability to explain things clearly to clients. My advice is to get comfortable with change rather than resistant to it, stay curious about the tools coming into your field, and build the people skills that no software can replace. Those are the qualities we look for at Butler, and they're what set people up to grow with us.”

Accenture | Bree White | ANZ Early Careers Recruitment Lead

“Adaptability is one of the most important skills anyone can develop today. The jobs, tools and technologies we'll be using in five years may look very different to those we use now, so the ability to learn, grow and embrace change is what will set people apart. At Accenture, we've seen people from all walks of life build successful careers not because they had every skill on day one but because they stayed curious and kept learning. In a rapidly changing world, a growth mindset is your greatest career advantage.”

Hydrautech | Bessie Sealey

“Adaptability is the most valuable skill for the future of work. While technical expertise remains essential, the engineering trades are changing rapidly through automation, advanced manufacturing and digital technologies. At Hydrautech, our best Fitter and Turner apprentices are those who stay curious, keep learning and confidently adapt to new challenges while maintaining the high standards of craftsmanship the industry relies on.”

EY | Samuel Lyons | Associate Director - Service Delivery Centre

“If I had to pick one skill, it would be emotional intelligence. Many of the technical skills we learn today will evolve over time. The ability to read a room, build trust, handle conflict, and inspire confidence won't. As AI becomes better at solving problems, the people who stand out will be the ones who know how to connect with humans.”

FUTURE SKILLS AT A GLANCE

CURIOSITY

Ask questions and stay open to new ideas.

COMMUNICATION

Share ideas clearly and listen well.

ADAPTABILITY

Be ready to learn, change and grow.

EMOTIONAL INTELLIGENCE

Understand ourselves and connect with others.

LIFELONG LEARNING

Keep learning.... its your superpower.

TEAMWORK

Work well with others to achieve more.

PROBLEM SOLVING

Work well with others to achieve more.

CRITICAL THINKING

Work well with others to achieve more.

These are the skills that will help you succeed in any industry - today, tomorrow and for a lifetime!

WHAT EMPLOYERS ARE SAYING

Academy Training & Assessment | Paul James | CEO

"Critical thinking is an essential skill for young people because it enables them to analyse information, evaluate evidence, question assumptions, and make informed decisions. In an era where generative AI can instantly produce convincing text, images, and ideas, the ability to think critically is more important than ever. Young people must be able to distinguish between accurate and misleading information, recognise bias, verify sources, and use AI as a tool to support learning rather than replace independent thought. Employers expect new workers to be able to think critically and problem solve independently, and not to be too reliant on generative AI."

Early Learning Victoria | Lisa Smith | Workforce Coordinator - Regional West

"Good Communication is essential because early childhood educators need to talk clearly with young children, listen carefully to their needs, and build positive relationships with families and colleagues. Strong communication helps children feel safe, understood, and supported, which encourages their learning and development. Developing this skill early through teamwork, active listening, and speaking confidently can prepare someone for a successful career working with young children."

IMAGINE YOUR FUTURE

Designing AI-powered farms that feed millions.

Transforming healthcare with new technology.

Managing autonomous drone networks.

Working alongside intelligent machines.

Building Australia's renewable energy future.

Creating careers that haven't even been invented yet.

The career you'll be most passionate about may not have been invented yet, and that's something to get excited about.

Calacare | Josh Corcoran | Head of Strategic Partnerships & Business Growth

"The one skill every person should start developing today is adaptability. The future of work is changing faster than ever - technology, service models and community expectations are evolving and the people who thrive will be those who can adjust quickly, learn continuously and stay open to new ways of working. In the disability sector at Calacare, adaptability is essential. Every participant has unique needs, routines and goals and our team succeeds when they can respond with flexibility, curiosity and a willingness to grow."

DOBCEL | James Murphy | Talent Acquisition Partner

"I would say adaptability is key. The future of work will keep changing through technology, AI and evolving skills. The people who succeed will be those who stay curious, embrace lifelong learning and adapt to new challenges while continuing to grow. In education, that's critical because you're preparing young people for jobs and opportunities that may not yet exist."

Imagine Your Future - Ask yourself:

"What's the one skill I should start developing today to succeed in the future of work?"

The answer might just shape your future!

Article - Hart Futures - Images AI

A STRONG CAREER BUILT TOGETHER

Your career should challenge and develop you and result in something to be proud of.

At Brimarco, you'll play an active role in bringing innovative transport and mobile infrastructure solutions to the road. You'll contribute ideas, solve real-world challenges and have genuine input into projects from concept through to completion, working alongside some of the industry's most experienced designers, engineers and tradespeople.

With diverse projects, ongoing development and a supportive team that values initiative and craftsmanship, you'll have the chance to build your skills, shape your future and see the impact of your work across Australia.

**THIS COULD BE THE DECISION
THAT CHANGES YOUR LIFE.**

Every expert started as a beginner.

Every tradie...
Every business manager...
Every childcare educator...
...started by learning from someone who already knew how.

That's exactly what an apprenticeship or traineeship is.
You earn a wage, gain nationally recognised qualifications
and build real skills while working alongside experienced
people every day.

Just real work. Real experience. Real opportunities.

Where could it take you?

Nobody can answer that except you.
You might become a qualified tradesperson, run your
own business, manage a team, work anywhere in
Australia - or simply build a secure career doing work
you genuinely enjoy.

The first step is the same:

- Start learning.
- Keep showing up.

The rest is your story.

The BGT Difference

Finding an apprenticeship or traineeship is only the beginning.
Building a career is something else.

We don't simply match you with an employer and wish you luck.
We help you choose the right pathway, support you through
your apprenticeship or traineeship and stay beside you when
life or work becomes challenging.

For almost 40 years we've helped thousands of local people
build careers.

When you succeed, so do we.

**YOUR FUTURE DOESN'T START WITH A JOB.
IT STARTS WITH THE RIGHT PEOPLE BESIDE YOU.**

- ✓ Earn while you learn
- ✓ Gain a nationally recognised qualification
- ✓ Build skills for life
- ✓ Learn from experienced mentors

bgt.org.au

Where are seasonal firefighters based?

It doesn't matter if you're looking for a sea change, tree change or a job in your local community — with around 76 locations across Victoria, there's a seasonal firefighter position to suit you.

Have you considered the benefits of relocating to a regional community? Be it hiking, mountain biking or surfing, these opportunities are on your doorstep right across Victoria.

How do I apply?

Applications must be completed online at: jobs.careers.vic.gov.au/sffo

For more information you can contact:

- your local DEECA or Melbourne Water office
- the Aboriginal Employment and Cultural Strategy team on aboriginal@deeca.vic.gov.au (for general enquiries on Aboriginal employment)
- the DEECA Customer Service Centre on 136 186

Applications open in July each year and successful applicants start training in October.

Visit our website for more information or to register your interest in becoming a seasonal firefighter

Come work with us as a seasonal firefighter

FOREST FIRE
MANAGEMENT VICTORIA

What is a seasonal firefighter?

We employ several hundred seasonal firefighters (officially Seasonal Forest and Fire Operations Officer) on a full-time basis for a fixed term each year. They work alongside our permanent firefighting staff and help deliver land management activities and respond to bushfires and other emergencies.

We train three cohorts of seasonal firefighters each year:

- Firefighters
- Fire Support Officers
- Rappel Crews

In addition to emergency response, as a seasonal firefighter you'll play a critical role in helping keep Victoria safer through:

- ✓ mulching, mowing, slashing and spraying
- ✓ maintaining fuel breaks
- ✓ maintaining the public land road network
- ✓ fencing and trail maintenance
- ✓ planned burning.

You'll receive training and support relevant to the role you are performing. This may include operating plant and equipment including four-wheel-drives, chainsaws and firefighting equipment.

Employment occurs between October and May, dependent on seasonal requirements.

What do I need to become a seasonal firefighter?

If you like working outdoors and want to be part of a great team that helps protect the community and makes Victoria safer, apply to become a seasonal firefighter now.

If you have a great attitude and you're keen to learn new skills, this role could be perfect for you. We'll train you in everything you need to successfully perform the role.

You'll undergo a thorough selection process to make sure you meet the following requirements. You must:

- ✓ be an Australian citizen or have a visa which allows you to work in Australia
- ✓ be 18 years old as of 1 October
- ✓ provide a declaration and consent form linked to previous employment
- ✓ have a current National Police Check
- ✓ have a current manual driver's licence
- ✓ complete a medical and task-based fitness assessment (completed during the recruitment process)
- ✓ become an accredited general firefighter (as part of your training and induction).

As part of your emergency response role, you may be required to work outside of normal hours and on weekends and public holidays. You may be deployed to other locations.

We are committed to a diverse and inclusive workplace that reflects the Victorian community. For First Nations people, we have designated Aboriginal positions available.

What do you get as a seasonal firefighter?

As a seasonal firefighter, you'll have the opportunity to work in Victoria's great outdoors while receiving extensive training to hone your skills. You'll work alongside great people who are keeping Victoria safer.

- ✓ **Working outdoors:** You'll get to work outdoors, surrounded by nature in some of the most beautiful and remote parts of the state.
- ✓ **Teamwork:** You'll work closely with a diverse group of individuals including other firefighters and emergency responders and support staff to keep Victoria safer from bushfires.
- ✓ **Sense of purpose:** Being a seasonal firefighter brings a great sense of purpose and personal achievement knowing that your efforts contribute to protecting communities and the environment.
- ✓ **Skill development:** You'll receive extensive training in basic fire behaviour, safety protocols, plant and equipment operation and much more. The skills and experience you'll gain as a seasonal firefighter is a great start for a career in environment or emergency management. Many senior staff across DEECA started their career as a seasonal firefighter.
- ✓ **Travel opportunities:** Planned burning and emergency response deployments can occur anywhere across the state, providing opportunities to travel and work in different locations. Some of our former seasonal firefighters have been deployed to support firefighting efforts across Australia and internationally.
- ✓ **Earn and learn:** You will be paid to learn and develop your new skills in an industry where the opportunities are endless.
