C-Dax
C-DIT SPREAD

Putting your dollar where it needs to go

PRECISION YOU CAN RELY ON TO DELIVER YOUR FERT WITH MAXIMUM EFFICIENCY. RIGHT DOWN TO THE LAST KG.

C-DAX 6000 SPREADER

- Six (5.2m³) tonne capacity (Superphosphate)
- Optional GPS C-Dax Controller or XC3 controller & HawkEye available
- Eleven pre-loaded fertiliser rate options, including a custom option—no more charts!
- Electro Hydraulic belt control—no more slipping wheels!
- Self-lubricating bearings—no more greasing!
- Tandem walking beam axle as standard
- Automated Gate control; non-slip, chain driven, 800mm wide belt
- Robust, modern engineered, hot-dipped galvanised chassis
- Front-end loader side protection beams
- Superior nationwide in-field support

3026 / RRP FROM **\$57,995** +FRT+GST

"WITH XC3 SMART CONTROL WE CAN GET DOWN TO SINGLE KILOGRAMS IN ACCURACY"

"The accuracy of the C-Dax 6000 is a key point for us. We've been very impressed with how the spreader, combined with XC3 SmartControl, can get down to single kilograms in accuracy. Overall we're rapt with it."

DEAN ALEXANDER, WINTON, SOUTHLAND

"I'VE NEVER WORKED WITH ANYTHING THIS ACCURATE."

I was impressed with the ease of operation with the XC3 controller and its GPS guidance and rate control. It's wider belt, automated gate and rugged construction helped clinch the deal for me."

WARREN ROCHE, BUSH GROUND SPREADERS LTD (BGS), PAHIATUA

UPDATE JAN 23

Since Warren purchased his C-Dax 6000 in June 2020 he's put 15,000 tonnes through it!

NZ MADE & PROVEN

LOCAL SERVICE & SUPPORT

PROVEN

" WE LIKED THE IDEA OF USING MULTIPLE SMART PHONES FOR RECORDING & CONTROL."

"I had been working in the dairy industry in a hands-on management role on a large scale dairy farm in the Manawatu for many years, where part of my role was pasture management. We used the C-Dax Pasture Meter+ to achieve the weekly ride and I was impressed with the accuracy, ease of operation, and rugged construction. I feel it is a necessary tool for today's farming environment, so after moving to our family beef and dry stock unit in Dannevirke, we purchased the new C-Dax PM+App version.

We liked the idea of being able to use our smart phones to record and control the runs and have the option for multiple users rather than just one console and the convenience of uploading rides to HawkEye® directly from the phone.

The set up was easy and being able to get real live data and control in the palm of your hand is very useful.

We also like the assurance of the additional row of LED beam sensors. Knowing that we'll be notified automatically of any breaks so that we can arrange replacements while never having any interruption to our regular measuring schedule is a real bonus."

JOSH MITCHELL, OREANA FARMS DANNEVIRKE

SIMPLIFY & FUTURE PROOF COMPLIANCE REQUIREMENTS

Record, store & retrieve spread, spray & measure data whenever you need it. Always have proof of placement data available.

REDUCE YOUR STOCKING RATES & MAINTAIN PRODUCTION

Use your data to sustainably achieve reduced stocking levels while maintaining or increasing production.

REDUCE YOUR FEED EXPENSES

C-Dax Pasture Meter data allows you to take full advantage of oncoming surpluses & reduce your off-farm feed spend.

WORK WITH PROVEN ACCURACY YOU CAN RELY ON

With C-Dax's tried, tested & true accuracy you can sleep easy knowing that your data is always correct for proactive decisions & compliance.

UTILISE YOUR DATA TO MAKE BETTER & FASTER DECISIONS

Establish effective feed budgeting forecasts with predictive feed wedges. Know exactly how much you have & how much you need. Be fully prepared to take advantage of surpluses or optimum timing to reduce stocking.

"WE'VE GREATLY INCREASED THE EFFICIENCY OF OUR FARM."

"Never before have I made supplement in August, and without such accurate and timely information from the C-Dax Pasture Meter I would not have the confidence to do it. I find it very easy to use with data directly uploaded to HawkEye. We are very pleased with our purchase as it has greatly increased the efficiency of our farm."

THE SAGE FAMILY, C-DAX PASTURE METER+

GRASSCO SUPPLIES DATA FOR OVER 50,000 COWS & 30,000 SHEEP PER DAY

A big part of GrassCo's success is because the C-Dax staff are well informed on the product & easily contacted on the 0800 number. We're now running seven units, and provide data for 180 to 7,000 cow farms.

C-Dax is always approachable, and our business relationship has developed over 13 years, starting in Southland and moving into Mid Canterbury.

Farmers underestimate their ability to manage their pasture, but with the right information they can take their dairy, sheep, & beef production, profitability, & environmental sustainability to a level they did not know existed."

NOZZLES CAN WEAR UP TO 8% IN 50 HOURS

Don't risk over spraying your crop or wasting expensive chemical

"THEY WERE ABLE TO QUICKLY TAILOR A PACKAGE TO SUIT MY NEEDS & REQUIREMENTS."

"I have had C-Dax products in the past, and had a good run with them. I like that they are NZ made and also local, so I rang and spoke with their customer services and then face-to-face with their Rep. They were able to quickly tailor a package to suit my needs and requirements. As we talked about the options and how I was going to use it. The fact that C-Dax came out and installed the sprayer and ran through its operation, along with the competitive cost were the ultimate deciding factors for me."

HOWARD WALSH, MARTON

"THE XC3 SMART CONTROL MAKES SURE WE'RE EVEN MORE EFFICIENT."

"The XC3 Smart Control makes sure we're even more efficient—as we speed up it adjusts so that the right amount of spray is applied, and if we drive in a area that has already been sprayed then it switches off. Then we upload our data where and when we sprayed the paddocks."

PAT REYMER, GOLDLINE 1200 MEGA SPRAYER

"WITH ALL THE SUPPORT OPTIONS THERE, WE WERE CONFIDENT WE HAD A VALUE FOR MONEY RESULT"

"By talking to C-Dax & using their Goldline Unit Configurator we were able to match the right components into one unit that covered all of our needs efficiently & effectively."

PAUL BERRY, PREBBLE SEEDS
