Water Saving Tips

Our Pupil Parliament are busy working towards the Schools Eco Award. Part of this involves looking at ways to reduce water usage both at school and at home. Here are some top tips to save water at home:

- 1. Spend less time in the shower.** Having a four minute shower could save a typical household £45 a year on their heating bill.
- 2. Turn off the tap when brushing your teeth**
- 3. Get a water butt to collect rainwater.** You can then attach your hose to water your garden.
