FHC-USA.COM

Who We Are...

Frameless Hardware Company LLC (FHC) is a manufacturer and supplier to the glass, glazing, and fenestration industries. We provide a complete range of tools, supplies, and innovative architectural hardware for frameless shower doors, all-glass entrances, aluminum storefronts and entrances, architectural railings, and transaction windows.

As a privately owned, American based company, our mission is built upon the core principles of customer service, product innovation, and entrepreneurship. Our products, services, and ethics are backed by a team of highly knowledgeable industry veterans that effectively combine technical competency, product expertise, and small business ideologies.

FHC Manufacturing

Custom Fabrication & Technical Support: Best of Both Worlds

We know that every project is different, so in addition to our core capabilities we have many flexible services around product design, engineering, and manufacturing. FHC offers free technical advice to help you decide which products will accomplish your project requirements and walk you through each step. We have a variety of processes to provide a true one-stop solution to fit our customer's needs. We have also just increased our manufacturing and bi-coastal distribution footprint to a combined 450,000 square feet in Southern California, Kent Washington, West Columbia South Carolina, and Irving Texas enabling us to serve you better. As we continue to grow, we make significant investments to increase production and inventory levels, shorten lead times, and improve technical/customer support. Contact FHC today to speak to a Technical Service Representative about your next project!

FHC's Online Catalogs

The FHC Online Catalogs is an innovative and convenient online resource that provides a comprehensive overview of our product offerings. This new resource is exclusively available online and offers a product-specific catalog, making it easy for users to find the products they need and explore related items. The catalog features clickable product items that directly link to the corresponding product offerings, ensuring a seamless shopping experience. With full-color pages, the catalog also includes installation images for inspiration and illustrations to facilitate easy understanding. Furthermore, FHC Online Catalogs are accessible 24/7, allowing users to view and explore our products at their convenience.

PROFESSIONAL GRADE

Introduction to Sealants

Being fully informed is a major part of being prepared for any glazing, waterproofing, or sealing project. However, gathering material from manufacturers of competing products can be a time and labor-intensive struggle. After all that effort, you may be faced with an overwhelming number of options.

Recognizing this challenge, FHC has been heavily involved in the sealants industry for many years. We have consolidated the most complete and comprehensive sealant information available. Our database includes information from major sealant suppliers like Dow Corning®, General Electric®, Tremco®, and our own FHC Brand. We cover a full range of technologies, from the original patent silicone to the modern neutral cure system. Additionally, we provide information on high-performance polyurethanes, acrylics, butyl, latex caulking compounds, and other sealant and adhesive products.

With FHC, you can save time and effort by accessing all the information you need in one place for your glazing, waterproofing, or sealing projects.

Limitations of Warranties

The terms and conditions specified in FHC publications apply to all products and materials. FHC recommendations regarding these products are based on reliable tests and examinations. However, FHC does not guarantee or warrant the accuracy or completeness of these recommendations. It is the sole responsibility of the user to determine the suitability of FHC's products or materials for each intended use, and the user assumes all risks and liability associated with their use.

Regarding defects in material or workmanship, FHC provides a warranty. Within thirty (30) days of receiving the product or material, if any portion is proven to be defective upon inspection, FHC agrees to replace it or, at their sole discretion, refund the

purchase price. It is important to note that no salesperson, agent, employee, or representative of FHC has the authority to alter or expand upon the terms of this warranty.

Please note that FHC shall not be held responsible for any special, indirect, consequential, or incidental damages or loss, including but not limited to loss of profits or revenues, economic losses, or loss of use, whether statutory or based on theories of contract or tort. This warranty and the terms specified herein constitute the entirety of the agreement between the parties and supersede any other agreements, express or implied, including any relating to merchantability or fitness for a particular purpose.

FHC Silicone Sealants

- Excellent Adhesion to Glass, Tile, Marble, Vinyl, Aluminum & Metal
- Window and Door Approved
- Mildew Resistant (Only S150 Series)
- For Interior and Exterior Use
- Non-Sag, Easy Tooling and Cleaning
- 24 Month Shelf Life / 10 Year Warranty

Silicone sealants offer a wide range of applications due to their excellent resistance to UV and weather. They can be easily applied in various temperature conditions, ranging from -35°F to 130°F (-37°C to 54.4°C). These sealants exhibit remarkable stability at very high and low temperatures, ranging from -80°F to 400°F (-62°C to 204°C). They also provide strong adhesion, particularly to glass and have excellent joint movement capabilities, allowing for flexibility from $\pm 25\%$ to $\pm 50\%$. Additionally, silicone sealants typically come with warranties of 10 years and have a life expectancy of over 25 years. They also have a shelf life lasting between one to two years. It's important to note, however, that silicone sealants cannot be painted, as paint tends to bead up when applied to cured silicone.

**BEST
SELLER**

Silicone sealants are versatile in their applications, boasting exceptional resistance to UV and weather. They can be effortlessly used across a wide range of temperature conditions, spanning from -35°F to 130°F (-37°C to 54.4°C). These sealants demonstrate remarkable stability even in extreme temperatures, ranging from -80°F to 400°F (-62°C to 204°C). Furthermore, they offer robust adhesion, particularly on glass surfaces, and exhibit impressive joint flexibility, accommodating movements in the range of $\pm 25\%$ to $\pm 50\%$. In addition to their performance, silicone sealants typically feature 10-year warranties and have a lifespan of over 25 years. It's worth noting that they have a shelf life of one to two years, but it's important to remember that painting is not a suitable option for silicone sealants, as paint tends to bead up when applied to cured silicone.

FHC Construction Sealants

FHC Construction Sealants offer a diverse selection of options tailored for various construction needs. This lineup encompasses Structural and Non-Structural Silicones, Polyurethanes, Acrylic Latex with Silicone, and Butyl Rubber Sealants.

Structural Silicone Glazing, for instance, is a technique that employs silicone to securely attach glass or other panels to supporting frames, eliminating the need for external retainers or covers. These joints in structural silicone glazing must withstand forces stemming from wind, thermal expansion, and building shifts. Over time, this method has seen advancements in materials, performance, and sustainability.

Non-Structural Building Silicones, on the other hand, may feature low VOC emissions, making them safe for use in sensitive indoor settings like hospitals and schools.

Polyurethanes, recognized for their high-performance attributes, exhibit joint flexibility of up to $\pm 25\%$ and more, rendering them ideal for various applications, including perimeter caulking around windows and doors (excluding glass). They often come at a more budget-friendly cost compared to silicones, providing excellent adhesion to diverse surfaces and the option for painting.

Acrylic Latex with Silicone Caulk, being water-based, facilitates easy cleanup. These sealants find common use in residential and light commercial construction projects, both indoors and outdoors, thanks to their relatively lower movement capability. They can usually be painted shortly after application.

Butyl Rubber Sealants excel in adhering to most substrates and demonstrate impressive weather resistance. However, due to their limited movement capability, they are best suited for applications with minimal movement, such as lap seams of metal panels and concealed window frame joints. Similar to the other sealants mentioned, Butyl Rubber Sealants can be painted after they have fully cured.

FHC S450 Neutral Cure Construction Silicone

- Excellent Adhesion to Most Surfaces
- UV Resistant
- Compatible for Use With Insulated and Laminated Glass
- AAMA Approved Low-Odor Formula Available in Five Colors
- 20 Year Limited Warranty

FHC S450 Series Neutral Cure Sealant cures rapidly when exposed to atmospheric moisture to form a durable, tight bond. The product's design is ideal for back-bedding as well as other glazing applications. Preferred by trade professionals, because it doesn't leave the odors associated with other silicones. Compatible with the installation of insulated glass, laminated glass, and mirror perimeter edge sealing.

FHC P95 Polyurethane Construction Sealant

- Smooth and Grainy Textured Sealants Available
- Primerless Adhesion on Most Common Construction Surfaces Including KYNAR® Coated Metals
- AAMA Approved
- VOC Compliant - Only 9 g/L
- UV Resistant/Non-Yellowing

P95 is a multi-purpose, advanced, polymer sealant. The product's one component design ensures that it cures rapidly when exposed to atmospheric moisture, to form a durable bond, and can be applied in a wide range of temperature and weather conditions (-40° F to 140° F). It is engineered to deliver an aggressive, watertight, adhesion, with moving joints in most common construction substrates like concrete, masonry, metal, vinyl, wood, stucco, asphalt, and flashing. It is also ideal for sealing perimeters of storefronts, doors, and curtainwall framing. P95 is compatible with insulated glass sealants, painted metal finishes like KYNAR®, and powder coat. It is not recommended for ground applications. P95 contains no solvents and very low volatile organic compounds (VOCs) making it an environmentally conscious product choice.

FHC S50 Series Acrylic Latex With Silicone

- Paintable With Increased Silicone Adhesion and Longevity
- Quick Curing Mildew Resistant Multi-Purpose Formula
- Easy Tooling and Easy Clean-Up/Odor Free
- Window and Door Frame Approved
- Suitable for Installing Insulated Glass in Wood Frames
- Excellent Flexibility, Kitchen and Bath Approved
- Interior and Exterior Use
- Available in Two Colors
- 10.1 Fl. Oz. Cartridge
- 30 Cartridges Per Case

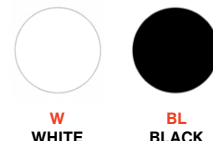

ITEM NO.	COLORS
S50W	White
S50C	Clear

Minimum order: 1 each.

FHC Premium Butyl Sealant

- Single Component, Butyl-Based Sealant in 10.1 Oz. Standard Cartridge
- Remains Permanently Flexible With Excellent Adhesion and UV Resistance
- Delivers Solid Durability Over Extended Periods Without Sagging or Slumping
- Paintable and Non-Staining
- Structural Bonding and Insulation of Metal Building Panels
- Exterior Use
- 30 Cartridges Per Case

ITEM NO.	COLORS
BS15W	White
BS15BL	Black

Minimum order: 1 each.

FHC Non-Skinning Butyl Sealant

- Single Component, Butyl-Based Sealant in 10.1 Oz. Standard Cartridge
- Non-Skinning Formulation Remains Permanently Pliable With Excellent Adhesion and UV Resistance
- Provides Moisture and Sound Barrier Protection
- Non-Paintable and Non-Staining
- Ideal Choice in Applications Where Moisture and Cold Temperatures Would Cause the Break-Down of Other Sealants
- Excellent Choice for Insulated Metal Panels for Walk-In Coolers, Freezers, and Refrigeration Trailers
- Works Well to Apply Flooring in Residential, Commercial, and Remodel Construction
- 30 Cartridges Per Case

ITEM NO. **BS15NS**

FHC Backer Rod

Bulk Quantities Available
Click to Chat With Us

CLICK ANY FHC ITEM NUMBER
To Buy Now or Get Additional Product Information

FHC Backer Rod

- Backer Rod is a Flexible Foam Product Used in Construction and Sealing Applications
- Used to Fill Gaps and Joints in Buildings, Providing Insulation and Preventing the Passage of Air, Water, and Other Substances
- It Reduces the Amount of Sealant Required and Helps the Sealant Adhere Properly
- Use in Various Construction Projects, Including Windows, Doors, Expansion Joints, and Concrete Cracks
- Using Backer Rod Can Improve the Longevity and Durability of the Seal

FHC Backer Rod
Open Cell

- Diameter Should be 25% - 50% Larger than the Joint
- Can Be Used With Hot or Cold Applied Sealants
- Will Not Out-Gas Which Causes Sealant Failure

ITEM NO.	DIAMETER	TOTAL FEET
OCBR58	5/8"	500'
OCBR78	7/8"	350'
OCBR118	1-1/8"	300'
OCBR112	1-1/2"	350'
OCBR2	2"	200'

Minimum order: 1 pack.

FHC Backer Rod
Closed Cell

- Inert Material is Compatible With All Cold Applied Sealant
- Available in 100' or 6400' Spools

ITEM NO.	DIAMETER	TOTAL FEET
CCBR14C	1/4"	100'
CCBR14B	1/4"	6400'

Minimum order: 1 roll Item No. CCBR14C, or 1 case of Item No. CCBR14B.

FHC Backer Rod
Sof Bi-Cellular

- Diameter Should be 25% - 50% Larger than the Joint
- Water-Resistant Closed Cell Characteristics Without the Possibility of Out-Gassing
- Inert Material is Compatible With All Cold Applied Sealants

ITEM NO.	DIAMETER	TOTAL FEET
SOFBR58	5/8"	550'
SOFBR78	7/8"	330'
SOFBR118	1-1/8"	500'
SOFBR112	1-1/2"	552'
SOFBR2	2"	360'

Minimum order: 1 box.

FHC Sealant Bond
Breaker Tape

- Use to Prevent 3-Point Adhesion in Shallow Caulk Joints and Where Backer Rod Can't be Used
- Tape Prevents Sealants From Adhering to the Tape Backing
- Available in Clear and Black Colors, 0.2mm Thick

FHC SEALANT BOND BREAKER TAPE

FHC Backer Rod Guidelines for Properly Moving Dynamic Joints: DO's and DON'Ts

Prevents Adhesions on Three Sides

The sealant's inability to bond with the joint's underside will increase movements (Figure 2).

Control the Sealant's Bead Depth

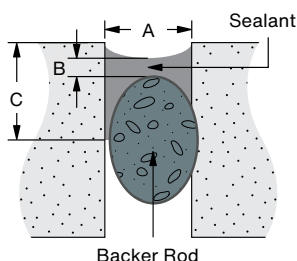

The sealant bead conforms to the manufacturer's design recommendations, enhancing the sealant's capacity for movement (Figure 2)

Provides Resistance to Tool Against

When tooled, the sealant is pressed against the backer rod, ensuring optimal adhesion to the joint's side walls (Figure 3). To achieve this, the backer rod must be intentionally oversized, ensuring a secure fit within the joint (Figure 4).

DO

Ensure that the minimum A to B ratio is 2:1.

A and C dimensions must not be less than 1/4".

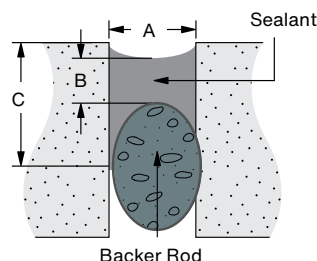

The joint surface should have a concave tooling.

It is recommended that dimension B does not exceed 3/8".

FIGURE 1:
Regulates the Sealant Bead Depth

DON'T

A deep sealant bead hinders flexibility and movement.

Excessive sealant depth leads to slower curing.

B dimension exceeds the suggested 3/8" maximum.

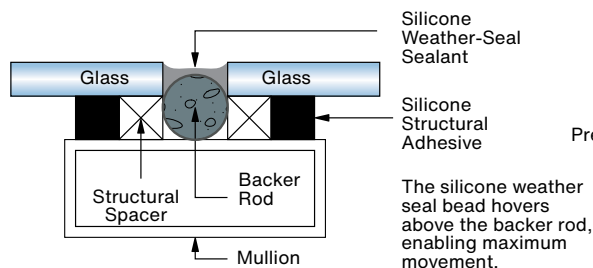

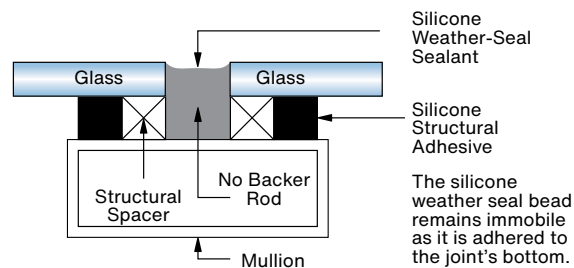

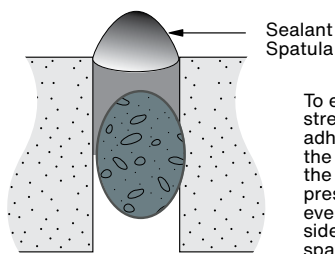

FIGURE 2:
Prevents adhesion on three sides.

The silicone weather seal bead hovers above the backer rod, enabling maximum movement.

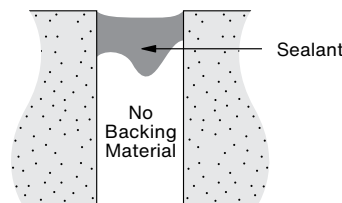

The silicone weather seal bead remains immobile as it is adhered to the joint's bottom.

To ensure uniform strength and adhesion along the bond line, the sealant is pressed firmly and evenly against the sidewalls using a spatula tool.

FIGURE 3:
Offers resistance when using a tool.

Uneven gaps between the sealant and the wall result in an irregular joint, leading to weak areas in the bond line that are prone to failure under stress.

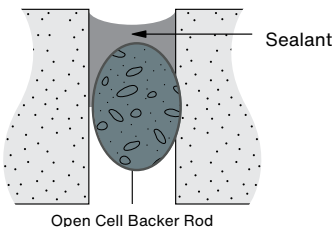

FIGURE 4:

An oversized rod keeps things in position.

RECOMMENDED BACKER ROD DIAMETER SIZES

FHC Caulking Guns

- Used to Dispense Caulking Material Such as Silicone or Acrylic Sealants
- Various Thrust Ratio to Accommodate Different Viscosity of Sealants
- High Quality Steel Construction With Steel Frame or Rotating Barrel
- Comes in Various Sizes and can Accommodate Different Types of Caulk Cartridge or Sausage
- Manual or Battery Operated
- Dripless Feature That Stops the Flow of Caulk When the Trigger is Released, Reducing Mess and Waste
- Wide Selection to Suit Specific Application for Your Next Project

Typical Caulking Gun Components

Understanding the Significance of Caulking Gun Ratios

In the realm of modern, high-viscosity sealants, caulking guns with Force-to-Handle-Cartridge ratios play a pivotal role. Understanding these ratios is straightforward: they act as multipliers for user applied pressure, increasing the force on the cartridge plunger.

For instance, a 12:1 Ratio Caulking Gun amplifies the user's pressure by a factor of 12. This enhanced thrust streamlines the application of high-viscosity sealants.

FHC Lightweight Composite Body Dripless Caulking Guns

- 18:1 Thrust Ratio Helps Reduce Arm Fatigue When Gunning Thicker Sealants
- Available for 10 oz. Cartridges
- Drip Switch Allows You to Choose Between Automatic Drip Free or Continuous Caulking
- Engineered Composite Construction Makes This Gun Lightweight and Stronger Than Steel

ITEM NO. **DCG3000**

INTRODUCING

FHC Tidewater Series

180 Degree Soft Stop Sliding Shower Door Kit

Our **FHC Tidewater Series 180 Degree Sliding Shower Door Kit** is a single-sliding door with our new Soft Stop technology. The Soft Stop innovation prevents the sliding glass door panel from slamming open or closed when engaged, and adds an extra dimension of safety. Available in four designer finishes, the Tidewater offers a sleek appearance without exposed rollers. Extra wide and heavy doors are no obstacle for the **FHC Tidewater**, handling 3/8" thick glass doors up to 132 pounds. The header length is 84", allowing for the possibility of using a sliding door in excess of 40" wide! There is no glass fabrication required for the roller carriers. With components to design a 90 degree return enclosure (sold separately), the **FHC Tidewater** is a superior choice when making a high quality, safety conscious frameless shower enclosure.
