

Technical procurement and logistics for a better workflow

INTEXA is the interface between suppliers and production with the aim of streamlining your purchasing processes and optimizing your supply chain management - from individual parts according to drawings, customer-specific assemblies and series parts to complete systems.

Simply outsource your procurement management

Increasing cost pressure, more complex products, shorter innovation cycles - companies today are exposed to high demands. For more than 30 years INTEXA has been a trading company specialized in industrial products, with which you can profitably optimize your procurement process. Reduce purchasing costs, optimize material flows, deliver on time - this is our focus from the very beginning.

The advantage: You benefit from the synergy effects of a powerful partner certified in quality management and a company which has a high level of knowledge in procurement management and is able to provide you with the best possible service and long-standing logistics competence under one roof.

INTEXA. Bundled procurement processes.

As a close partner of our customers we not only know the requirements for technical parts of all kinds but also the challenges of competition in the international markets of the High-tech industries.

With INTEXA as your partner you will benefit in multiple ways:

- Order-related procurement, also of small quantities
- Purchase management for KMU with master data creation
- Cost advantages through supplier bundling
- Advantages in terms of conditions due to key account status, worldwide
- Full market transparency through permanent INTEXA benchmarking
- Highly efficient procurement logistics with our own vehicle fleet and complete service (price negotiations, immediate service around the disposition, customs clearance, quality control, temporary storage, on-time direct delivery and much more)
- According to our DIN ISO certification 14001 we attach great importance to sustainability: Shipments are bundled to save transport routes. Besides we use sustainable packaging materials and reduce paper consumption through digital structures

The INTEXA service portfolio in brief:

- Procurement of machine components, individual parts, materials, mechanical turned parts, parts according to technical drawings, assemblies, multi-component constructions, serial parts
- Connection to your ERP software
- Turnkey solutions according to customer definition
- Project-related assembly groups and bundling of parts
- Order monitoring and supply chain monitoring
- Own logistics centre with complete processing
- Order picking - packing - dispatch (with our own vehicle fleet or parcel service)
- ship-to-line service
- Complete handling of sea freight, air freight, land transport
- Storage in our own logistics centre if required
- Complete integration into the customer supply chain

We can procure components for these divisions:

- Electrics/Electronics
- Mechanics
- Hydraulics/Pneumatics
- Drive technology, dosing systems, turned and milled parts/cast housings, etc.
