WHAT IS BREAKBULK CARGO?

. Breakbulk cargo is a general term which refers to any goods or shipment stored on a ship within individual units and be more specific breakbulk cargo is the type of cargo that can’t fit un containers.

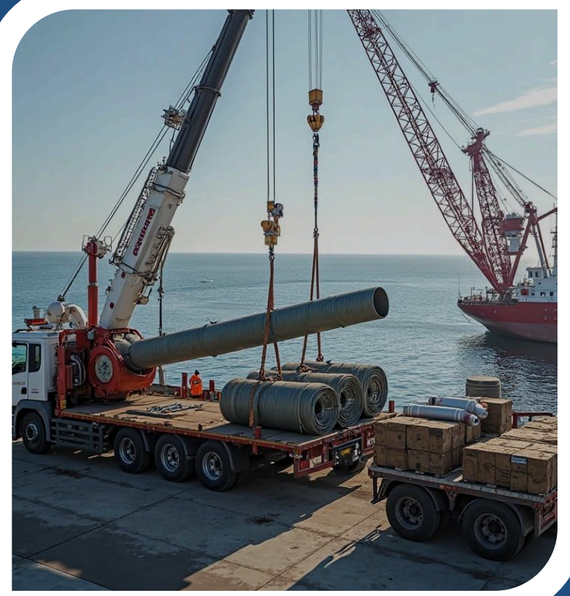

. Breakbulk cargo has become significantly reliable option for international shipments.

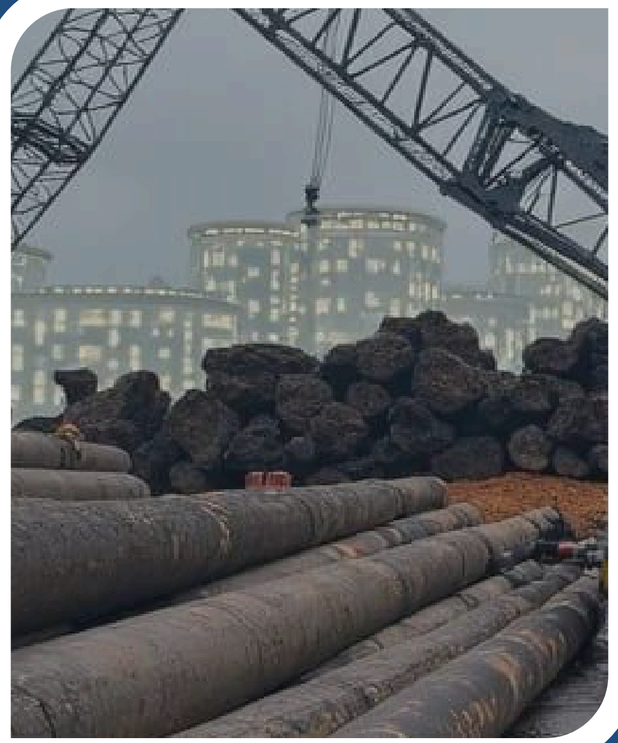

. Breakbulk cargo is loaded, stowed, secured and unloaded individually, often with the aid of onboard cranes and gear (in case of geared vessels) or port cranes and equipment (in case of gearless vessels) .

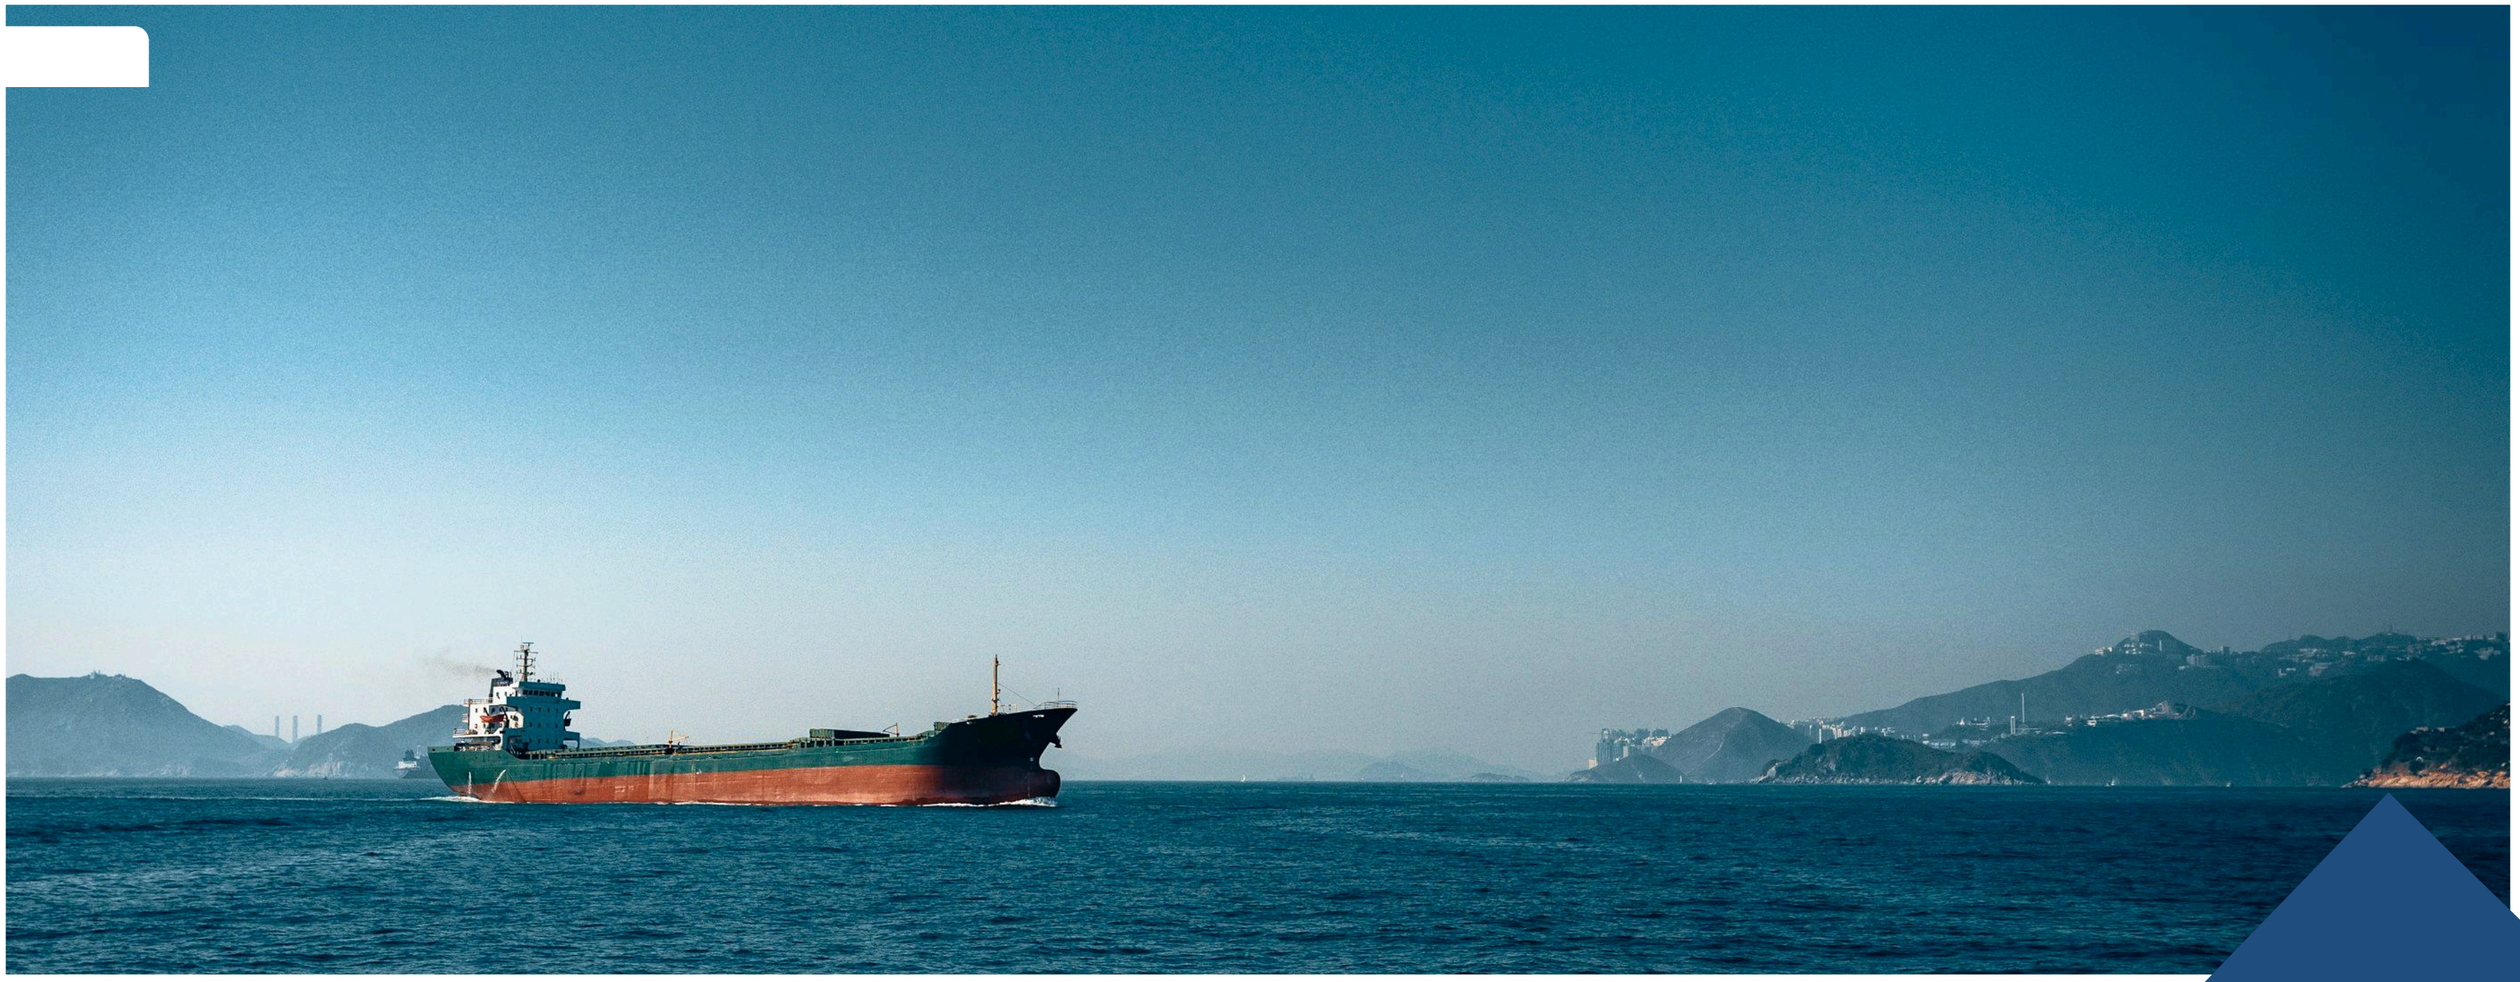

WHY US FOR BREAKBULK?

We offer specialized planning, equipment, and expertise to ensure safe, efficient, and cost-effective transport of bulk materials.

WHAT ARE DANGEROUS GOODS SHIPMENTS?

All dangerous commodities classified under the IMDG Code, such as flammable, corrosive, toxic and other regulated hazardous cargo.

WHY US FOR DANGEROUS GOODS SHIPMENTS?

We provide reliable and secure services for the transportation of dangerous goods in full compliance with the highest standards ensuring safety and compliance with applicable regulations.

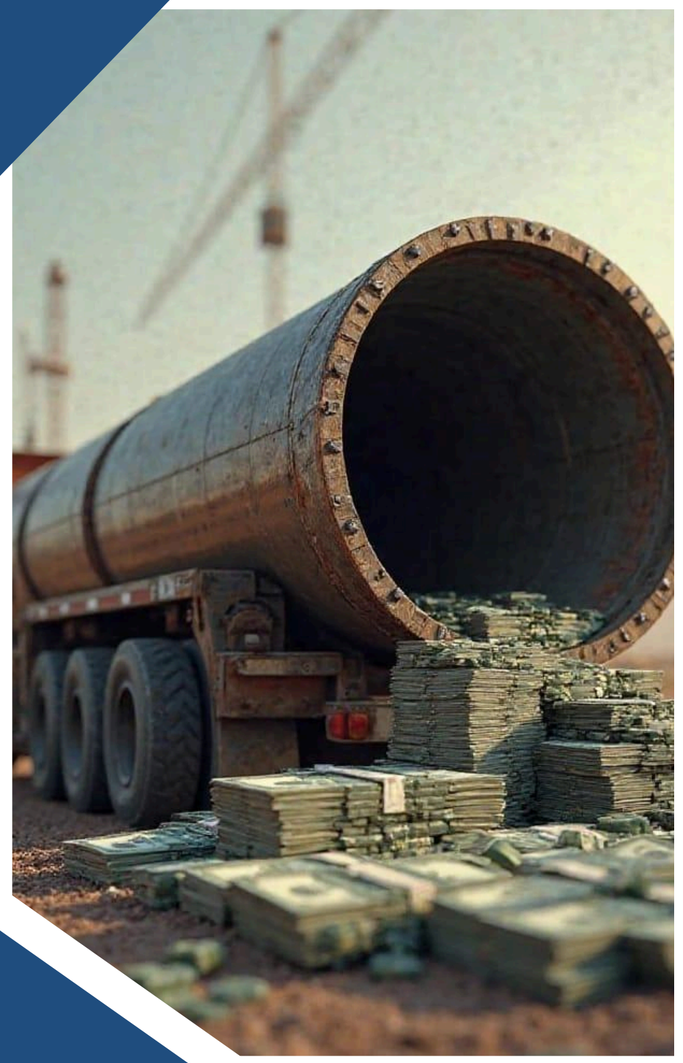

WHAT IS PROJECT CARGO?

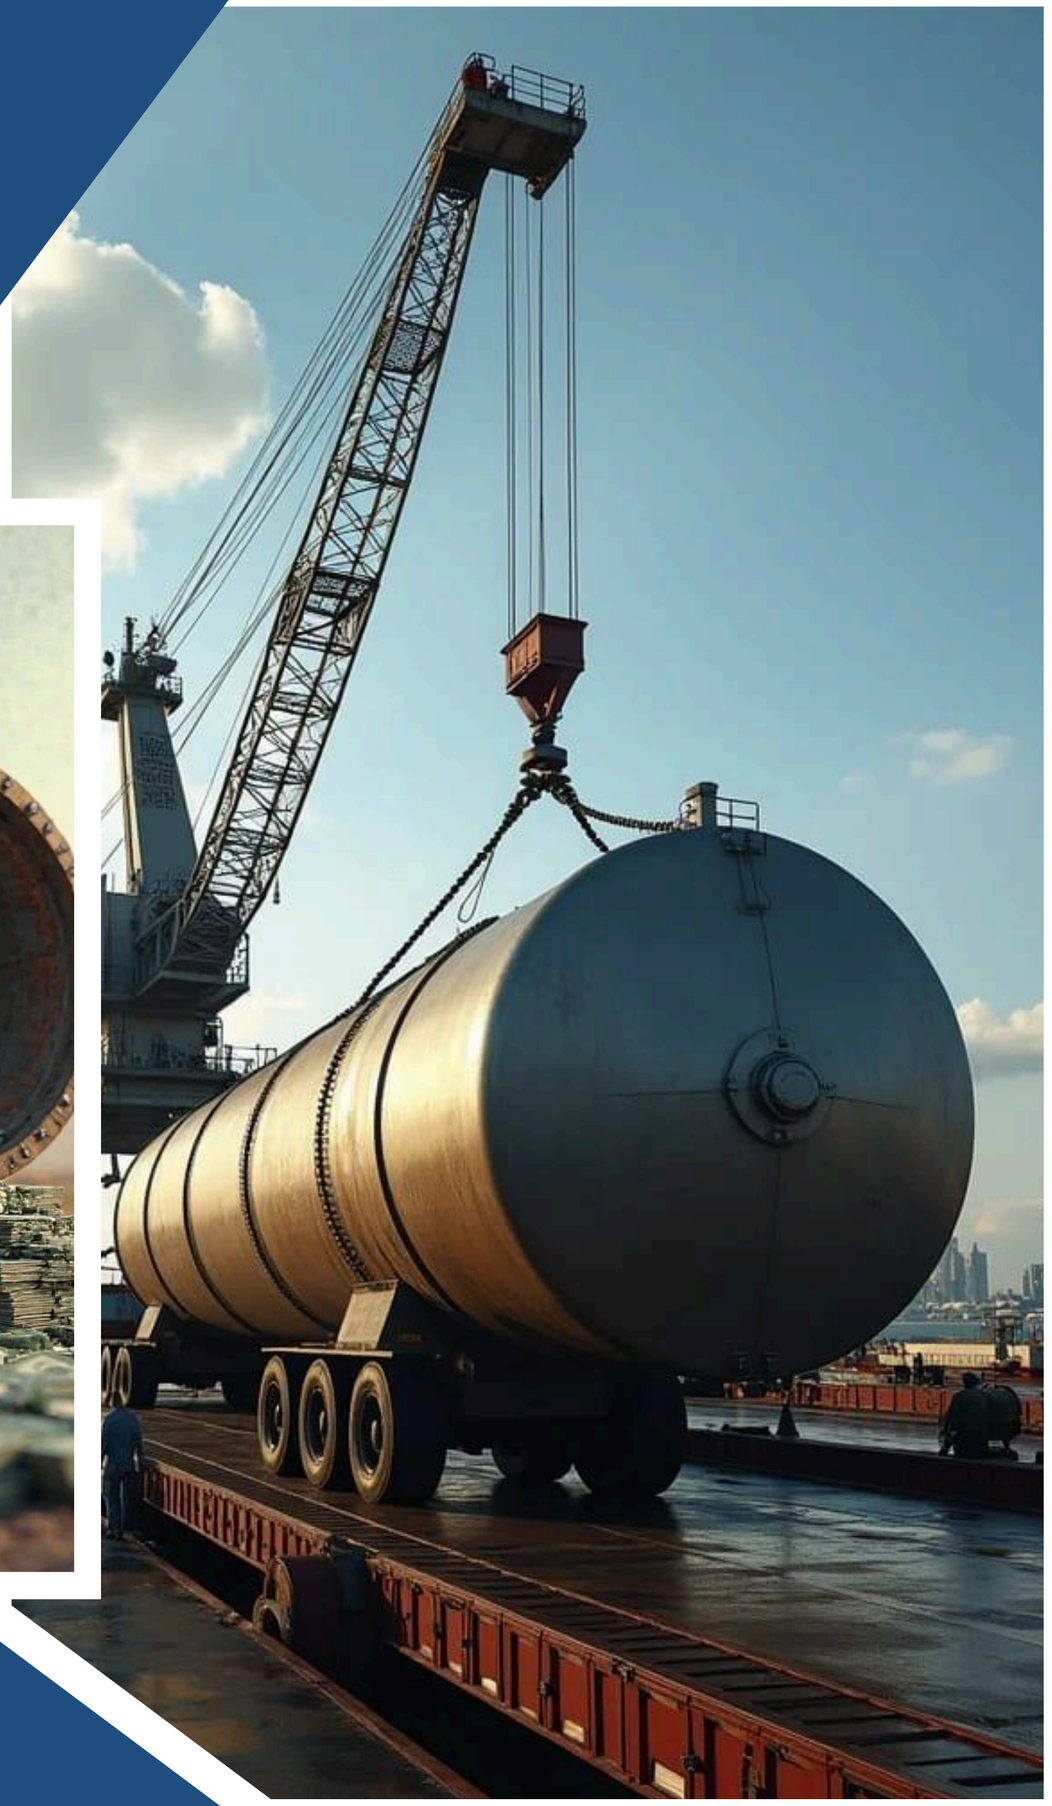

Specialized Transport: Project cargo involves the shipment of oversized, heavy, or high-value items like industrial or construction machinery that cannot be moved using standard transportation methods.

Expert Handling: Due to their size and complexity, these shipments require precise planning, specialized equipment, and skilled coordination to ensure safe delivery.

WHY US FOR PROJECT CARGO?

We can always deliver the most efficient results handling such complex and heavy goods with our experienced and skilled technical and operation team.
