

**LIGHTNING  
SAFETY SYSTEMS**

protecting properties, saving lives

**A MINIMAL INVESTMENT  
COULD SAVE YOUR  
ENTIRE ORGANIZATION**

# What if your business caught fire out of hours?

**Over 70% of businesses that experience a major fire, either do not reopen their doors, or they fail within the next three years.**

It's a devastating experience. Not only do these fires cause damage to property and assets, they also put lives at risk.

**Please ensure your organisation is not one of these statistics.**

Thanks to cutting edge technology and 24/7 human vigilance, these risks are easily preventable.

We know you have done the responsible thing and invested in excellent fire safety systems.

We also know you are missing a layer of security and it is our responsibility to make sure you have this in place.

That's why we are offering you a DualCom fire monitoring system, with a proven track record of saving businesses from devastating fires.

The cutting edge technology ensures immediate and reliable transmission of fire alarms to the monitoring station, using both landline and mobile networks to ensure uninterrupted communications between the two. This dual system ensures that your business is always protected, even in the event of line cuts or network failures.

DualCom helps meet insurance requirements and can reduce the premiums charged.

The remote signalling system sends an alarm activation alert to the fire brigade immediately upon detection, enabling them to be at the premises within 15 minutes of the alarm being raised.

The monitoring system is staffed 24/7 by trained professionals, meaning that threats are detected and addressed usually within 60 seconds

Fires can happen at any time, although statistics show that the most common time is after 6 p.m. when most people have left for the evening. By investing in a DualCom system, you not only ensure the safety of any employees left in the building, as well as your assets, but you are also demonstrating your commitment to responsible business practice.

This helps build trust with customers and staff.

It's easy to get started and remember, it's an opportunity you mustn't miss.

**Simply contact us now on:**

**Tel: 02392 268 999 | Email: [sales@lfltd.co.uk](mailto:sales@lfltd.co.uk)**

DualCom can also transmit intruder or personal attack systems to an alarm-receiving monitoring station at high speed – please ask us if you are interested in this, too.
