DID YOU KNOW???

1. With September brings the beginning of fall in the northern hemisphere, officially commencing on the September equinox, which is usually between the 21st and 23rd of the month. It is the opposite in the southern hemisphere with spring starting on the September equinox.
2. September 11, 2001, changed the shape of the world forever. It was on this day that the worst terrorist attack to ever happen on US soil occurred when four commercial airlines were hijacked. Two of the planes were flown into the Twin Towers of the World Trade Center, and another was crashed into the Pentagon. The fourth plane crash-landed into a field in Pennsylvania after the passengers of the flight attempted to regain control of the plane from the terrorists. We want to remember all the people that lost their lives in the attack, including civilians and first responders trying to rescue.
3. International Literacy Day is globally observed on September 8th. Established by UNESCO in 1966, this day underscores the importance of literacy as a matter of dignity and human rights.
