

CASE STUDY

Client: Mr and Mrs White, Over, Cambridge
Project: Design, construct and install media wall with integrated fireplace
Value: £7000
Programme: 5 Weeks

OBJECTIVES

The project involved designing and installing a warm but contemporary media wall in a new build property featuring a striking glass fireplace and floating shelves.

THE CHALLENGE

The client's lounge featured a long blank wall that lacked character, purpose, and visual interest. The challenge was to transform the space into an attractive focal point while incorporating practical storage and a bespoke design that complemented the room.

OUR APPROACH

Using detailed 3D designs, we refined the media wall layout and finish with the client. Most manufacturing was completed in our workshop to reduce disruption, dust and noise, with installation carried out in pre-built sections and full protection to carpets, walls and furnishings, ensuring a clean and minimally disruptive process throughout.

RESULT

The media wall transformed a blank space into a warm contemporary focal point. Combining storage, ambient lighting and an integrated fireplace, it delivered function, character and enhanced the lounge.

THE SOLUTION

- Warm contemporary design creating a striking focal point
- 1.5m electric glass fireplace with 2kW heat output
- Four floating display shelves
- Recessed alcove for TV and soundbar
- Oiled slatted panelling for texture and warmth
- Integrated remote-controlled LED lighting around TV area
