

CASE STUDY

Client: Mr and Mrs Stewart, St Ives, Cambridgeshire

Project: Design, construct and install under stair storage

Value: £4800

Programme: 5 Weeks

OBJECTIVES

The project involved designing and installing bespoke under-stair storage drawers to maximise space and complement the clean, contemporary new-build interior.

THE CHALLENGE

The client had a significant footwear collection and required a practical storage solution to keep the entrance hall organised and free from clutter. The challenge was to maximise storage capacity while maintaining clear floor space and preserving the clean, minimalist aesthetic of the home.

OUR APPROACH

Using detailed 3D drawings, we helped the client visualise and refine the design. The drawers were handcrafted and spray-finished to match the kitchen doors for a seamless finish, with full protection to floors, walls and surrounding areas, ensuring a clean and careful installation throughout.

THE SOLUTION

- Fully fitted bespoke design to maximise under-stair space
- Seven push-release drawers with soft-close functionality
- Durable melamine interiors for a low-maintenance finish.
- Contemporary shaker-style drawer fronts
- Premium lifetime-guarantee drawer runners

RESULT

This project transformed unused under-stair space into a sleek, functional storage solution for modern family living. The design delivered concealed storage while complementing the home's clean, contemporary style.

STEVE MASON

Master carpenter

For over 10 years we have been continually improving our service to our valued clients. Our aim is to provide an excellent customer experience from the initial contact to handover.
