

CASE STUDY

Client: Mr and Mrs Scott, Orwell, Cambridge

Project: Design, construct and install made to measure alcove cabinet and shelving

Value: £4900

Programme: 6 weeks

OBJECTIVES

Design, manufacture and install bespoke alcove cabinetry combining display shelving, concealed storage and integrated lighting to create a feature tailored to the room's character.

THE CHALLENGE

The differing alcove sizes either side of the fireplace presented a unique design challenge. Careful planning was required to create a feature wall that felt symmetrical and visually balanced, while delivering both practical storage and a strong focal point within the room.

OUR APPROACH

The space either side of the fireplace was under-utilised and lacked function and impact. The client wanted a bespoke solution with discreet storage and a stylish feature wall, executed seamlessly to the agreed design intent. Existing furnishing fully protected during installation and dust kept to a minimum throughout.

THE SOLUTION

- Feature wall maximising unused alcove space
- Spray-painted finish to match chimney breast
- Six solid display shelves with integrated LED lighting
- Oak veneer interiors to complement timber mantelpiece
- Concealed storage with adjustable shelving

RESULT

The alcove units transformed unused space into a cohesive feature wall, combining display shelving, discreet storage and integrated lighting to enhance the room's practicality and character
